

Australian Senepol Cattle Breeders Association Launches BreedLOGIC Database Search

We are pleased to announce that Australian Senepol Cattle Breeders Association is transitioning to **BreedLOGIC Database Search**, ABRI's next-generation online database search platform, with access expected to be available from Tuesday the 6th of October 2026.

BreedLOGIC Database Search provides a powerful and intuitive way to search and explore breed society information, including animals, pedigrees, members, sales information and genetic evaluation data. Developed by ABRI to support breed societies, breeders and industry participants, the platform has been designed to make it easier to find, view and analyse the information that matters most to users.

Transition Period

From the planned launch date of the 6th of October 2026, users will be able to access and use BreedLOGIC Database Search while Internet Solutions remains available.

BreedLOGIC Database Search can be accessed via a banner link within Internet Solutions.

This transition period provides an opportunity to become familiar with the new platform and explore its features ahead of the full launch. We encourage you to begin using BreedLOGIC Database Search and create a free account during this period.

Full Launch planned for 21st of October 2026

On the 21st of October 2026, BreedLOGIC Database Search will become the primary platform for accessing breed society information and services.

From this date:

- Links that currently direct users to Internet Solutions will automatically redirect to BreedLOGIC Database Search.
- BreedLOGIC Database Search will become the primary access point for breed society information, animal records, pedigrees and search services.
- Internet Solutions will no longer be available as a standalone search platform.
- Online data entry will remain within Internet Solutions and will be accessible through BreedLOGIC Database Search.

If you use Online Transactions, you will need to link your BreedLOGIC and Internet Solutions accounts. We strongly encourage you to complete this process during the transition period to ensure uninterrupted access following the full launch.

How to Access BreedLOGIC Database Search

From 6th of October 2026 BreedLOGIC Database Search can be accessed via the banner link displayed within Internet Solutions.

Following the full launch on 21st of October 2026 existing Internet Solutions links will automatically redirect users to BreedLOGIC Database Search.

Create a Free BreedLOGIC Account

While a limited number of searches can be done without signing in, creating a free BreedLOGIC account provides unlimited searching and access to additional features, including saved preferences and personalised display settings.

Members who use Online Transactions should link their BreedLOGIC and Internet Solutions accounts during the transition period. This will ensure uninterrupted access following the full launch.

Prepare for the Full Launch

To ensure a smooth transition to BreedLOGIC Database Search, we encourage you to complete the following steps during the transition period:

- ✓ Access BreedLOGIC Database Search using the banner link within Internet Solutions.
- ✓ Create your free BreedLOGIC account.
- ✓ Familiarise yourself with the platform.
- ✓ Link your BreedLOGIC and Internet Solutions accounts if you use Online Transactions.
- ✓ Review the available support resources, including the Knowledge Base and *Using BreedLOGIC Database Search* booklet.
- ✓ Complete these steps before the 21st of October 2026 to ensure you're ready for the full launch.

Help and Support

To help you get started, a range of support resources has been prepared.

The [Breed LOGIC Knowledge Base](#) is the central repository for BreedLOGIC Database Search help and support resources. Accessible via the Support & Resources section within the platform, the Knowledge Base contains user guides, FAQs, instructional videos and a downloadable booklet, with additional content being added over time.

The [Using BreedLOGIC Database Search booklet](#) is a great place to begin, bringing together key user guides and support information in a single document.

We Encourage You to Explore

We encourage everyone to explore BreedLOGIC Database Search during the transition period and become familiar with its features ahead of the full launch.

Australian Senepol Cattle Breeders Association and ABRI look forward to supporting you all through this transition process.

Trudi Brown
