

Minnie-Vale Charolais

ESTABLISHED 1972

54 Years

23rd Annual Bull Sale

Thursday 30th July 2026 - 1.00pm
"Bexley" Back Creek Rd., Narrabri NSW

Videos available from 15th July on all bulls at
www.minnievalecharolais.com.au and Auctions Plus

Why Minnie-Vale Bulls are an **Important Investment!**

- Semen Tested
- Predictably Even
- Performance Recorded Herd
- J BAS 7 Herd Status

- Scanned EMA, IMFs
- Pestivirus tested
- Guaranteed Bulls
- 54 years experience

LOT 7 V5E (P)

LOT 2 V20E (PP)

LOT 3 V12E (PP)

Minnie-Vale Charolais

WELCOME TO THE 2026 ANNUAL BULL SALE

Jason and Sue extend a very warm welcome to everyone attending this year's 2026 Annual Bull Sale at Bexley. We also extend a warm welcome to clients who may be participating in the sale via AuctionsPlus.

The season this year has been dry in North West NSW. However, June has seen a welcome change with good falls of rain over some of these areas. A real positive has been a consistent stable to strong cattle market through this period. The cattle market is currently buoyant with a very positive outlook going forward into the near future.

There are five sires represented in this year's catalogue, they include notables including Venturon Raise the Bar, Glenlea QBrick, Rosedale Raphael (RF) and new sires Rangan Supertramp and ANC Superstition.

This year we have an offering of 43 bulls for your selection. We have slowly shifted our breeding program in the last 12 or so years to the majority of polled cattle with an emphasis on maintaining moderately framed Charolais bulls with good temperament, sound structure, standing on good bone while retaining the carcass traits the breed is renowned for, particularly in crossbreeding programs. We hope you agree that these bulls, from lot 1 to 43, are extremely even and reflect that extra doing ability which is sought after in all cattle breeding programs.

Those who are not able to attend the sale will be able to bid online on AuctionsPlus. Those people wishing to do this please become familiar with the steps required to use this system. A page of instructions are in the early part of this catalogue and please don't hesitate to contact AuctionsPlus by telephone if you require assistance, they are very helpful.

Jas and Sue would like to thank so many clients who have supported this sale over so many years. It's because of this support that we strive to produce the product you see here today. Many thanks to our regular helpers, Lyn, Matt Hann, Casey and Nigel, Tom, Jessie & Simon Groth. Also the Charolais Office, our designer Lucy Main, our printer Paul McMahon and our agents for the sale Davidson and Cameron, Gunnedah, Narrabri, Quirindi, Scone and Hunter Region, Walcha and Coonabarrabran.

It is strongly recommended that insurance be taken out before transit and maybe the first joining season. It is also advisable to have some stock on hand in the yard to settle the new bull, only because these fellows have all run together in big groups.

Our stock carry our breeding guarantee so please feel confident with your selection. If you would like an inspection prior to the sale please contact Jas who will be happy to spend time with you and take you over the bulls, or ring and he can discuss the catalogue with you.

The cattle can be inspected from 10am on sale day. Refreshments and lunch will be provided by the Bingara Lions Club.

Regards,

Jas & Sue

History

1972 - 2026

Our breeding up of the Minnie-Vale herd started in 1972 on a property called Mistletoe at Singleton. We had two properties there and it was here 15 young Friesian yearling females were purchased as the foundation of our breeding up program. It took many years and the stud was actually called Mistletoe with a prefix of DGS. We then moved, cattle and all, to the property Minnie-Vale at Denman, thus the stud name was changed to Minnie-Vale and the prefix became SGS.

At Singleton we were greatly influenced by our dear neighbours, Col & Joan Vickers, Glendyr Charolais, we admired their cattle so much and they were our guiding light. The other two people and great friends were Bruce and Lane Kerswell, their stud was Black Mountain Charolais, Scone, and from here on, we became so involved in the Charolais breed, promotion and trying to find the market we needed for the breed as a terminal sire in a very tough one. Cross breeding was in its infancy and we were part of it, not easy!

We formed a group with Bruce and Lane, Col and Joan, Doug and I and Col Kelly, the Hunter and New England Group. We went to all the field days all over the place promoting this wonderful breed. This group was the foundation of the Northern Breeders Group whose success was extraordinary. Doug was Chairman and also Chairman of the NSW Region on the Federal Council at the time.

We then moved to a property called Wirindi at Manilla, it was here that the cattle showing started. Jason at this stage was not home for a year or so having gone to Canada as the Australian Charolais Society representative to work on Canadian Charolais member's properties and major grain producers. He returned and finished his degree in Agriculture at Orange. At this stage Pippa and Amber was still at school in Sydney.

Our two walking sires were Mandalong Layman (P) and the French influence Ayr Estate, both remarkable bulls and left their mark on our herd, fine haired, medium framed with plenty of constitution, milking ability and good temperament.

We sold bulls, by invitation of the Queensland region, at Rockhampton February and October sales and also Wide Bay Burnett and off the paddock at home.

