

Humanity's Team 2024 Report

SACRED AWAKENING

The Awakening of a Conscious Humanity

NAVIGATING CHAOS

We live in a world where we consider ourselves as separate from everyone and everything around us.

We think of ourselves as the center of our own individual worlds, giving literal meaning to the word "self-centered."

We see this reflected in the way we treat each other, our resources, and the Earth itself. People tend to think in a short-term, immediate gratification mindset. They don't consider the future impact of their everyday actions. Instead of building things to last and reusing what we have already created, we have adopted a throw-away, one-time use mentality.

Ideologies divide us into the "right" and "left," the "haves" and "have-nots," "us" versus "them." Polarization has become normal in our politics, our belief systems and our everyday lives. War is rife all over the planet and the resulting upheaval causes mass displacement, food shortages, disease, and more.

We are suffering from an epidemic of loneliness because people don't connect face-to-face with each other. They have hundreds of friends online but no one they can reach out to or rely on to help them directly and in person. They are limited to a scroll through social media feeds which offers up unattainable ideals, unfair comparisons, and milestone celebrations honored using a preferred emoji or the like button.

Our "self-centered" world is full of fractures and it is breaking apart around us.

In the early 17th century, we thought the Earth was the center of the universe. And through Galileo, we learned the Earth was in a solar system revolving around the sun, not near the center of the Universe at all. And at the quantum level, we are deeply interconnected, an idea that is disrupting the spiritual and scientific worlds.

Yet this idea is not new. It has been woven into religion and philosophy for centuries. Today, breakthroughs in multiple scientific fields confirm this interconnected web of all life forms. The illusion of separateness, however, is one that we continue to perpetuate.

Which means we can also perpetuate the truth. That we are not the center of our own individual worlds. That we are not required to do and be everything, but each of us is called to do something.

We are all part of a greater
Whole. And that
interconnection, that
Oneness is a Holy
connection.

It's time to rebuild that world
into one where we are Whole
again.

Whole as individuals...

Whole as communities...

Whole as an
interconnected and
interdependent physical,
mental, and spiritual
ecosystem that grows and
thrives together...

As One.

FROM WHOLE TO HOLY

When we live into what is uniquely ours to do, we find the role we each have to play. Embracing this truth lets life fall into place in a profound way that balances us and finally allows us to be who and what we truly are. We experience that Holy connection of understanding and becoming part of that Whole.

This divine grace gives us the motivation and the desire to share this feeling with everyone. It inspires us to care for ourselves, our communities, and our environment in a whole new way, knowing that by doing so, every part of that Whole will reap the benefit and that benefit will feed back into the system at every level.

This is what we call conscious living. The idea that because we are all One, everything we do affects every part of the Whole at every level. When we live in this expanded way of being, our decisions, our choices, our entire existence is in service to that Whole, not just to ourselves. And when every part of that Whole serves in the same way, we truly are One.

This Whole is what we strive for at Humanity's Team.

While we recognize that we are currently in the minority, the more people who recognize their individual selves as part of this Whole, the more prevalent this idea becomes. And the faster the disparate of the many becomes One... Becomes Whole.

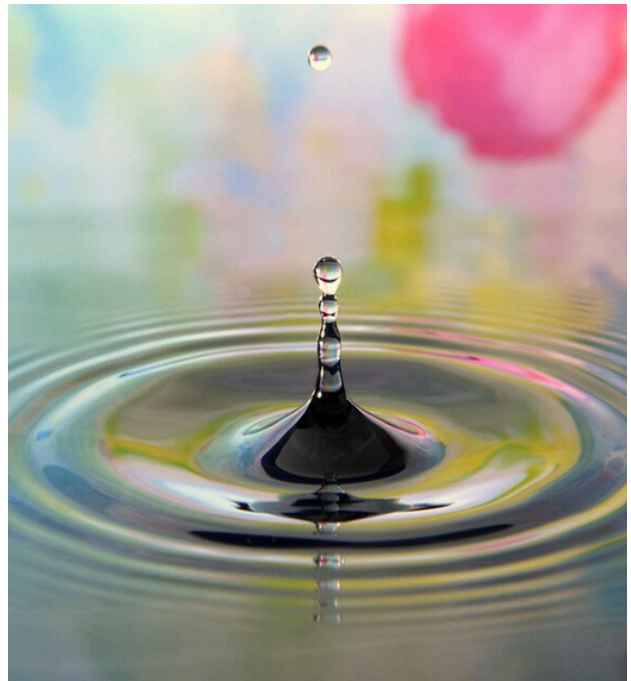

THE RIPPLE EFFECT

Just as a drop falling into water causes ripples to spread across the water's surface, our conscious living movement is causing ripples throughout humanity.

