FAC CHIEF EXECUTIVE OUTLINES RECOVERY PLANS

The new chief executive of Farnborough Aerospace Consortium (FAC) has set out his vision for the trade body as it looks to help members recover post-Covid.

Alan Fisher is a 35-year veteran of the sector and has taken over from his long-standing predecessor David Barnes.

The group is one of the oldest aerospace and defence trade bodies in the UK and is centred in the South and South East where the heart of the industry is based.

Fisher said: "Our industry was one of the hardest hit by Covid but it shows the value of FAC that we actually increased our membership during the pandemic.

"As we emerge globally from the lockdowns and other restrictions our aim is to do our bit to ensure this region and country remains in a leading position.

"Our members include some of the largest companies in the sector, but most are small and medium size enterprises."

He added: "At our conference before Christmas, zero-carbon flight was something everyone was talking about and the technology to achieve this is what many businesses are working towards.

"We will continue to liaise with the government about its fly-zero strategy and fight for funding for our members and identify new funding streams. Delivering the government's aerospace and defence strategy is also something that we will be focusing on."

Fisher noted that air, manufacturing and technology shows and expos will be "important through the year", noting that the FAC will have a presence at them.

"Another focus will be forging new links with other trade bodies here and abroad, particularly in Europe and the US," he added. "Improved productivity and increased skills are things I particularly want to focus on, especially future skills that the sector and the country will require.

"Everything we aim to do will be built on the foundations of my predecessor David Barnes and we have a great team and are in a superb position to grow and add more value to our members."

*Remember : Together **Towards** Tomorrow*

Alan Fisher
Chief Executive Officer

FAC - Together **Towards** Tomorrow

Well January flew by, pun intended. Already we held our first event a virtual webinar with the Mid-Atlantic Space Port and NASA Virginia Space Sector, the event attended by Stephen Hartka - Vice President Research at the Virginia Secretary of Commerce and Trade, Major General US Air Force (Ret) Ted Mercer CEO of Virginia Space and the Director of NASA's Wallops Flight Facility David Pierce detailed opportunities for FAC members and other UK companies to supply too and trade with Virginia's growing space industry. There will be follow up meetings at the Farnborough Air Show and a potential mission to the State of Virginia in the Autumn.

Later this month we will be exhibiting at Southern Manufacturing, we still have a few spaces available should you want to join us, just contact the team [HERE](#) with your requirements.

We continue to be approached by new members and we are pleased to announce that [Cupio](#) and [Insensys](#) are our newest recruits, and I am sure you will join me in welcoming them to FAC.

Watch this space as we publish our events roadmap over the coming weeks, these will include a series of "In person" events, including company visits, light touch events, attendance at exhibitions where appropriate and our own annual conference. We always welcome suggestions for these events so if any member has an event, they would like to see us deliver please contact the membership team to discuss content.

Once international travel restrictions are lifted, FAC still plans to develop several missions to support our members export trade expectations. To deliver these FAC is already talking to the following: international aerospace, space, and defence organisations to organise events/missions and deliver opportunities for our members, the plan is to increase these discussions to other international bodies as FAC goes forward.

Finally, the membership team is always here and should you need any support or help in anyway, please do not hesitate to contact us direct.

If you wish to contact Alan Fisher, please email him [HERE](#)

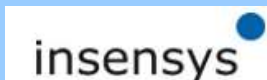

FAC continues to identify topics that are of interest, but if you have a particular topic you wish to be shared, please email kim.yeomans@fac.org.uk

Onwards and Upwards

Welcome to our new members

Understanding impacts Post Brexit and Covid on HMRC R&D Tax Credits

Do you understand the impacts Post Brexit and Covid on HMRC R&D Tax Credits?

They are locally funded by the UK and not by the EU, this has meant that:

- Bigger volume of HMRC reviews taking place in last 3 months
- Now a 100 additional R&D tax inspectors available
- That more companies received grants from Innovate UK and Covid support over last 2 years

With businesses across the globe struggling to adapt and survive in a coronavirus landscape, tax incentives continue to offer a way to boost cash reserves available to reinvest.

Research and development (R&D) tax relief and payable R&D tax credits are part of the government's strategy to encourage investment in innovation in the UK and HM Revenue and Customs (HMRC) continues to encourage businesses investing in UK based innovation to take advantage of this generous tax relief.

