

## 50 slot single glaze harp z-trolleys

These compliment the standard 50 slot single glaze harp trolley, and are suited to taller glass items. The plastic coated 8mm steel bars of the harp and top "Z" supports retain the glass items and reduce marking. The glass items sit in slots in the plastic base. The end frames of the trolley have Metalcraft non-marking inserted polymer to protect the ends sheets and minimize overall trolley width. The handles simplify movement of the trolley, and the rear lock down feet hold the trolley in position for safe loading.

- 1132mm wide, 1000mm deep, 1800mm tall
- 4 turning castors each rated for 460kgs
- Slots are 8.2mm wide to suit single glaze
- Options for 12mm slots
- Single horizontal row of "Z" bars
- Options for dual rows of "Z" bars
- Kitset construction for ease of shipping
- Harp separators can be colour coded
- Polymer on rear support and side supports to create soft bearing surface to reduce damage
- Welded construction
- Hot dip galvanised finish
- Options for z-harp trolleys for DGUs
- Designed and fabricated here in Australasia