More and more people recognize that they are part of a larger Whole, even as they retain their unique mission and purpose.

Humanity's Team has started the ripple effect. The more people who join us, the more powerful those ripples become as they spread across the Earth, showing all who choose to ride the wave how to become part of the Whole.

The more people who model conscious living within their communities, the more people will join us. Gradually we will reach that tipping point where conscious living becomes the accepted way and everyone understands their unique and Holy place as part of the Whole. You are part of that Whole, drawing people to the movement of our ripples and encouraging them to recognize their own interconnectedness.

Thank you for being part of Humanity's Team. For living in your unique mission and purpose and being a ripple in your own community to reach out and help others join our wave of conscious living.

Welcome to being Whole.

OUR TEACHERS

Humanity's Team is home to over 150 faculty members who have created programs and masterclasses that are shared with the world on Humanity's Stream+. Hundreds of other teachers and luminaries have contributed their wisdom during our annual Global Oneness Summit and on the live programs, podcasts and blogs we host throughout the year. Our faculty and teachers come from all disciplines and all walks of life. They all share unique perspectives on Oneness and conscious living.

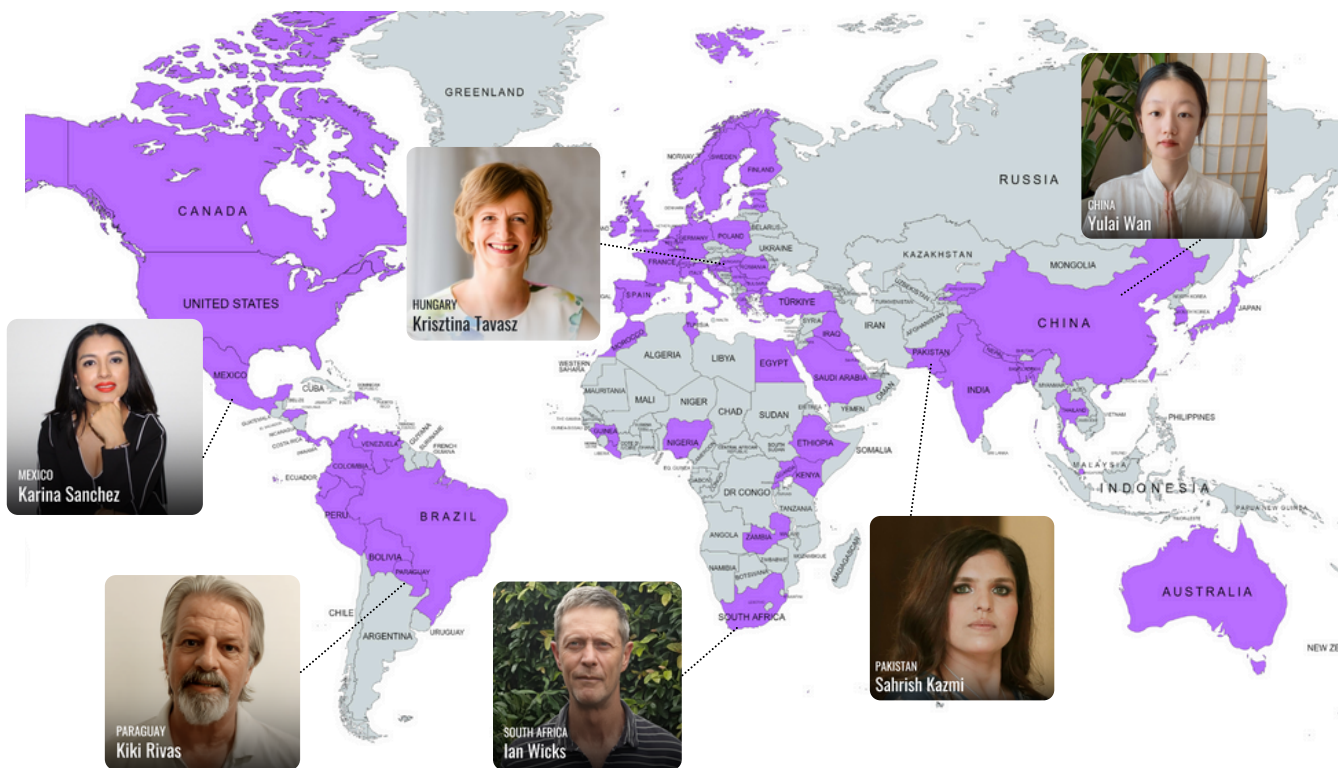

"Gregg Braden explores a fascinating premise — that there is a tangible, verifiable, and universal message planted firmly within the foundation of life, a message that may provide evidence for a higher intelligence operating behind the scenes of the phenomenal world that we all take so much for granted."

