

# Maximize your performance

Unlock your business's full performance potential with Performance 5

Across Meta technologies, investments in artificial intelligence (AI) are helping businesses make the most of their marketing investment.

## 20%

increase in Q4 conversions year-over-year<sup>1</sup>

## 3.3x

return on ad spend in 2022<sup>2</sup>

Five best practices to get the most out of the system:

Account simplification

Automation

Creative diversification

Data quality

Results validation

# 1 Account simplification

## KEY INSIGHT

When a campaign starts running, each ad set goes through an initial “learning phase”. Simplifying account structures helps AI systems get the results you need faster.

 **28%** Lower cost per purchase for ad sets that had more than 50 events per week.<sup>1</sup>

 **19%** Lower CPA for ad sets that successfully exited the learning phase.<sup>1</sup>

## RECOMMENDATIONS\*

Consolidate and limit changes to simplify your account.

-  Look for additional consolidation opportunities e.g. combining prospecting and retargeting audiences.
-  Limit the number of ad sets you create to ensure you can reach 50 weekly conversions per ad set.
-  Optimize for events with sufficient volume.
-  Group together significant edits to avoid sending an ad set back into the learning phase.

## SUCCESS STORY

In an effort to reach more shoppers, Lele Sadoughi simplified their account structure from 69 to 15 ad sets and saw a 41% increase in purchases.<sup>2</sup>

\*Best practice recommendations solely to help inform ad campaign strategies; not intended as a warranty or guarantee of results to be achieved. Marketing outcomes depend on a variety of factors and will vary.

Source: 1- Analysis excludes smaller tail-end advertisers who are not eligible to see spend in learning details, and uses only purchase optimized activity from October 2022. 2- Meta case study, Sep 2020. All results are self-reported and not identically repeatable. Generally expected individual results will differ.

## 2 Automation

### KEY INSIGHT

Automation helps marketers keep up with dynamic consumer behavior using advanced AI models to achieve efficient results.

