

Glass Displays

Our glass displays are designed to show off the glass panels. The modular design means that the display can be changed and “freshened” overtime. The bolted design means that glass panes can be easily and quickly replaced. The powdercoated design provides a professional image. Options exist for the size and number of glass panes to be displayed.

- 1800mm tall
- 400mm wide x 300mm tall glass pane size
- Sizes can be made to suit
- Bolted design using decorative nickel plated dome nuts for professional appearance
- Diameter of the corner posts and design of the supports for the glass items can be tailored to suit
- Powdercoated finish
- Designed and fabricated here in Australasia
- See www.theglassrackingcompany.com for other glass display solutions
