

ODOR WASH

Concentrated odor remover for waste container washing

Product identification

Commercial name:	ODOR WASH
Physical state:	Powder
pH, ready-to-use solution:	7
Solubility:	Completely soluble in water
Intended use:	Industrial and professional use
Application:	Neutralizing formulation for washing urban waste containers using container washing trucks
CAM compliance:	Compliant with Minimum Environmental Criteria

Description

Soluble powder formulation designed for washing and odor control in urban waste containers using container washing trucks. The product combines cleaning action and odor control, helping to remove organic residues, counteract conditions that may favor microbial proliferation, and reduce the formation of bad odors over time. Its prolonged action helps improve the hygienic condition of treated surfaces.

- Neutralizes persistent odors with a long-lasting effect
- Helps reduce conditions favorable to bacterial proliferation
- Safe for operators and the environment
- Compatible with automated washing systems
- Does not generate excessive foam
- No-rinse application
- The single-dose format optimizes the quantities used and prevents overdosing

Fields of application

Designed for hygienizing and odor control through the automated washing of waste containers using equipped container washing trucks.

Handling and safety

Do not handle with wet hands or wet gloves. Store the product in a dry place, away from heat sources and direct sunlight. Keep the product in its original packaging. Read the safety data sheet carefully before use. Do not leave the product in contact with aluminium, brass or light alloys for more than 10 minutes.

Composition: mixture of oxygen-based active components, surfactants, formulation auxiliaries and fragrance.

Shelf Life: 5 years when properly stored in solid form.

Correct dilution

Water-soluble single-dose bags: 1 kg to be diluted in 1,200 L of water ($\approx 0.083\%$).

For any customized formats, the product must be used in accordance with the technical instructions provided.

Instructions for use

Complete washing of waste containers:

1. Prepare the solution in the tank
2. Wash using a container washing truck

Operations must be carried out in compliance with current regulations.

Use and compatibility

- Does not generate toxic or persistent by-products
- Non-flammable
- High biodegradability of components
