Table of Contents

Esri resources for your organization

Course introduction

Course introduction
Course goals
Installing the course data
Icons used in this workbook

1 ArcGIS information products

Lesson introduction
Using ArcGIS to create an information product
Information product creation workflow
Considerations for creating a visualization
Types of ArcGIS information products
Choosing an information product
Lesson review
Answers to lesson 1 questions

2 Preparing data

Lesson introduction
Data in visualizations
Data preparation considerations
Effective visualizations
Preparing attributes
Exercise 2: Prepare data for visualization
- Open an ArcGIS Pro map
- Explore effective scale visualization
- Choose a projected coordinate system
- Evaluate attributes
- Hide unnecessary fields
- Rename the layers

Enriching data

Lesson review
Answers to lesson 2 questions

3 Applying symbology

Lesson introduction
Visualizing data using symbology
Visual variables
Symbolizing layers
Exercise 3: Symbolize features on a map
- Open a map
- Symbolize a layer with a custom color
- Symbolize a layer using a hex code
- Symbolize points using unique values
- Symbolize a line with a multilayer symbol

Visual hierarchy
Evaluate visual hierarchy
Applying visual effects
Lesson review
Answers to lesson 3 questions

4 Configuring advanced symbology

Lesson introduction
Enhance data visualization
Methods to aggregate data for visualization
Scale-based symbology
Managing symbology using layer files and styles
Styles and layer files
Exercise 4: Apply advanced symbology
- Open a map
- Apply a Layer Blend mode
- Symbolize a point layer using Clustering
- Add styles to the project
- Add symbol layers to a polygon symbol
- Set the properties for a marker symbol layer
- Save a custom symbol to a style

Lesson review
Answers to lesson 4 questions

5 Creating map text

Lesson introduction
Understanding map text
Designing map text
Effective map text
Types of map text
Interpreting map text
Using Arcade to configure map text
Customizing map text using label classes
Configuring pop-ups
Exercise 5: Configure map text
- Open a map
- Define a label class
- Adjust label properties for line labels
- Label a polygon feature class
- Copy label class properties into a different layer
- Use an Arcade expression to customize labels
- Label a point layer
- Convert labels to annotation
- Adjust annotation feature location
- Edit annotation text

Lesson review
Answers to lesson 5 questions

6 Creating charts

Lesson introduction
Why use charts?
Using charts in ArcGIS
Creating a chart in ArcGIS Pro
Exercise 6: Create charts in ArcGIS Pro
- Open a map
- Examine data attributes

Symbolize data using pie charts
Create a bar chart
Configure data display for a bar chart
Configure visual design elements of a chart
Configure chart labels and text
Add a chart to a layout
Adding charts to web-based information products
Lesson review
Answers to lesson 6 questions

7 Creating layouts

Lesson introduction
Output considerations
Pattern of reading
Creating a layout
Map series
Dynamic text
Exercise 7: Create a map series
Open and explore a map
Add a scale bar to a layout
Create a map series
Add dynamic text as a map title
Add page numbers to a map series
Set up a map series page filter
Export a map series to PDF
Lesson review

8 Creating web maps

Lesson introduction
Web maps
Designing web maps
Exercise 8: Create a web map using ArcGIS Online
Open a web map
Add layers to a web map
Symbolize a web map

Configure a pop-up title
Format a pop-up
Use Arcade to format attributes
Save a web map
Lesson review

9 Publishing web maps

Lesson introduction
Sharing content using ArcGIS
Choose sharing permissions
Accessing web maps
Exercise 9: Create a web app from a web map
Choose an app using ArcGIS Instant Apps
Configure the app
Preview the app
Publish the app
Workflow review
Answers to lesson 9 questions

10 Creating immersive visualizations

Lesson introduction
Using 3D scenes to visualize data
Creating 3D scenes
Displaying data in 3D
Exercise 10: Create a 3D scene
Convert a 2D map to a 3D scene
Convert 2D layers to 3D layers
Symbolize a layer using Unclassed Colors
Extrude features
Navigate the scene
Creating animations
Lesson review

Answers to lesson 10 questions

Appendices

Appendix A: Data license agreement
Appendix B: Answers to lesson review questions
Appendix C: Additional resources
Appendix D: Lesson stories
