

## 4M x 2.5M fixed cutting table

Our cutting tables are made to suit standard glass stock sheet sizes, or the space available in the customers factory. This 4M long x 2.5M wide fixed cutting table has quality fire retardant felt and a timber edge to the table for ease of breakout. Winding levelers in each corner allow users to fix and adjust the table. One full length manually operated breaker bar assists with breakouts. The castors enable the users to reposition the table around the factory.