--Hank Wesselman

OUR COUNTRY COORDINATORS

Humanity's Team has 65 country coordinators located in every continent of the world except Antarctica. They are points of light spreading the word of Oneness in their spheres of influence.

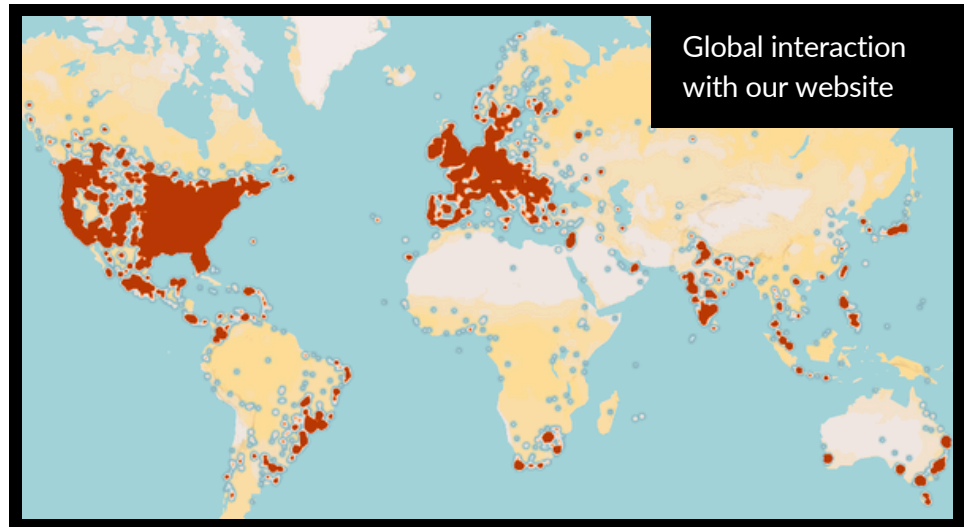

"The transformation I have experienced through Humanity's Team has been nothing short of miraculous. I have learned to cultivate a deep sense of compassion and empathy for myself and others, to see the interconnectedness of all beings, and to live from a place of love and authenticity."

– Olden Hamabibi, Zambia Country Coordinator

GLOBAL REACH...

Seekers on every continent of the world tune in to our annual summit and weekly live broadcasts. The orange dots on the map indicate viewers across the globe during a recent live event, captured via our website.

In our One-for-One Program, every paid subscription to Stream+ generates a *free* subscription that is given as a gift to an underserved, underprivileged individual somewhere in the world.

"I love Humanity Team's emphasis on the fact that we are all one. In my view, that realization is key to our ability to experience the natural state of contentment that is our birthright. But feeling as-one with the universe requires our emotional engagement with the people whom we are depending on to survive."

– Chet Shupe

GLOBAL PURPOSE & PLATFORM

Our mission is to educate humanity in the direction of evolution—toward greater kindness, goodness, and greater awareness of the interconnection of all things. We educate good people who want to become even better people. Our work is with those who are seeking to expand their own potential and bring ever-greater expressions of goodness, truth, and beauty to their sphere of influence.

Our community shares what they learn with their families, friends, and communities, to further a world where we all flourish.

At Humanity's Team, we believe that there is no way forward unless we work together. Over the last two decades, we have created one of the most robust platforms for the education of consciousness that exists today.

Humanity Stream+ makes available the work of hundreds of consciousness educators 24 hours a day, seven days a week to every corner of the globe.

We added 52 new video training courses in 2024, including seven Masterclasses created exclusively for Humanity Stream+.

Our subscribers on major platforms include:

- 645,000+ followers on Facebook
- 33,000+ subscribers on YouTube
- 400,000+ podcast downloads
- 677,000+ email subscribers

OUR MOVE FROM VIMEO TO USCREEN

When Humanity's Team started our transformational education library, we opted for Vimeo, a video sharing platform that allowed us to monetize our programs with the purpose of contributing toward our goal of making conscious living prevalent worldwide by the year 2040.