Automate end-to-end

 **32%**

Increase in return on ad spend with Advantage+ shopping campaigns.<sup>1</sup>

Automate single lever

 **13%**

Decrease in cost per result with Advantage+ custom audiences.<sup>2</sup>

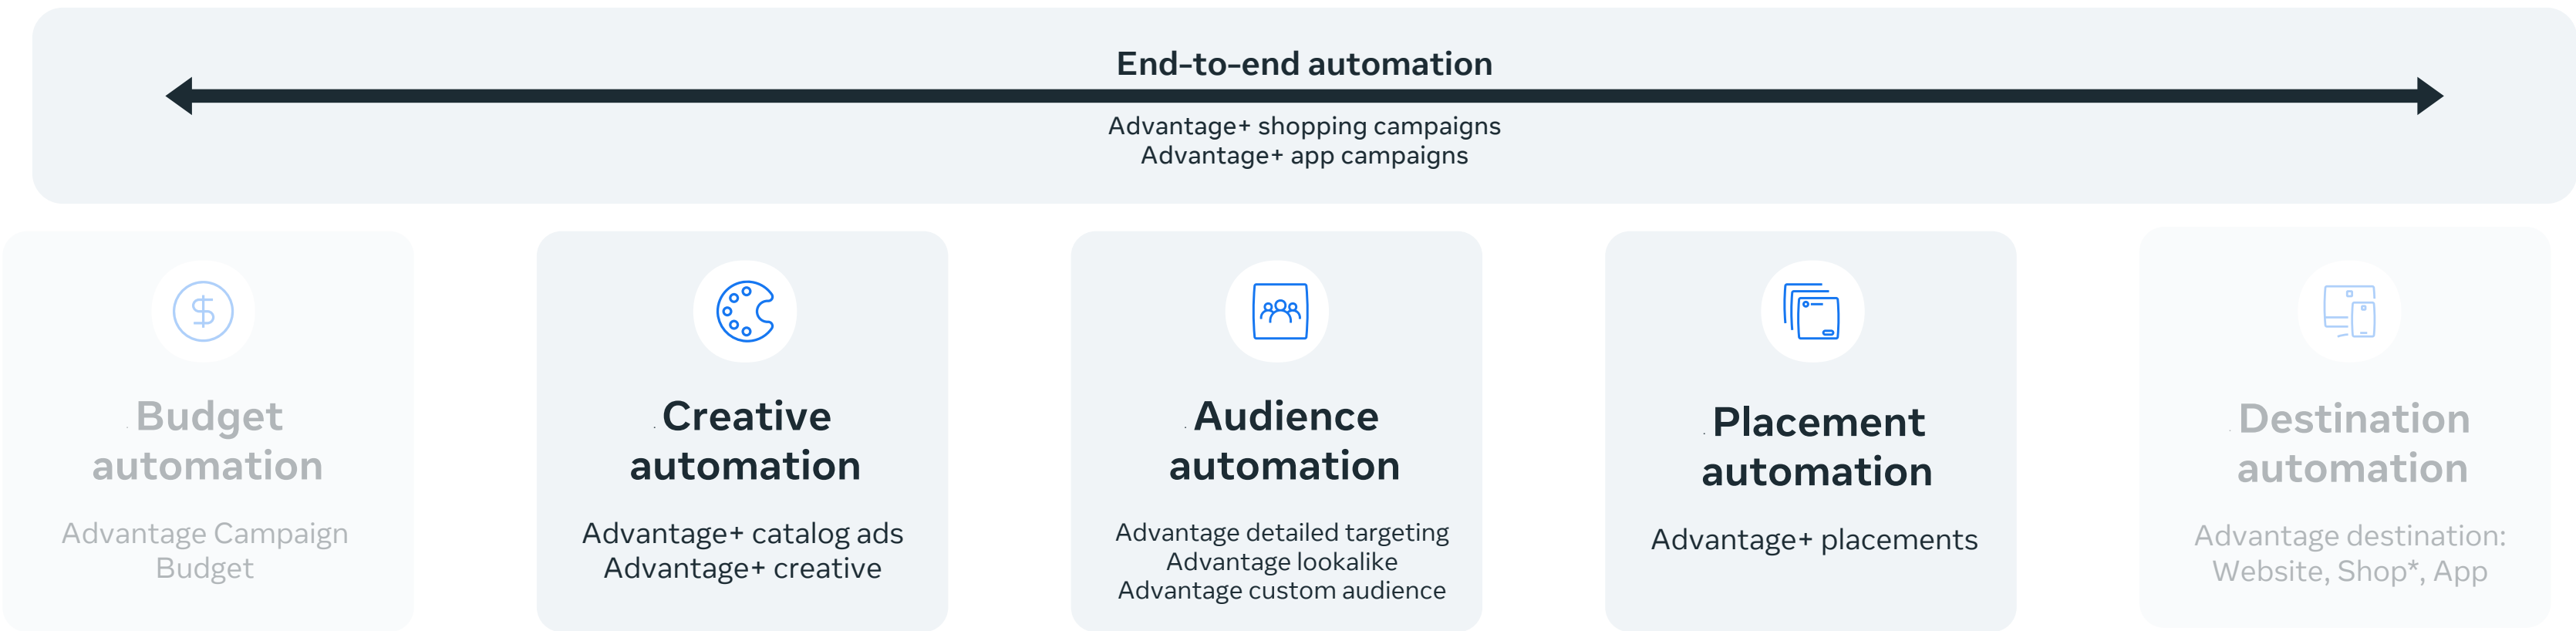

### RECOMMENDATIONS\*

Automate your entire campaign, or part of a campaign across budget, audience, creative, placement.

-  **Automate end-to-end**  
Select end-to-end automation if your business can be flexible across budget, audience, creative, and placement decisions. End-to-end automation solutions include Advantage+ shopping campaigns or Advantage+ app campaigns.
-  **Automate a single campaign lever**  
For businesses with strict requirements that limit flexibility, automating an individual lever helps meet constraints while delivering efficiency. Top automation levers in this category include automating:
  - Creative - Advantage+ catalog ads
  - Audience - Advantage custom audience
  - Placement - Advantage+ placements

## Meta Advantage suite uses automation to make media more efficient.

Marketers can automate their entire setup or select parts of a campaign.  
In this guide, we will cover a subset of the most impactful solutions within Advantage suite.

### SUCCESS STORY

The running company On believed they had saturated their audience on Meta. With the help of Advantage+ shopping campaigns, they discovered new customer groups to grow at a 60% improved cost per result.<sup>3</sup>

\*Best practice recommendations solely to help inform ad campaign strategies; not intended as a warranty or guarantee of results to be achieved. Marketing outcomes depend on a variety of factors and will vary.

Source: 1- Meta internal study on 31 advertisers from NA, APAC, EMEA, and LATAM from July-Sept 2022. 2- The results were based on 10 experiments (Meta A/B split tests) across multiple verticals in NA to measure performance of their Meta campaigns to retarget custom audiences. All tests were run between Feb 2023 - April 2023. 3- Meta case study, June 2022. All results are self-reported and not identically repeatable. Generally expected individual results will differ.

### 3 Creative differentiation

#### KEY INSIGHT

People buy the same product for different reasons. Diversified creative reaches more shoppers with a relevant message.

# 32%

Increased efficiency.<sup>1</sup>

# 8%

Incremental reach.<sup>1</sup>

#### RECOMMENDATIONS\*

Deliver more relevant creative by building a variety of assets.