Despite the continuous need for innovation and bespoke solutions, there are two common assumptions made by companies: they do not undertake any qualifying R&D activities, and it is too difficult to make a successful claim. Companies in almost all sectors will undertake some qualifying R&D.

R&D claims could entitle businesses to significant tax relief, which results in either a reduction in the amount of corporate tax payable to HMRC and in some cases a significant cash repayment.

Join FAC and RandD UK to discover how you could benefit from specialist engineering and R&D tax advice to navigate through the changing seas and still maximize your reward from HMRC.

MEMBER SPOTLIGHT

WIND ENGINEERING & CONSULTANCY Based in Aldershot, Hampshire, we offer expert aircraft fleet and engineering consultancy. Our experienced team is ready to manage this process for you from detailed documents review to physical inspection of aircraft and deliver stress-free project managements for our customers.

Utilizing our background in the aviation industry, we are proud to work with clients worldwide to provide a range of services in the areas of:

- **Aircraft Delivery and Lease Transitions** – Since delivery and transition of aircraft is a time consuming and labour-intensive process, due to the broad technical and operational knowledge it has, Wind Engineering & Consultancy manage the whole process and offer expert consultancy services.
- **Aircraft Annual Technical Inspections and Audits** - Due to extensive airline and aircraft experience, Wind Engineering & Consultancy conducts Annual inspections on behalf of customers and leasing companies.
- **Fleet Engineering Consulting** - Wind Engineering & Consultancy offers expert fleet engineering advice and consults.
- **Documentation Services and Records Management** - Situated in the market as a Technical Records Expert, Wind Engineering & Consultancy provide customers with essential third-party records support such as scanning, review, on-line access.
- **Base Maintenance & Technical Management, Maintenance Cost Reduction Services** - Wind Engineering & Consultancy assist customers in achieving base maintenance requirements, their cost reduction objectives and cost containment goals with its services.

OUR LATEST PROJECTS:

- **May 2021 – B737-800 Sold to her New Canadian Owner**
We successfully completed transition project from USA to Canada. She was on ground for a while due to COVID-19 but when deal was closed with the new owner our team headed over to Blytheville, Arkansas, USA. They checked all storage records in time and successfully finished the audits of new owner and Civil Aviation Authority. Her new home is Canada now.

- **July 2021 – A320-214 Storage Checks and Tear Down Project**

While our team was out in Blytheville-Arkansas, A/C Leasing Company got in touch with us for their part out project. Comprehensive storage check controls, engine removals are completed on behalf of the owner in time. All records were prepared immaculately for Tear Down process. Parted out components are all over the world right now and still perfectly prepared historical documents are available for this A/C.

- **Aug 2021 – B737-8Q8 Transition from Lessor to New Operator**

We are happy to have completed another project under COVID-19 restrictions. While this plane was previously managed by different consultants, our team had to complete the project due to travel restrictions. Fortunately, with the positive approach and after long working days of all parties, we completed the project to the satisfaction of the new operator and aircraft owner.

- **Oct 2021 – A320-214 Lease Return to Aircraft Lessor**

We love working with Leasing Companies because we understand them very well. We provided remote document control support for their A/C return project. Project was in Riga, Latvia but again because of travel restrictions checks had been worked and finalized remotely. It was hard but eventually all parties were happy at the end of the project.

- **Jan 2022 – A330-202 Lease Return to Aircraft Lessor**

Our team is currently working on a A330-202 airplane records on behalf of Leasing company. Records are available for 15 years, so looks like it is going to be long project for both parties. When we finish this project, next operator will be happy to see this airplane off for its new passengers...

FAC wishes Sir Michael Ryan CBE congratulations on his new appointment

Sir Michael Ryan CBE, Vice President and General Manager of Spirit AeroSystems, Belfast, has been appointed as the Industry Chair of the Aerospace Growth Partnership

Sir Michael's appointment follows the retirement of Colin Smith CBE, who concluded his very successful 5-year term as the Chair of the partnership.

Colin Smith welcomes Sir Michael to the role: "It's been a privilege to lead the Aerospace Growth Partnership on behalf of the UK aerospace industry for the last five years, I've enjoyed working with the Government on many important issues such as the supply chain, skills and training and especially, the significant investment in technology through the Aerospace Technology Institute, needed for the decarbonisation of our sector. Sir Michael will do a fantastic job taking the AGP to its next phase and I wish him the best of luck."

