Interlink
Senior Services

OUR VISION:
Building the community we all want to age into

Interlink's vision is to facilitate the engagement of community volunteers, non-profit and government programs, foundations, faith communities, individual philanthropy, and partnerships with local business for the health and well-being of LC Valley seniors - building the community we all want to age into.

OUR MISSION:
Interlink's mission is to "link" seniors to volunteers, programs and community resources to live independent, safe, healthy, and socially rewarding lives.

OUR VALUES:
We believe that aging is a community responsibility and that Interlink can facilitate community "links" through partnerships with volunteers, programs, local governments, non-profits, faith communities, businesses and individuals on behalf of seniors.

We serve with compassion, kindness and empathy, to improve the quality of life for seniors in our communities.

We welcome and respect all seniors, believing in the dignity of every person regardless of income and to improve quality of life during every stage of aging.

We communicate regularly for transparency and accountability with seniors, volunteers, donors, partners and the community to keep them informed about the current needs and successes of Interlink's programs.

We adapt and creatively respond to the ever-changing needs of seniors by offering a wide range of programs, resources, and helpful information.

We manage our resources to accomplish our Vision and Mission with fiscal responsibility and accountability.
