

Ai Short Film Competition 2025 (Theme: Singapore River)

To celebrate Singapore's 60th anniversary, we warmly invite your members to participate in SG60: Ai Short Film Competition 2025. This year's theme is "The Singapore River" — a symbolic cradle of our nation's history, memories, and cultural roots. We encourage participants to use Artificial Intelligence (Ai) technology, combined with local language or Singlish storytelling, to create a 3 to 9-minute short film that captures local stories and traditional sentiments.

This is not only an innovative way to preserve our heritage, but also a meaningful opportunity for younger members to engage with and deepen their understanding of local traditions. The competition offers attractive prizes, and includes courses and workshops led by experts in film and Ai, equipping members with practical Ai filmmaking skills and nurturing future creators within your associations.

Participation options:

- ◆ Join: Competition entry only
(use your own Ai video creation tools — ideal for those with prior experience)
- ◆ Core: Competition entry + Dzine Ai video creation platform
(includes 4-month subscription — perfect for beginners)
- ◆ Pro: Paid workshops led by film and Ai experts (optional)

Let's capture memories through film and share culture through technology!
