Job description

About Profectus Livestock Solutions:

Profectus Livestock Solutions, located in Worthington, MN, is a supplier of high-quality nutrition and animal health products to livestock producers across the upper Midwest. Our staff of veterinarians, nutritionists, livestock specialists and support staff partner with farmers and ranchers to solve problems on their operations by improving animal health, increasing performance, and improving profitability.

Join us as the Lead Beef Cattle Nutritionist

We are seeking a highly experienced and innovative Lead Beef Cattle Nutritionist to join our team at Profectus Livestock Solutions. In this pivotal role, you will utilize our innovative approach in formulating diets to enhance the health, growth, and productivity of beef cattle. You will collaborate with cross-functional teams to optimize feed formulations, improve performance, and drive sustainable practices for our customers. This is a remote position with locations within the Midwest.

Key Responsibilities

- Design and oversee comprehensive nutrition programs tailored to various stages of beef cattle production to maximize feed efficiency and growth rates.
- Conduct research and analysis to evaluate the nutritional components of feed ingredients and their impact on cattle health and productivity. Assist with generation of research ideas to help drive sales of nutrition services.
- Play a role in training of sales team and Community Builder /Sales Partners on formulation and other nutritional topics
- Provide expert guidance and training to farm management and staff on best practices in cattle nutrition and feeding protocols.

- Collaborate with our veterinarians and animal health professionals to ensure the well-being of cattle through a team approach.
- Lead the evaluation of emerging nutritional technologies and innovations to enhance product offerings and operational efficiencies.
- Present data and other information in a professional meeting setting for producers.
- Be a public representative of Profectus Livestock Solutions at local, regional, and national cattle industry events as needed.

Qualifications:

- Ph.D. or Master's degree in Animal Science, Animal Nutrition, or a related field.
- 5+ years of experience in beef cattle nutrition with a proven track record in developing and implementing successful nutrition programs.
- Strong analytical and problem-solving skills, with the ability to interpret complex data and research findings and apply them to on-farm scenarios.
- Excellent communication and leadership abilities to engage with diverse stakeholders.

Preferred Skills/Experience:

- Experience in a leadership role within the agricultural or livestock industry.
- Familiarity with precision feeding technologies and nutritional modeling software.
- Experience with Dalex formulation software and cattle feed software such as Performance Beef or Cattler.

Technical Skills:

- In-depth knowledge of beef cattle nutritional requirements and feeding practices.
- Proficiency in data analysis tools and software for nutritional evaluation and formulation.
- Experience with livestock management systems and database management.

Soft Skills and Cultural Fit:

- Strong interpersonal skills and the ability to work collaboratively in a team-oriented environment.
- Adaptability and resilience in a dynamic agricultural landscape.
- A proactive approach to continuous learning and professional development.