On his appointment, Sir Michael Ryan said: "I'm delighted to have been asked to represent the UK aerospace industry as the industry Chair of the AGP. The future of our industry is a matter very close to my heart and I'm looking forward to continuing the work of Colin and the team on our Jet Zero future and maintaining our position as one of the leading aerospace nations in the world".

Sir Michael Ryan was born in Belfast in 1959. He graduated from Queen's University, Belfast in 1981 with an honours degree in aeronautical engineering, and joined Short Brothers the same year. Prior to and following Bombardier's acquisition of Shorts in 1989, he held various senior management positions, including in advanced composites production, fabrications and procurement.

In May 2000, he was appointed vice-president and general manager of Bombardier's Belfast operations, and in July 2017 became President of the Canadian corporation's aerostructures business. In 2020, he helped manage the Belfast operation's successful transition to the new ownership of Kansas-based Spirit AeroSystems.

He was awarded a CBE in the Queen's New Year Honours List in 2005, and in 2009 received an Honorary Doctorate from Queen's University Belfast for services to business and commerce, followed by an Honorary Doctorate in 2015 from Ulster University for service to business and corporate social responsibility. In 2021 he was knighted for his services to the economy.

Sir Michael is a Chartered Engineer and a Fellow of the Royal Aeronautical Society and the Royal Academy of Engineering.

Married with three children, he enjoys sports, reading and listening to music.

Do business with Canada – Aerospace briefings and B2B

ADS are delighted to be working with the Government of Canada's Trade Commissioner Service in supporting a Canadian Virtual Aerospace Mission to Europe and the UK.

Canada remains one of the world's largest aerospace markets and ranks first for the production of civil flight simulators, third in civil engine production, and fourth in civil aircraft production.

This Virtual Aerospace Mission to Europe offers you an excellent opportunity to familiarise yourself with the Canadian aerospace industry and to set-up one-to-one meetings with Canadian aerospace companies (free of charge). OEMs, technology companies, research organisations and supply chain companies are all welcome.

The Programme:

- 7 March 2022 (afternoon): view a series of webinars on Canada's aerospace industry including case examples on how international aerospace companies are doing business in Canada.
- 14 - 16 March 2022: UK companies meet with Canadian aerospace companies by using an online B2B platform (free of charge).

This is an excellent opportunity to map out the Canadian aerospace industry, and engage directly with Canadian companies to explore new business and partnership opportunities in the run up to physical meetings at Farnborough Air Show. ADS is supporting this event by presenting an overview of the UK industry and Net Zero ambitions to our Canadian partners on 10 March as part of the overall programme.

Register:

We encourage you to register for free [here](#) in order to access the full programme and to set-up your company profile for the B2B platform.

For a research project, I am urgently looking for someone with, or could write a
Large aircraft control law simulation, and Monitoring model.

Please contact: Peter Bishop on Tel 01794 341184 or email bishop.peter@bishop-gmbh.com

Enterprise M3 Bid Writing Support Service Launch

The bid writing support service is available to any EM3 based SME business thinking about applying for funding.

As a key part of the EM3 Growth Hub's business support offer, this service is fully-funded and is aimed at supporting high-potential/high-growth innovative businesses looking to apply for Innovate UK funding.

Applications are welcome from micro businesses and small to medium sized businesses based within the EM3 area .

The guiding principle for support is that applicants can demonstrate that the subject/focus of the bid will lead to increased productivity or growth of a business.

Watch this space - A cohort of Space-focussed Business Support Workshops (Online)

12pm-1.45pm, 9th February

The Surrey Hampshire Space Hub, led by Enterprise M3 LEP and Growth Hub, and supported by the South Coast Centre of Excellence in Satellite Applications, and the county councils of Surrey and Hampshire, is happy to announce the launch of a space-focussed cohort of business support workshops. Running from February to March 2022, the cohort will consist of three workshops (1hr 45m each) and is intended for all start-ups and SMEs operating within the space industry in Surrey and Hampshire.

[Register for the Watch this space event](#)

Free business support from the LEP

If you are a business in the Solent, why not get in touch with our team of expert business advisors for free, impartial, one to one business support?

The Solent LEP Growth Hub team has already helped thousands of local businesses, from those who are looking to expand, to those struggling with the economic challenges of the last couple of years.

