Drink Package *Calculator*

Is a drink package worth it for you? Estimate a typical day and compare.

ESTIMATE YOUR DRINKS FOR ONE DAY AT SEA

DRINK	HOW MANY	PRICE EACH	TOTAL
Cocktails			
Beer			
Wine by the glass			
Soda			
Specialty coffee			
Bottled water			
Mocktails or smoothies			
DAILY DRINK TOTAL			

PAYING AS YOU GO

Daily total _____ × 1.2

Most lines add an 18–20% service charge to each drink, so multiply your total by about 1.2.

= $ _____ per day

DRINK PACKAGE

Package price _____ × 1.2

The service charge usually applies to packages too.

= $ _____ per day

Before you decide

- [ ] On many lines, if one adult in your cabin buys a package, every adult must
- [ ] Some packages have a daily drink limit
- [ ] Port days count too, even when you're off the ship
- [ ] Packages are often cheaper when bought before you sail
- [ ] Ask whether your fare already includes drinks as a perk

If the package costs less than paying as you go, it's probably worth it. I'll check current package prices for your sailing.
