

Industry-leading power density

High convection ratings

W/m³

New open-frame power supplies for industrial and medical applications

The new open-frame power supplies, from PowerOne and Charcroft, combine industry-leading power density with high convection ratings for low- to mid-power designs. Both series provide a wide universal 90-264Vac input with single or multiple output voltages.

Industrial-grade ABC series

- 40W to 400W output power
- High efficiency and high power density for minimal power loss
- Simplifies thermal management and energy-regulation compliance

Medical-grade MBC series

- 40W to 300W of output power
- 3rd edition medical approvals
- 2xMOPP isolation for class I and class 2 installations
- Active power factor correction (PFC)
- Single 12V, 24V or 48V output with high isolation and low leakage
- Efficiency exceeds 90% @ 230Vac in a small 3" x 5" package