#### Diversify concepts

- Identify top motivators and barriers for your product.
- Map them to a benefit and call to action.
- Differentiate creative routes visually.
- Add new creative to high-spend ad sets and monitor new audiences reached.

#### Diversify formats

- Build for Reels
- Work with creators using partnership ads (formerly branded content ads)

#### CONCEPT

##### Emotion-led creative

##### Motivation-led creative

#### FORMAT

##### Reels

##### Partnership ads

(formerly branded content ads)

#### SUCCESS STORY

Wild Alaskan wanted to expand their business to more seafood lovers. They diversified their creative to be more health-conscious and speak to a younger demographic. A lift test revealed that the cell with diversified creative drove 1.8x more purchases at 43% lower cost per action.<sup>2</sup>

\*Best practice recommendations solely to help inform ad campaign strategies; not intended as a warranty or guarantee of results to be achieved. Marketing outcomes depend on a variety of factors and will vary.

Source: 1- These results were derived from a scaled backend test comparing the performance of two identical vs two non-identical (creatively diverse) creatives in 2703 ad sets across verticals from 04-04-2021 to 04-26-2021. This analysis was limited to static ads only. 2- Meta case study, Feb 2022. All results are self-reported and not identically repeatable. Generally expected individual results will differ.

## 4 Data quality

### KEY INSIGHT

Strengthening data quality helps brands better target and measure across a variety of shopping journeys.

# 13%

cost per result improvement with the Meta Pixel and Conversions API.<sup>1</sup>

# 19%

Additional attributed purchase events with the Meta Pixel and Conversions API.<sup>2</sup>

### RECOMMENDATIONS\*

Maximize data quality with the Conversions API.