We have since outgrown Vimeo's capabilities and in 2024, we opted to move our entire Humanity Stream+ system over to a new streaming platform called Uscreen.

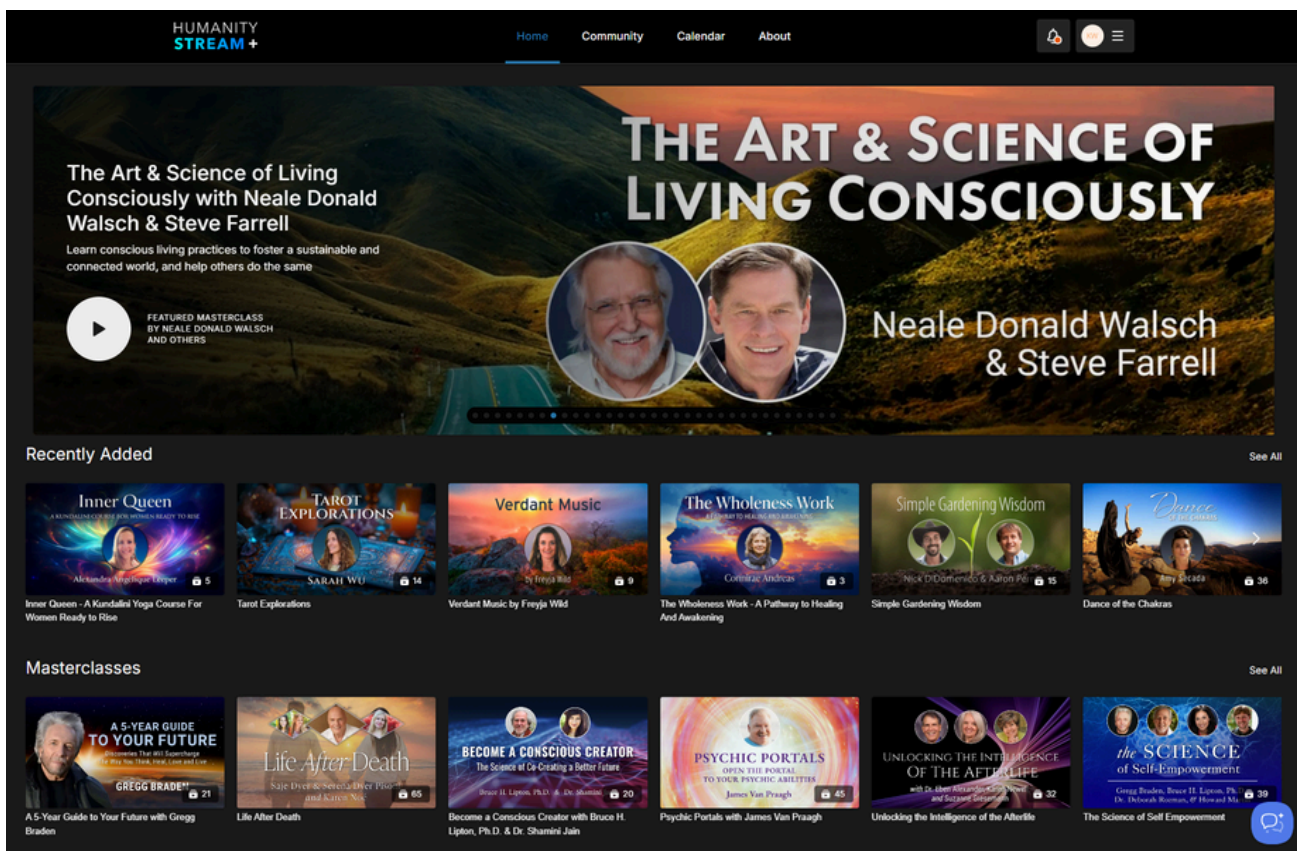

This process took us about 6 months from platform evaluation to "official launch" of the new platform. During that time, we got clarification on Uscreen's capabilities and how they would help us with this platform migration. We then undertook the process of moving our entire library to our new home.

On December 12th, 2024, we launched the new version of Humanity Stream+ on Uscreen.

During this time we:

- Moved 3,400 videos from Vimeo to Uscreen including:
 - 250 program collections
 - 32,000 subtitles
- Migrated 13,000 users including:
 - 10,700 one-time purchasers
 - 2,800 Humanity Stream+ subscribers
- Moved 800 affiliates to our new custom-built affiliate system

7 of our team members took on the bulk of the work and even now continue to finish up all of the lingering details as we adjust to this wonderful new platform.

