

Naked resistors eliminate audio distortion

Precision resistors for high-end audio

With no encapsulation, no measurable signal distortion, and no inductance, Charcroft Audio Resistors (CAR) enable the highest fidelity in high-end audio applications.

- Industry's lowest current noise: -40dB
- Non-inductive & non-capacitive
- Naked radial or standard surface-mount packages
- Ultra-stable TCR:
 $\pm 0.2\text{ppm}/^{\circ}\text{C}$ from -55° to $+125^{\circ}\text{C}$
- Trimming to any value within resistance range
- Tolerance to $\pm 0.01\%$

Applications

- High-end amplifiers, pre-amplifiers & volume controls
- Speaker systems
- Home cinema
- Professional broadcast & AV
