

## Finger trolleys

Finger trolleys are designed for laying glass items horizontal between processing stages. The bearing surfaces are clad in Metalcraft non-marking polymer inserts to protect the items. The rear of the trolley can also be clad in polymer to provide a soft bumper for units which are slid into the trolley. Quality 460kg rated castors ensure that the trolley is maneuverable.

- Dimensions are to suit the application
- Available as 2 verticals, or multiple verticals
- 2 fixed and 2 turning braked castors each rated for 460kgs
- Fingers are Metalcraft lipped steel section (low or tall depending on load requirements) with inserted non-marking polymer and plastic end caps
- Welded construction
- Painted finish
- Designed and fabricated here in Australasia
- See [www.theglassrackingcompany.com](http://www.theglassrackingcompany.com) for other glass trolleys