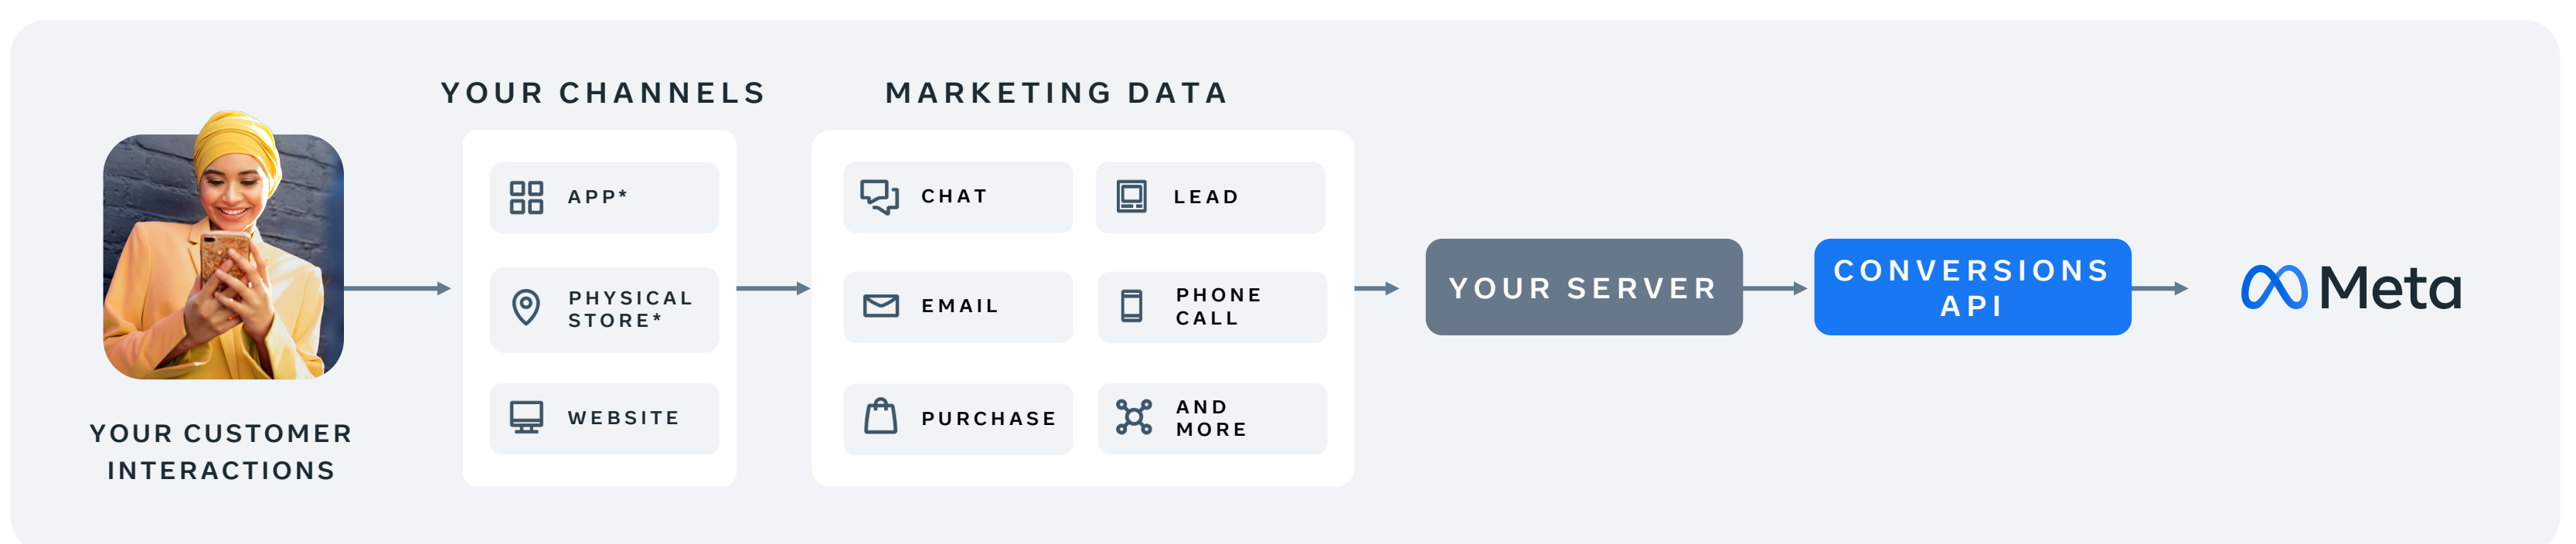

#### Get started with the Conversions API:

- Integrate directly
- Use the Conversions API Gateway
- Collaborate with a partner: Shopify, WooCommerce, Google Tag Manager

#### Optimize Conversions API setup

- Prioritize customer information parameters most likely to improve match quality (e.g. hashed email, IP address, hashed phone number).
- Combine the Conversions API with the Meta Pixel.
- Confirm you're not counting events from multiple data sources more than once.
- Ensure data freshness by minimizing the time between when the event occurred and when it is sent via the Conversions API.

### SUCCESS STORY

Tommy Hilfiger implemented the Conversions API alongside the Meta Pixel to more reliably share key web and offline events. They discovered this set up helped drive a 72% increase in online sales at a 2.9x return on ad spend.<sup>3</sup>

\*Best practice recommendations solely to help inform ad campaign strategies; not intended as a warranty or guarantee of results to be achieved. Marketing outcomes depend on a variety of factors and will vary.

Source: 1- Based on 28 global A/B experiments of direct, partner or Conversions API Gateway integrations between May to August 2022. 2- Based on analysis of >1K global large advertisers with direct, Conversions API Gateway or partner integrations (partner integrations only included if >1000 integrations exist) between 2022-01-01 and 2022-03-31 with criteria of at least 50 server and browser events, EMQ score > 5, server coverage of > 90% (but no higher than 300% to eliminate outliers). 3- Meta case study, Mar 2021. All results are self-reported and not identically repeatable. Generally expected individual results will differ.

## 5 Results validation

### KEY INSIGHT

Understanding the true impact of marketing helps inform more effective strategies.

# 47%

of marketing executives say that measuring and proving that what they do works is their biggest concern.<sup>1</sup>

### RECOMMENDATIONS\*

Better understand marketing impact by validating results with other measurement methods.

- ✓ Use conversion lift results to improve measurement accuracy across marketing channels.
- ✓ Leverage marketing mix modeling to validate the value of marketing.
- ✓ Utilize A/B testing to identify winning strategies and optimize campaigns.

What is the true value of my marketing?

Which media strategies maximize performance?

How do I allocate budget effectively?

### SUCCESS STORY

To shift budgets to the most efficient channels, personal care brand Lumē used conversion lift studies to calibrate their attribution and MMM models, increasing conversions by 2x.<sup>2</sup>

\*Best practice recommendations solely to help inform ad campaign strategies; not intended as a warranty or guarantee of results to be achieved. Marketing outcomes depend on a variety of factors and will vary.

Source: 1-Momentive "4 strategies to highly effective marketing". 2- Meta case study, Aug 2022. All results are self-reported and not identically repeatable. Generally expected individual results will differ.

PERFORMANCE 5 SCORECARD

= Excellent = Good = Fair = Poor

	Tactic	Goal	Status
Media	Account simplification	<20%	
	Automation	Test to find peak performance.	
Creative	Concept: Include diverse motivators and visual treatments.	Monitor new audiences reached.	
	Creative diversification	Test to find peak performance.	
Data	Implement the Conversions API alongside the Meta Pixel.	Y/N	
	Data quality	EMQ > 6 or “good” to “great”	
		Catalog match rate > 90%	
Measurement		1+ month, as needed	
	Validate results	Quarterly	
		As needed
