

The search for perfection

Precision components for high-end audio

Specialist audio components help you to create the highest signal integrity through precise amplification, robust interference suppression and superior control.

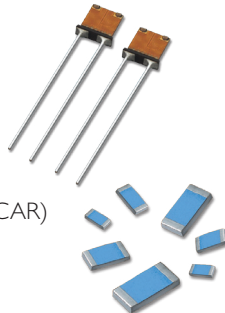

Amplify

Naked Z-Foil radial resistors (CAR)

- No encapsulation or measurable signal distortion
- Non-inductive & non-capacitive
- Trimming to any value within resistance range
- Tolerance to $\pm 0.01\%$

Ultra-high precision Z-Foil surface-mount resistors (SCAR)

- $+0.2\text{ppm}/^{\circ}\text{CTCR}$
- Tolerance down to $\pm 0.01\%$
- $< -40\text{dB}$ current noise

Suppress

Filtering T-Network Capacitor (ALN20S)

- Slit-foil technology
- Filters out signal resistance & inductance
- Long life: 18000 hours at 85°C
- IEC 60384-4 standard

Control

Panel pots for Pro-Audio

- High-end quality
- Longer rotational life
- Customised feel
- Broad selection