As many businesses continue to feel the impact of Covid and with new customs controls for exports to the EU, the Solent LEP is ready to support local businesses, connecting them with the right guidance and advice.

[Find out more](#)

Are you a potential exporter?

Brexit has changed the way in which businesses think about importing and exporting both across the EU and to the rest of the world. You may already have international demand for your product or service, or perhaps you haven't explored the possibilities yet. With our Potential exporters programme you can maximise your export potential with free expert one to one support.

Through our Potential Exporters programme, we will provide the expertise to help you explore the possibilities or trading outside of the UK and develop a trade plan, which may require you to modify products and services for different markets.

[Listen](#) to our webinar we hosted last week to showcase the programme and the types of support you can access.

To find out more or to sign up to the programme click below.

Opening the door to Public Procurement

Here at the Solent LEP we're keen to support small and medium sized businesses in the Solent to put themselves in the best position when applying for public contracts. As a result we are bringing you a series of FREE and valuable Bid Writing workshops. Whether you have previous experience and knowledge or are completely new to the process,

these workshops will give you insight into what to look for and how to write when tendering for public sector contracts.

We have three workshops available: beginners, intermediate and advanced with each course split over two consecutive mornings.

Course are taking place on the following dates:

Beginners - 8 & 9 February 2022

Intermediate - 15 & 16 February 2022

Advanced - 22 & 23 February 2022

Launch of Help to Grow Digital

The Help to Grow: Digital scheme to support smaller businesses in adopting digital technologies opened for applications today.

Under the scheme, eligible businesses can receive discounts of up to £5,000 off the retail price of approved digital accounting and CRM software from leading technology suppliers. This software will assist them in effectively managing finances and building customer relationships, and help them to scale up.

Businesses can also access practical support and advice on how to choose the right digital technologies to boost their growth and productivity through a [new online platform](#).

We have put together a [toolkit to promote the scheme](#) – if you have any dealings with smaller businesses as part of your networks or supply chains, do please use the assets in the toolkit to encourage them to sign up.

Battery breakthrough achieves energy density necessary for electric planes

Lithium-air battery achieves more than double the density of Tesla batteries.

Aerospace, Research and Innovation Centre (ARIC) - New Product Development

RESEARCH, COLLABORATE, CREATE

Farnborough College of Technology (FCoT) are in discussions with an innovator who has started to develop a product which will assist towards greener technology of significant strategic and commercial value. He has created several large scale commercial companies and has a background in aviation and aircraft stress analysis. This product once researched and developed could reduce fuel consumption and emissions and be relevant across all industries particularly aviation and vehicle technology.

Using our Aerospace, Research and Innovation Centre as a safe space, we are looking for a working group to research, develop and bring this product to market as a business start-up. Agreements of how this might work can be agreed and written up, but we are looking for initial interest in this exciting opportunity. We are looking for creative capable experts in composites, able to think “out of the box” and work in a new team. Whilst, academic qualifications are helpful, we are looking for individuals and companies with drive (and ideally a legacy in innovation).

This innovation is potentially of great military and commercial strategic value so potential partners must sign a secrecy agreement.

If you are interested, please complete the very short [form](#) and we will come back to you.

Thank you

Women in Aviation & Aerospace Charter

The UK's aerospace and aviation sectors have come together to work towards gender equality in the industry through the Women in Aviation and Aerospace Charter.

Members of the Charter include aerospace manufacturers, airlines, airports, trade bodies and others. The Women in Aviation and Aerospace Charter reflects the aspiration of the industry to see gender balance across all levels.

FAC are proud to not only be signatories of this Charter from the beginning but, our Operations Manager Kim is part of the Charter's leadership.

What is the Charter?

- A commitment for organisations to support the progression of women into senior roles in the aviation and aerospace sectors by focusing on the executive pipeline and the mid-tier level;
- A recognition of the diversity of the sector and that organisations will have different starting points – each organisation should therefore set its own targets, where appropriate, and implement the right strategy for their organisation; and
- A requirement for organisations to publicly report on progress to deliver against any internal targets to support the transparency and accountability needed to drive change.

For more information or if you wish to become a signatory email kim.yeomans@fac.org.uk

The National Aerospace Technology Exploitation Programme (NATEP) is a government funded programme which aims to support innovative small companies working in the civil aerospace sector by providing research grants. The funding comes through ATI and Innovate UK manages the NATEP calls and the projects while they are running.

