

**INDUSTRIAL  
BATTERY**

# **SIGNATURE SERIES**

## **SCHEDULED MAINTENANCE PROGRAM**

**INDUSTRIAL BATTERY SALES AND SERVICE HAS DEVELOPED A PREVENTATIVE MAINTENANCE PROGRAM WHICH IS DESIGNED TO MAINTAIN OPTIMUM OPERATING PERFORMANCE AND REDUCE OPERATING COSTS OF MOTIVE POWER EQUIPMENT.**

Industrial Battery knows how vital your batteries and chargers are to the daily demands of your business. Our signature series preventative maintenance program prolongs the life of your batteries and chargers, reduces downtime, and prevents costly emergency repairs from occurring.

**GAIN PRODUCTIVITY**

**EXTEND BATTERY LIFE**

**REDUCE COSTS**

# SCHEDULED MAINTENANCE PROGRAM

Proactively maintain your batteries and chargers with Industrial Battery's Signature Series Preventative Maintenance Program. We can help you determine the frequency of visits (Monthly, Quarterly, Semi annually or annually) needed based on the demands of your company and the size of your fleet of batteries and chargers.

## BATTERY PM

- 1 Battery cell voltages and electrolyte specific gravities are measured and recorded.
- 2 Inspect connector contacts for wear and pitting, connector housings are inspected for cracks and spring tension and all connecting devices are checked for signs of heat.
- 3 Inspect cables for damaged insulation, frayed copper conductor strands and signs of heat.
- 4 Inspect cell jars, jar seals and covers for cracking or other signs of wear and excess heat.
- 5 Inspect watering system
- 6 Provide written recommendations where further maintenance is required.

## CHARGER PM

- 1 Output rates are verified.
- 2 Charge curve settings verified
- 3 Inspect connector contacts for wear and pitting, connector housings are inspected for cracks and spring tension and all connecting devices are checked for signs of heat.
- 4 Inspect AC and DC Cables for damaged insulation, frayed copper conductor strands and signs of heat.
- 5 Inspect case and internal components of charger
- 6 Provide written recommendations where further maintenance is required.

## ON SITE BATTERY WASHING

Batteries are cleaned and acid neutralized with a green formula designed to be environmentally friendly. Once batteries are cleaned, all water and neutralized acid is removed from the wash site for proper EPA disposal.

- 1 Helps battery run more efficiently
  - 2 Eliminates employee exposure to dirt and acid buildup
  - 3 Eliminates grounds and shorts
  - 4 Eliminates harmful corrosion which may cause acid leaks and tray deterioration.
-