Moving forward we plan to use Uscreen's tools to:

- Build a vibrant online community with Uscreen's interactive community tools.
- Create a step-by-step "Success Path" plan for members to follow, so they can explore everything Humanity Stream+ has to offer without getting overwhelmed by the amount of programming in our library.
- Continue to expand our transformational education offerings to enhance Humanity Stream+ and add new resources to that Success Path to keep our members engaged and actively expanding their horizons.

THE CROWN JEWEL OF OUR MISSION

We firmly believe that education and community are the best ways to support people on their conscious journey and to create the planetary awakening we know is necessary to bring about flourishing at every level of life and ensure we pass a sustainable planet to our kids and future generations.

That is why Humanity Stream+ exists and why we continue to add to what is already the largest library of transformational education programming available today. And why we host weekly live, interactive programs and sessions to encourage exploration of conscious living for those who participate.

Moving to Uscreen allows us to continue this part of our mission and to expand our offerings in a more interactive and proactive way, to help our members deepen their knowledge and become more conscious in the way they live in the world.

"Signed up as a [Stream+] member months ago and it's the best investment I've ever made. I never miss a talk, video, class, meditation, etc. and can listen anytime that suits my schedule daily. Thank you, Humanity's Team. It's an ideal program and platform. No need for TV with crises, dilemmas and conflicts that are featured regularly. Humanity's Team has solutions and answers."

– Sandie

OUR PROGRAMS

Humanity's Team produces new original masterclasses each year that cannot be found elsewhere.

In 2024, we collaborated with transformational teachers and creators around the globe to add a total of 52 programs to our Humanity Stream+ library, including 7 original masterclasses, and our platform hosts many live events each year.

"Humanity Stream+ is a wonderful learning platform that is very much oriented toward personal growth. This starts with the individual, this whole shift in consciousness for all of humanity. We are all one and we're learning that through the courses we actually contribute to all of creation with the work that we do on ourselves."

--Connie Baxter Marlow

GLOBAL ONENESS SUMMIT

The 2024 Annual Global Oneness Summit was a 6-day event comprised of 70 unique free panels from 144 speakers, educators, and entertainers.

The annual Summit is an opportunity for our global community of seekers to focus on the creative ways to elevate consciousness, transform lives, and create a better world where every living thing can flourish.

The 2024 Summit was attended by over 250,000 viewers tuning in from all over the world. There were 233,000 hits on our website during the summit, including 33,000 views on the Summit Viewing Room page.

The foundational mission of this year's Summit was to raise the collective vibration across the globe and catalyze action steps that everyone can use to be the change we need to see in the world.

"These panelists opened my eyes to the Spiritual State of the World - beyond our human concerns to the health of the whole wide world."

– Deborah Moldow

A GLOBAL MISSION WITH WORLDWIDE SUPPORT

HEARING THE CALL

Since its beginnings 22 years ago, thousands of people across the globe have shared their resources to sustain Humanity's Team and advance the mission of making conscious living prevalent worldwide. Our donors include many with limited means who make sacrificial gifts to our cause.

TRUE PUBLIC SUPPORT

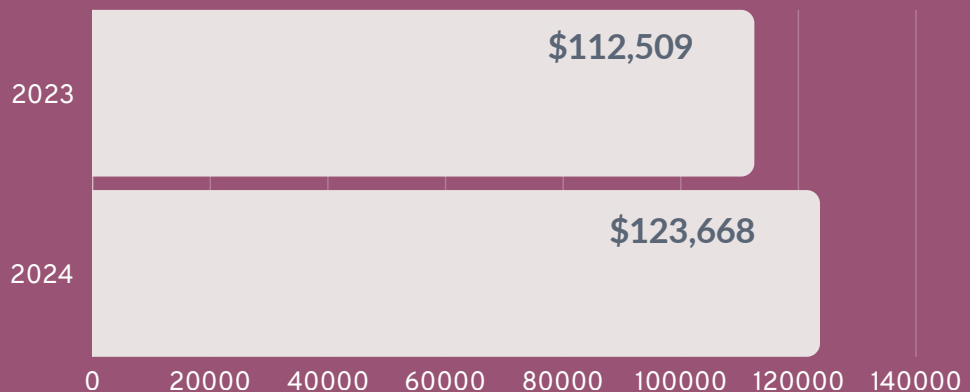

In 2024, 649 separate donors stepped forward to make contributions ranging from \$5 to \$250,000. We were supported by 101 donors who gave small sums monthly, and by 36 foundations and individuals who made gifts of \$1,000 or more. Five major donors made gifts of \$12,000-\$50,500, and two individuals sustained Humanity's team with legacy gifts of over \$100,000.

