# TPZ-COMKIT
*TPZ-Net Commissioning Kit*

## PC MINIMUM REQUIREMENTS

| Windows Software | Windows XP or newer |
|---|---|
| PC Processor | 400MHz (min)<br>1GHz (recommended) |
| RAM | 96MB (min)<br>256MB (recommended) |
| Hard Disk Space: | 280MB (32 bit)<br>610MB (64 bit) |

*Note: It is strongly recommended a site survey is carried out prior to installing a TPZ-Net system.*

Titan Products have designed bespoke PC commissioning software which enables easy set-up and commissioning of TPZ-Net wireless sensing networks.

The commissioning software allows for easy set-up of new networks and the ability to edit existing networks by adding, replacing or re-setting devices on the network.

Once a wireless network has been set-up and commissioned, the user can select individual end devices on the network to view the status and values being transmitted to the TPZ-Net Co-ordinator.

The software is supplied with a TPZ-Net commisioning USB dongle that plugs directly into a PC or laptop allowing the user to create or connect to a TPZ-Net Zigbee wireless network.

## KEY FEATURES

- Clear, easy to follow instructions to set-up new networks
- Add devices to existing networks quickly and effortlessly
- Edit networks by removing, replacing and re-setting devices
- View status of end sensing devices
- USB dongle allowing for easy access