We showed the cattle for 25 years and some of the highlights would be Champion of Champions in 1999 with Minnie-Vale Sundance and Palgrove Digna 55. Sundance later sold at the National Show and Sale to Moongool Charolais for \$22,000, a record at the time, this bull's history is legendary over a very long time. Then Minnie-Vale Thunderbolt winning the Horden Trophy 2000 teamed with Airlie Noisette, he later sold to Waterford Charolais and Del Connen in partnership. Two such elite awards with two different bulls back to back.

Another highlight was Minnie-Vale Deputy (P) National Grand Champion and full polled brother to Sundance who sold to Rosedale Charolais for a record price of \$35,000, a remarkable bull, his progeny are still with Rosedale.

As far as the females went we think Minnie-Vale Quist was a standout, who sold to Winchester Charolais as a heifer to Gavin and Kristie O'Brien. A spectacular cow family. Quist won the Interbreed Female at Sydney Show in 2006. At Sydney Royal 2022, her daughter Winchester Daisy Duke won the same award.

At the time, I was Chairperson of NSW, also served on the Federal Council, and very involved with the Northern Breeders Group NSW, all under the banner of promoting the Charolais breed in NSW.

We started our On-Property Sale 20 years ago at Bexley Narrabri NSW. Approximately eight years ago, we retired from showing due to Doug being diagnosed with MND, a no return illness and we could not be away. Our concentration has been, and always will be, on striving to produce top Charolais bulls to all markets, commercial and stud.

Sale Information

Inspection: Cattle may be inspected any time prior to the sale by arrangement with the vendor or his agents.

Breeding Soundness Evaluation: All bulls offered in this sale have passed their semen test and are sold fertile. They have been examined by the veterinary consultant for structural and physical soundness.

Videos Of Sale Bulls: Videos of this year's sale bulls will be available for viewing approximately 2 weeks prior to sale day via the homepage of our website www.minnievalecharolais.com.au Alternatively, go to the AuctionsPlus website.

Supplementary Sheet: All bulls will be scanned just prior to the sale by the certified scanning technician, David Reid. The bulls will be scanned for eye muscle area, rump and rib fat, marbling (IMF%) as well as sale weight and scrotal size. Supplementary sheets will be available by Tuesday 23rd of July on our website.

Guarantee: All stock are guaranteed breeders. Any claim against the breeding ability of an animal purchased should be made in writing and accompanied by a veterinary certificate within six months of the date of sale. Any animal failing to breed may either be replaced or credit given to the value of the purchase price at the following sale. This guarantee does not include interest, expenses, costs or damages this process may incur. The purchaser is responsible.

Health: Minnie-Vale is an accredited TB and Brucellosis free herd. The Moree Department of Rural Lands, of which Minnie - Vale, Bexley is part of, is recognised as Johnes Disease Free. All sale cattle have been vaccinated with 7 in 1. All sale cattle have been back lined with Dectomax and inoculated against three day sickness. All bulls have been tested free of pestivirus. **Minnie-Vale has maintained JBAS 7 Herd Status.** Some of the bulls have been Sire Verified and tested for MYO and BPA.

Delivery: A delivery instruction slip must be completed in writing - stock awaiting delivery. All care will be taken, but absolutely no responsibility accepted for any injury or loss occasioned during, as a consequence of, or in relation to, any holding.

Insurance: Ownership passes at the fall of the hammer. Check with your Agent on sale day for their company insurance. It is strongly recommended that insurance be taken out for transit and maybe the first joining season.

Telephone link-up: It is advised that anyone who requires telephone link-up contact their preferred agent or Davidson Cameron & Co (Tamworth, Gunnedah or Narrabri) and they will organise accordingly.

AuctionsPlus: Our sale is conducted livestream in real time and will be interfaced on AuctionsPlus with the physical auction that is being conducted. A computer is used to bring the onsite bid price to the internet screen for remote bidders to observe. Bidders can bid on computers at their location and the bid is immediately transferred to the Auction barn and relayed to the Auctioneer. Bidding is only available if registered with AuctionsPlus. You must register online to their website at least 24 hours prior to the sale - www.auctionsplus.com.au

Rebate: 2.5% for outside agents must be in writing 24 hours prior to the sale and settling on their behalf within 7 days of the sale.

Registration and Transfer: It is the vendor's responsibility to pay for all animals to be transferred on request by the purchaser. Please notify your Agent if you wish transfer. The animal will be transferred to the purchaser through the Charolais Society of Australia Ltd, Armidale, NSW.

Refreshments: Morning tea and lunch will be provided by members of the Bingara Lions Club. All proceeds will be donated to this worthy cause.

Accommodation: There is plenty of accommodation at Inverell, Bingara, Moree and Narrabri, all within one and a half hours from Bexley for Northern and Southern visitors from across the borders.

AuctionsPlus

How to Register and Bid on AuctionsPlus

1

Go to www.auctionsplus.com.au to register at least 48 hours before the sale.

7

Fill in buyer details and once completed go back to Dashboard.

2

Select "**Sign Up**" in the top right hand corner.