STABILITY

Humanity's Team experienced an overall monthly revenue increase from all sources, including it's Stream+ subscriptions, of nearly 10% in 2024.

STABLE OVERALL REVENUE GROWTH

AVERAGE
MONTHLY
REVENUE
(in dollars)

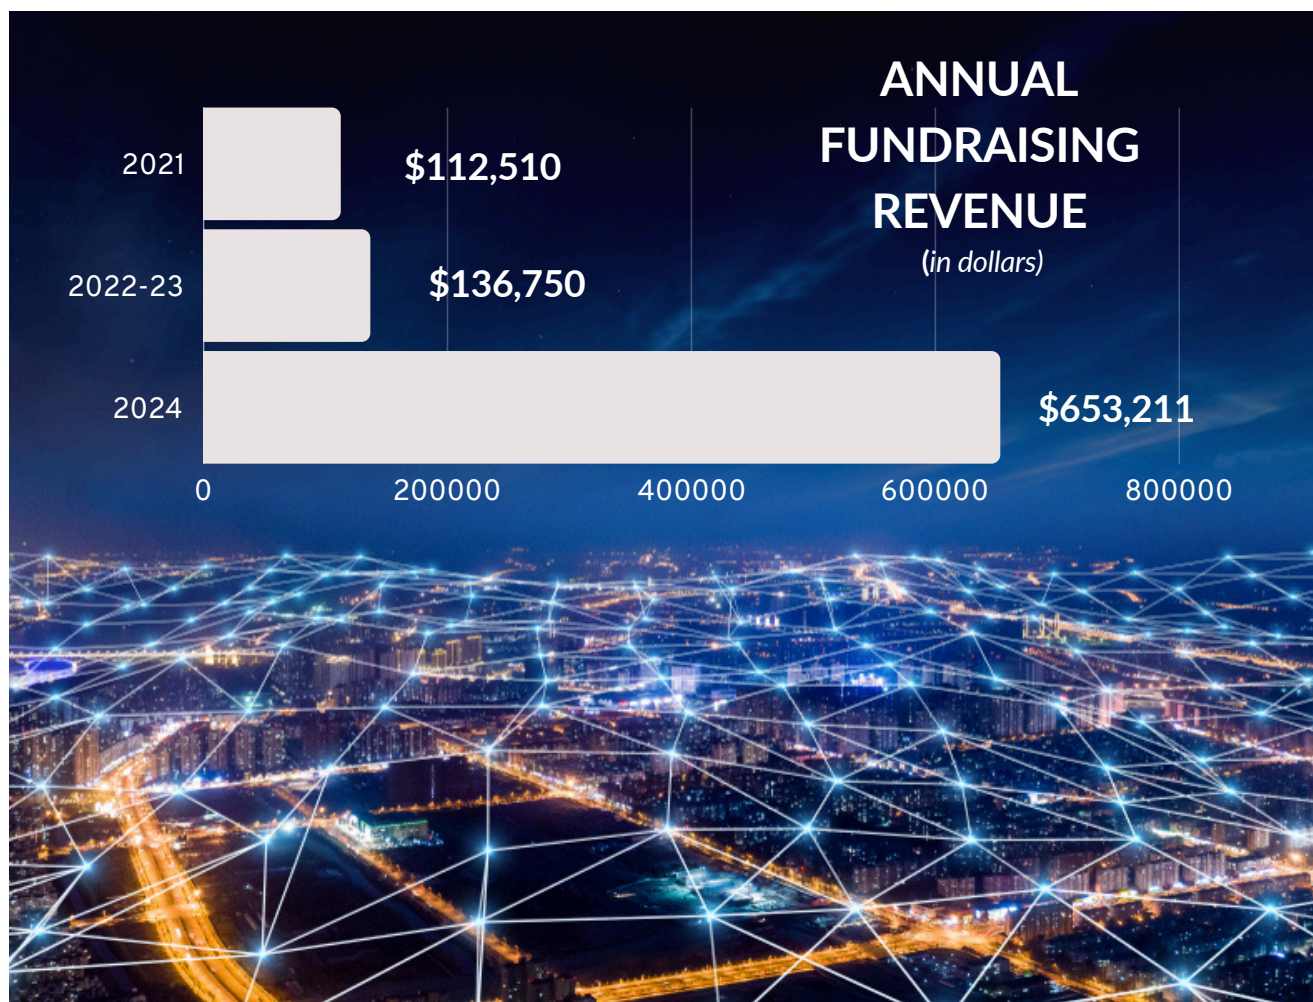

DONOR SUPPORT

In 2024, Humanity's Team launched a substantial effort to develop its donor base. These efforts were successful, resulting in donations of \$653,211 for the year. This amount represents more than a five-fold increase from 2023 support levels.

New funding has placed the organization on a sustainable financial footing. The generosity of donors has allowed us to substantially upgrade the platform that delivers transformational education worldwide, increase staff salaries, and to launch major initiatives including our Oneness Day initiative at the United Nations and our first in-person global gathering.

In 2024 donor support accounted for nearly 45% of our organization's total revenue.

WALKING TOGETHER IN ONENESS

Many believe that a planetary tipping point will be reached when 8-10% of humanity has evolved to a point where war, transactional mentalities, extractive mindsets, and the illusion of separation from the Divine and from each other have been overcome and are no longer daily realities. In today's population totals, this requires 800 million people to become conscious co-creators of Oneness on this Earth.

The destination seems far, but the commitment of even one soul devoting its life to service of higher powers resonates in eternity.

To put this in perspective, in *Power vs. Force*, David Hawkins shares that one person with a very high level of consciousness counter-balances 70 million others living in disharmony and chaos. Each such being is immensely powerful, and with many we can change the world. In 2022, Humanity's Team launched its Changing Humanity's Future Initiative to do our part in reaching the global tipping point. This initiative continues and is becoming a truer reality each day through the work of the dreamers and doers that are part of the Humanity's Team family.

As Ram Dass once said:
"We are all just walking each other home."

Together we can do this.

FOCUSED EXPANSION IN 2025 AND BEYOND

Humanity's Team launched three global initiatives in 2024, each of which is designed to reach, inform, and activate the millions of souls who will become part of our mission to raise consciousness worldwide.

Initiative 1: Expanding Global Access to Consciousness-Raising Education

