

50 slot single glaze harp trolley

This is the most common single glaze harp trolley. The plastic coated 8mm steel bars retain the glass items and reduce marking. The glass items sit in slots in the plastic base. The end frames of the trolley have Metalcraft non-marking inserted polymer to protect the ends sheets and minimize overall trolley width. The handles simplify movement of the trolley, and the rear lock down feet hold the trolley in position for safe loading.

- 1132mm wide, 1000mm deep, 1400mm tall
- 4 turning castors each rated for 460kgs
- Slots are 8.2mm wide to suit single glaze
- Kitset construction for ease of shipping
- Harp separators can be colour coded
- Polymer on rear support and side supports to create soft bearing surface to reduce damage
- Welded construction
- Hot dip galvanised or painted finish
- Options for z-harp trolleys (top supports) and for DGUs
- Designed and fabricated here in Australasia
- See www.theglassrackingcompany.com for other glass trolleys
