

700mm safety arms

These safety arms slide in and out with the load thickness, and are designed to retain glass on a range of our factory, site, and transport trolleys. The safety arms lock against the glass and/or window load while the trolley is moved around the factory. The design is simple and quick to load and unload. The non-marking polymer bearing surface on the arm matches that of the trolley to minimize damage.

- Shaped to fit against the glass and/or window load
- Fabricated in mild steel for strength
- Zinc plated finish so they can be seen
- Metalcraft non-marking polymer bearing surfaces, inserted with end caps
- Welded construction
- Easy to store when not in use (see photo of horizontal storage)
- Can be retrofitted to existing trolleys
- Designed and fabricated here in Australasia
- A simple to implement health and safety enhancement to any glass and window factory
- See www.theglassrackingcompany.com for more detail including online videos