As well as providing the grants themselves, the programme employs Technology Managers (TMs) who provide free guidance to companies that wish to apply. The TMs are jointly managed by ADS and Farnborough Aerospace Consortium (FAC). The TMs at FAC are available to provide initial advice as to the suitability of project ideas and guidance when filling out the application form. They can also help with identifying potential project partners and the exploitation of the project results through our extensive network of contacts, both with smaller companies and with OEMs and Tier 1 suppliers.

If you are successful in your NATEP application, then the TMs will help with all the documentation and presentations that are required to fulfil your project. You will become part of the NATEP family and as such will benefit from exposure to further funding opportunities and encouraged to disseminate your project at NATEP arranged events and big engineering shows. Even if you are unsuccessful in your application, our feedback suggests you will still benefit from having a better understanding of your unique selling points and developing an improved strategy. The TMs can also point companies towards alternative sources of funding, if appropriate.

SME's - Do you need up to £150K to develop an innovative idea?!

- Do you have an idea that might improve a process, a technology, a supply chain?
- If you had funding could you introduce a change or an improvement to one of your existing products or processes?
- Do you have an idea to combine existing technologies into one product? . . .then NATEP could help!

Non FAC Events and Funding Opportunities

Digital Growth Funding Launched

**Government Funding Launched £2,000-£15,000 towards 2022 digital marketing projects.
- Apply Now**

[Get More Information About Digital Growth Funding](#)

The Digital Growth Programme is a £12.6m project part-funded by the European Regional Development Fund (ERDF) - 2022 Registration scheme is open!

The project can provide SMEs with access to grants of between £2,000 – £15,000 towards digital development projects.

Government Funding is now available for eligible small and medium sized businesses to develop their online presence and digital reach and thereby helping increase companies and brands overall performance competitiveness, productivity and profitability.

Funding can be used for:

- Digital Development Training / Consultancy
- Website Design (Wordpress)
- eCommerce (Shopify / Magento 2.0)
- App Development
- Digital Marketing
- Lead Generation
- Social Marketing
- Google Paid Search
- Search Engine Optimisation
- Email Marketing
- Content Writing
- Brochure Design & Print
- Dedicated Hosting
- Maintenance & Development

Funding is provided by the European Regional Development Fund and distributed by LEP's and Growth Hubs throughout the United Kingdom.

If you have a digital requirement cProgress can help you source funding that is becoming available in your area.

cProgress is a full circle digital marketing agency that can help you with all areas of Digital Design and Marketing to boost your business during 2022 and beyond.

Get funding, get digital, get busy ...

Emerging Skills units available to book now!

The Department for Education (DfE), through the High Value Manufacturing Catapult, is piloting a collaborative project to develop cutting edge learning materials for the delivery of Emerging Skills. The project focuses on four main areas:

- * Electrification for vehicles and transport solutions
- * Additive Manufacturing technologies
- * Industrial Digitisation Technologies (IDT) / Industry 4.0 for manufacturing
- * Composites – for environmental energy systems

We are pleased to let you know that many of the pilot courses are now available to book online through Eventbrite and we would be happy to hear of your interest and receive bookings. We will continue to update you as further units are scheduled.

Thank you for your interest and please be in touch with any questions on workforce@hvm.catapult.org.uk

PLEASE MAKE A NOTE IN YOUR DIARY

The BBGA Conference and AGM will take place on Thursday 10th March followed by the Golf Day on 11th March 2022 at Luton Hoo Hotel.

Bookings will be open soon so watch this space but, in the meantime, please put this date in your diary and let your colleagues know too.

We are looking for Sponsorship support so if you are interested, please do let me know. We look forward to seeing you all again.

Global Urban Air Summit

POSTPONED UNTIL 2022

With the current challenges posed by international travel, Farnborough International has made the difficult decision to postpone the upcoming Global Urban & Advanced Air Summit (GUAAS), originally taking place 7 and 8 September 2021, to Spring 2022.

The new dates for GUAAS will be announced very soon in the coming weeks, as we take the time to ensure that the new dates allow for all of our international stakeholders to gather together in person once again.

The 2022 Isle of Man Aviation Conference

“REGISTRATION OPENS SOON”

The 2022 Isle of Man Aviation Conference will be held on Wednesday 22nd June at the Villa Marina in Douglas, Isle of Man.
