

Performance & Safety Service

Have peace of mind knowing what parts need to be replaced BEFORE you go into the field. It's a fact: breakdowns in season create more downtime, yield loss, and increased repair costs... so why wait? Best of all - use your John Deere Financial plan, for payments that fit you!

Commercial Sprayer Post Season Program

Complete John Deere Performax 170 point inspection for Self-Propelled Sprayers includes:

- Engine: check fluid levels, filters, head gasket, belts, pulleys
- Check Cooling System: radiator, fluid levels, water pump, thermostats
- Inspect Fuel System
- Inspect Electrical System: battery, starter, sensors, wiring, block heater
- Check Hydraulic & Hydrostatic system
- Check Boom system, functions, valves & cylinders, tracking system & sensors
- Lubricate Boom & Driveshaft u-joints
- Inspect Solution System & perform nozzle flow check test
- Inspect Foam Marker System & perform system check
- Inspect Complete Chassis & Operators Station
- Check AMS Components if equipped
- Test safety systems and operator controls
- ...many more Performax services!