This initiative builds upon our organization's current reach and strength. We now host the largest global streaming platform and library for consciousness-raising education. Our goal is to provide 100,000 people with access to this community library and learning environment. In 2025 and beyond, donor funds will be used to leverage the resources we have built. With your help we will raise global awareness of this resource, expand the team supporting our online platform, and enrich our library with content tailored to different regions and cultures offered in every major language in the world. As a mission-driven nonprofit organization, we have every incentive to make this resource freely available to those without the resources to become paid subscribers.

Initiative 2: Empowering Our Country Coordinators

Humanity's Team reaches out daily across the globe to inspire individuals to become conscious leaders in their families, communities, and nations. Sixty-five individuals have answered a call to raise consciousness on a national level. They have become Humanity's Team's country coordinators operating in 65 nations. All currently work as volunteers. With proper funding, we will provide these points of light with the resources they need to teach and coach, host public events, bring consciousness-raising programs into local schools and libraries, and attend our global in-person gatherings.

Initiative 3: Making Global Oneness Day an Official United Nations Event

We are collaborating with a team of talented leaders who are working with the United Nations to establish Global Oneness Day as an officially recognized UN event—similar to Earth Day and the International Day of Peace.

In 2010, Humanity's Team presented a Oneness Declaration with 52,000 signatures to the United Nations and requested the creation of Global Oneness Day. During our ceremony, we were invited to initiate Global Oneness Day ourselves and return to the U.N. when there was sufficient support and momentum. Now, 16 years later, our Global Oneness Day has evolved into a multi-day summit celebrated by tens of thousands worldwide. We have done what was asked of us and are now poised to create Global Oneness Day as part of the United Nations official event calendar. This day will recognize Oneness as a prime directive of the human family. Staffing, logistics, publicity, and funding for this program are urgent needs to create a day of Oneness that is celebrated throughout the world.

A Message From Our Co-Founder & Worldwide Executive Director, Steve Farrell

Living in the Whole and Holy

In my update last year, I wrote about the Galileo Moment. I shared that in the early 17th century, Galileo observed that the belief in Earth being at the center of the universe was a fiction. As we now know, Earth revolves around the sun within our solar system and is not at the center of the universe at all. Before this discovery, there was a fundamental misunderstanding of our place in the universe and ultimate reality.

