

PLS SILAGE INOCULANT

Protect one of the biggest investments in your livestock operation with PLS Silage Inoculant. This inoculant helps lower the pH of your feedstuffs quickly, which improves the fermentation process of silage and leads to better preservation.

Increases dry matter retention, preserves nutrient quality, and prevents mold on piles

Preservation

Easy Storage

Designed to be stable at room temperature and does **not** require refrigeration

Contains a combination of Lactic Acid Bacteria and Enzymes

Lower pH

Directions

Apply:
1lb to 200 tons of silage
1lb to 150 tons of Haylage
1lb to 100 tons of High Moisture Corn
