Starlink Roaming? Check out SatData

Starlink, 4G/5G and a battery in one rugged, portable unit. If the satellite signal drops under trees or between buildings, 4G/5G takes over.

Starlink Mini or Performance | **4G/5G multi-network** | **Bonding** | **Built-in battery**

SPEED
400+ Mbit/s
download for business users

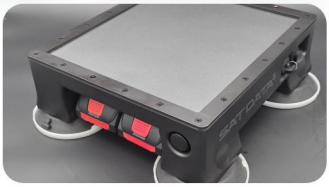

START-UP
30 sec.
switch on and connected

ON THE MOVE
In motion
in vehicles and on the water

COMPARISON

Starlink Roam or SatData: what is the difference?

Starlink Roam is the Starlink plan for travelling. SatData works with Starlink and adds 4G/5G, a router, power and a rugged housing.

	STARLINK ROAM ONLY	SATDATA WITH STARLINK
Satellite	Starlink	Starlink Mini or Performance Gen 3
Mobile 4G/5G	no	yes, several networks
Under trees or between buildings	connection drops	4G/5G takes over
Bonding	no	standard on Fusion, optional on other models
Own power	mains or separate battery needed	built-in LiFePO4 or swappable Bosch ProCORE battery
In motion	up to 160 km/h in permitted areas	yes, with magnetic base or SeaSucker vacuum mounts
At sea	inland waters and up to 12 nautical miles offshore	open sea with Global Priority
Security	standard	Zero Trust SIM from Zscaler or Stacuity available
Rugged	separate dish and cables	all in one housing, Vanguard IP67 and IP69K

Starlink details according to the Starlink Help Center (starlink.com/support). Starlink is a trademark of SpaceX. SatData is an independent product and not a SpaceX product.

1

Switch on

No mounting and no installation time.

2

30 seconds

SatData connects automatically.

3

Online

Your team simply works over Wi-Fi.

SIX MODELS

Choose your SatData

One base: Starlink and LTE/5G in a rugged, portable unit. We configure every unit around your application.

COMPACT AND COMPLETE

SatData PortLink

- Starlink Mini
- LTE/5G multi-network and Wi-Fi
- Built-in 10 Ah battery

ROUTER OF YOUR CHOICE

SatData Core

- Starlink Mini
- Teltonika, Peplink or Celerway
- Swappable Bosch ProCORE batteries

LONG WITHOUT POWER

SatData Nexus

- Starlink Mini and LTE/5G
- LiFePO4 battery, 10 or 20 Ah
- Bonding optional

BONDING AS STANDARD

SatData Fusion

- Starlink and LTE/5G as one link
- Peplink, Teltonika or Celerway
- For live streams and video

HIGH SECURITY

SatData SecureLink

- Encrypted LTE/5G
- Zero Trust from Zscaler or Stacuity
- Starlink Mini or Performance

HARSH CONDITIONS

SatData Vanguard

- IP67 and IP69K, hose-down
- Hot-swap Bosch ProCORE batteries
- For defence and emergency services

OPTION

Static IPv4 and VPN

Remote management and cameras.

OPTION

Mounting

Magnetic base or SeaSucker vacuum mounts.

CHOICE

Your own router

Cradlepoint/Ericsson also possible.

All SatData models are patented. Speed according to SatData; actual speed depends on location and plan.

MARITIME · PATENT PENDING

SatData Radome: Starlink on board

SatData Radome houses your Starlink in a sleek white dome, always with a 5G router for coastal waters.

Features

- From 45 cm with Starlink Mini to 90 cm with Performance Gen 3
- Mechanically stabilised, not electric
- Round up to 30 degrees tilt, flat 12 to 15 degrees
- Protected against wind, salt water and sun
- Matches the domes on board
- Intermediate sizes on request

COAST

Starlink Roam

Inland and territorial waters up to 12 nautical miles.

OPEN SEA

Starlink Global Priority

Worldwide on land and at sea.

SatData Radome is an in-house SatData design. Patent pending.

SOLUTIONS AND APPLICATIONS

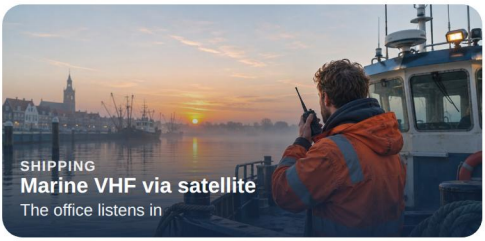

Where do you use SatData?

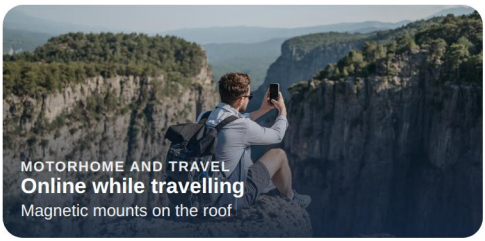

Voice, data and video via satellite and 4G/5G. On the road, on location and on the water, even when the local network fails.

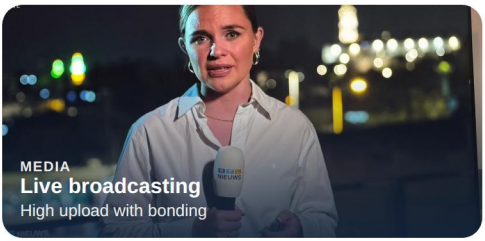

TELEVISION

René Lunshof Producties

Uses SatData for live broadcasts for RTL Nieuws, among others.

DRONES

High Eye

SatData connects both the drones and the ground station: commands, telemetry and video.

SatData complements systems such as C2000 and channel 16 and does not replace them.

PLAN AND SIM CARD

Which Starlink plan suits you?

We advise on the plan that fits your use and arrange it for you, together with the unit and the SIM card.

PLAN	WHERE	IN MOTION	ON THE WATER
Roam 100 GB	home country or the European region	yes, up to 160 km/h	inland waters, up to 12 nm
Roam Unlimited	Europe, outside Europe max. 30 days at a time	yes, up to 160 km/h	inland waters, up to 12 nm
Local Priority	land, including lakes and rivers	yes, up to 160 km/h	not at sea
Global Priority	worldwide	yes	open sea too

With Roam 100 GB you continue at low speed after the allowance. Local Priority: from 1 December 2026 a maximum of 30 consecutive days outside the home country. Source: Starlink Help Center.

SIM CARD OR ESIM

The 4G/5G SIM card included

- Plenty of data, on several networks
- Also in other European countries
- Static public IPv4 address available