Similarly, in today's world, we often place ourselves at the center of our personal universes—even though notable thinkers and scientists have shown that separation is an illusion. While our bodies appear distinct, at the quantum level, where we observe energy, we see that nothing is truly separate from anything else. We are deeply interconnected. In 1921, Albert Einstein famously stated that the greatest illusion in the world is the illusion of separation.

And yet, most of us continue to live as though we are separate—from one another, from the Earth, and from the source of all that exists, which some call the Divine and others call the Universe. We, along with many others, believe

this fiction is at the root of all dysfunction in today's world. When life becomes solely about "getting mine," we fragment ourselves from the world around us, feel isolated, treat the Earth as a mere warehouse, and even marginalize one another. Many people are numb to the pain of living this way, unaware of the underlying anxiety and feeling of victimhood that accompany this transactional style of existence.

Fortunately, there is a simple solution. When we begin to live in alignment with the deeply interconnected world that science and wisdom traditions tell us is real—when we embrace the whole and serve life around us—healing, health, and well-being naturally emerge. We become like a healthy blood cell within a thriving body, where the body itself is the world around us. As we open our hearts, joy follows.

While we cannot do everything, we are all called to do something. Through daily practice, we gain clarity on what is uniquely ours to do. Each of us has a different role to play, and when we embrace this truth, life falls into place in a profound way.

When we live in the whole, we experience a sense of the Holy. We come into right relationship with life and become an expression of Divine grace. On a soul level—and at all levels of consciousness—we know we are exactly where we are meant to be. This truth was not only embodied by Christ and Buddha but also by saints and sages throughout history who lived as radiant expressions of interconnectedness.

There is no single Galileo who can dismantle the fiction of separation that governs much of today's world. However, when 8-10% of us begin to live in the Whole and Holy, recognizing separation as an illusion, we reach a tipping point—one that transforms not only ourselves but also the collective and the planet. This shift is truly transformational. It creates a joyful, sustainable, and flourishing world.

This is the mission of Humanity's Team—to make conscious living prevalent worldwide by 2040.

Supporting the Vision

Humanity's Team is currently raising funds to support three crucial initiatives that advance our overall mission:

Expanding Global Access to Consciousness-Raising Education:

While we have already become the largest global streaming platform and library for consciousness-raising education, we aim to accelerate adoption worldwide. Our goal is to provide 100,000 people access to this global community and learning environment. Funds will help us raise awareness, expand our team, and enrich our library with content tailored to different regions and cultures.

Empowering Country Coordinators to Expand Impact:

We plan to provide financial support to our 65 country coordinators, who currently work as volunteers. With funding, they will be able to bring consciousness-raising programs into schools, libraries, and public events within their respective countries.

Securing Global Oneness Day as an Official United Nations Event:

We are collaborating with a team of talented leaders who work with the United Nations to establish Global Oneness Day as an officially recognized UN event—similar to Earth Day and the International Day of Peace.

In 2010, we presented a Oneness Declaration with 52,000 signatures to the United Nations, requesting the creation of Global Oneness Day. During our ceremony, we were invited to initiate this ourselves and return when there was sufficient support and momentum.

Now, 16 years later, Global Oneness Day has evolved into a multi-day summit celebrated by tens of thousands worldwide. We are funding an initiative to expand this movement further, ensuring that Global Oneness Day becomes part of the United Nations event calendar and is recognized by diverse audiences across the globe.

Each of these initiatives includes measurable outcomes that will guide Humanity's Team leadership and ensure donors can see the tangible impact of their contributions as we scale globally.

Join Us in Creating a Thriving Future

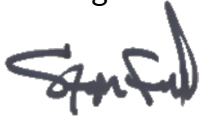

We believe our work is both important and urgent. If you share this belief, we invite you to support Humanity's Team.

As a 22-year-old 501(c)(3) nonprofit with a proven track record of leadership and execution, we are well-positioned to drive this transformation forward.

Your generous contribution will enable us to scale our impact at this crucial moment. If we succeed, we will help heal our current existential crisis and pass a thriving planet on to future generations.

Please give generously, as all of us in Humanity's Team—and many others—are doing now.

With gratitude and excitement for the future we are creating together,

Steve Farrell

We invite our donor partners to collaborate closely with us so they may gain first hand-insight into our progress and the transformational work we are doing.
