

*"THE MOBILITY SCOOTER  
THAT DELIVERS MORE!"*

**X-TRAIL**

**LAND, ROAD OR PATH X-TRAIL IS READY!**

## **X**TRAIL the scooter you can trust for the rough and the smooth

**The team** at Churchill Chairs is warm and friendly. From your first contact with us to our advisors and service team, we all provide that good old-fashioned service, and coming from Yorkshire, we believe in being honest from the outset – no jargon, no hard sell, no empty promises. We say what we mean, you do what we say. Our prices are fair, quality is expected, and cutting corners simply isn't an option. Help is never far away!

**Every X-Trail** is built using top-grade materials and trusted components, all designed to deliver a smooth, comfortable, and genuinely enjoyable ride because cutting corners just isn't an option. When it comes down to it, the XTrail is a Brilliant scooter.

### **What about servicing and support?**

You're fully covered. Your X-Trail comes with a 2-year warranty. Our service engineers will come to you to complete your annual service. We do this onsite, and this is FREE as long as you own your XTrail.

**All in all**, everything about the X-Trail experience is designed around you – your comfort, your freedom, your enjoyment. From day one, it's about getting your independence back. Many owners say X-Trail has transformed their lives – opening up places they thought were no longer possible and giving them the confidence to go further again.

**The X-Trail** should be the first scooter you try!

To make life easy, we'll bring one to you (mainland UK only), so you can try and test it properly with no pressure or obligation.

- **FREE VIP GOLD CARD** (see page 7)

**REQUEST A FREE  
NO OBLIGATION  
DEMONSTRATION**

When choosing the right mobility scooter, a few key questions always come to mind.

**Will it take me where I want to go?** X-Trail was built for exactly that – and it does it well, in fact, it is one of the best in its class.

**Can I rely on it?** Absolutely. X-Trail has earned its reputation for reliability, with many owners switching from other scooters to the X-Trail for that very reason.

**Will it stand the test of time and be worth the investment?**

Our scooter knowledge goes way back to 1999, and in that time, we have learned a thing or two about mobility scooters. The X-Trail is one that will serve you well and is excellent value for money.

The X-Trail boasts some of the best technology, a Robust Waxoyled Chassis, Responsive Suspension, and a powerful motor. OKO gel-filled cross-country tyres and a modern design. Whilst this is our latest model, many of the early models are still going strong today.

## Off-road Capability

### Off-road capability

From day one, X-Trail has been built to help you get outdoors. Designed with off-road performance in mind, it takes you over the meadows and beyond, coping where other scooters fail.

With cross-country tyres fitted as standard, you'll feel safe, steady, and in control – free to relax and enjoy the great outdoors wherever you choose to explore.

### On-road Performance

Your X-Trail is road legal with **NO licence** required, so you have the freedom to travel further with ease, enjoying smoother, more direct routes without the obstacles of pavements. Built with safety in mind, the features include lights, indicators, and a horn, which lets you ride confidently while staying visible, all while maintaining your independence. Maximum speed 8 MPH

### Pavement Use

Your X-Trail can be used on pavements, supermarkets, and around shopping centres at a maximum speed of 4MPH, making everyday life easier and helping you stay active, keep your independence, and enjoy getting out and about.

## On-road Performance

## Pavement use

The X-Trail scooter comes standard with Waxoyl, which forms a moisture-resistant barrier over metal surfaces, mainly the chassis. This coating helps stop corrosion before it starts.

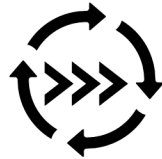

OKO is a liquid gel in your X-Trail tyres that automatically seals a puncture if one occurs, keeping air in and stopping a flat tyre instantly, giving you confidence and piece of mind.

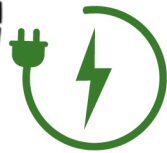

The X-Trail absorbs bumps and rough terrain, giving you a much smoother and more comfortable ride. The damper system then controls that movement, stopping bounce and keeping the scooter stable, safe, and easy to handle.

The X-Trail Disc brake provides strong, reliable stopping power and excellent control, even in wet or muddy conditions. Plus, the magneto brake automatically engages when you release the power for smooth stopping, and when the scooter is stationary, so roll-back is a thing of the past.

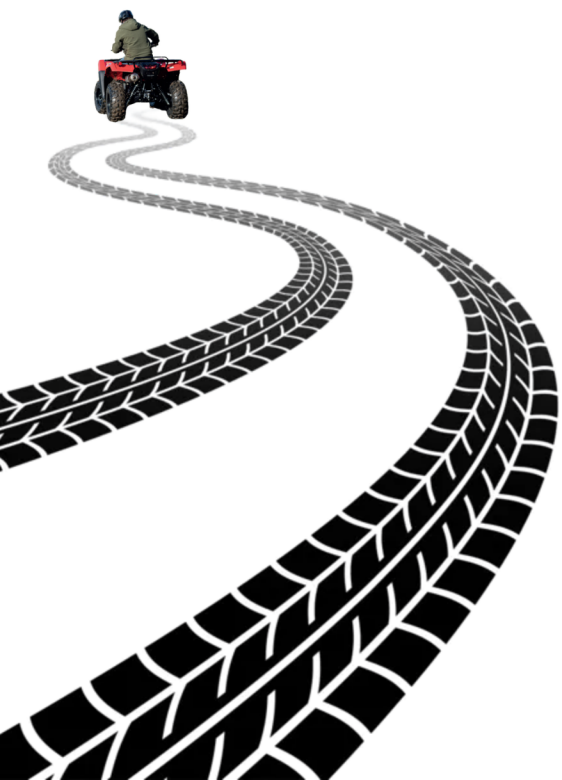

The X-Trail slide and swivel captain's seat makes it much easier to get on and off the scooter, while also letting you adjust your back position for comfort. The X-Trail high-resilience foam seat provides proper support, reduces pressure, and keeps you comfortable even on bumpy or on longer journeys.

The punchy X-Trail is powered by 2 X 50 Amp batteries and a powerful 800W 4-pole motor, giving you serious performance and the confidence to go further—up to 25 miles on a single charge, and an option to upgrade to 32 miles in maximum range.

**Remember**

Your X-Trail is a mobility scooter and not a quad bike or Land Rover.