8

Complete buyer induction module (approx. 30 minutes).

3

Fill out your name, mobile number, email address and create a password.

9

AuctionsPlus will email you to let you know that your account has been approved.

4

Go to your emails and confirm the account.

10

Log in on sale day and connect to auction.

5

Return to AuctionsPlus and log in.

11

Bid using the two-step process – unlock the bid button and bid at that price.

6

Select "**Dashboard**" and then select "**Request Approval to Buy**".

12

If you are successful, the selling agent will contact you post sale to organise delivery and payment.

For more information please contact us on:

Phone: (02) 9262 4222

HOMOZYGOUS POLLED

We purchased Supertramp in 2023 at the Rangan Charolais Sale in Victoria. He offered us a variation in genetics in a Homozygous Polled package. He is breeding exceptionally well over our cows as is evident with all his offspring, both males and females. He offers quiet temperament, low birth weight and growthy offspring with excellent sleek hair type in combination with great muscle expression. A solid performer that we are very happy with.

QBrick was purchased in 2020 and is leaving us with some good types. He is a softly made thick coated bull with a quiet nature. He holds his shape well out in the paddock and we believe his daughters are going to make exceptional cows. This sire is working well with our cow base and he has a very handy line up of sons in this year's sale.

HOMOZYGOUS POLLED

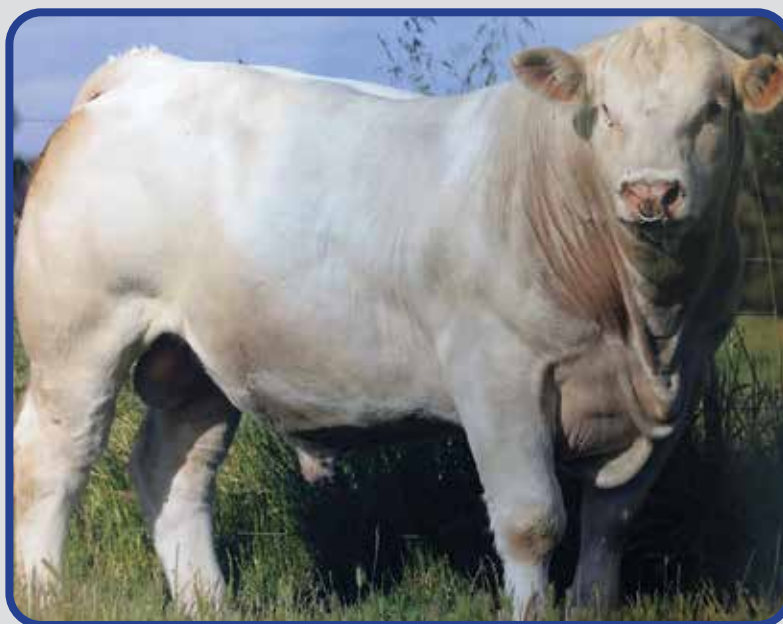

Raise The Bar was purchased from the Venturon Charolais Stud in WA for a record \$36,000 in 2023. He was Grand Champion Bull Sydney Royal 2023 and has already had a positive impact on our herd. He has an outstanding line up of sons for the first time in our sale, sons we are proud to offer. Medium framed, well muscled, soft and docile best describes him. His daughters are outstanding with faultless udders and maternal value on the high end. As a bonus, Raise The Bar is Homozygous Polled.

Estimated Breeding Values (EBVs) Explained

Calving Ease EBVs (%) are based on calving difficulty scores, birth weights and gestation length information. More positive EBVs are favourable and indicate easier calving.

- **CE % Direct = Direct Calving Ease** - The EBV for direct calving ease indicates the influence of the sire on calving ease in purebred females calving at two years of age.

- **CE % Daughters = Daughters' Calving Ease** - The EBV for daughters' calving ease indicates how easily that sire's daughters will calve at two years of age.

Gestation Length EBV (days) is an estimate of the time from conception to the birth of the calf and is based on Artificial Insemination and hand mating records. Lower (negative) Gestation Length EBVs indicate shorter gestation length and therefore easier calving and increased growth after birth.

Birth Weight EBV (kg) is based on the measured birth weight of progeny, adjusted for dam age. The lower the value the lighter the calf at birth and the lower the likelihood of a difficult birth. This is particularly important when selecting sires for use over heifers.

200-Day Growth EBV (kg) is calculated from the weight of progeny taken between 80 and 300 days of age. Values are adjusted to 200 days and for age of dam. This EBV is the best single estimate of an animal's genetic merit for growth to early ages.

400-Day Weight EBV (kg) is calculated from the weight of progeny taken between 301 and 500 days of age, adjusted to 400 days and for age of dam. This EBV is the best single estimate of an animal's genetic merit for yearling weight.

600-Day Weight EBV (kg) is calculated from the weight of progeny taken between 501 and 900 days of age, adjusted to 600 days and for age of dam. This EBV is the best single estimate of an animal's genetic merit for growth beyond yearling age.

Mature Cow Weight EBV (kg) is based on the cow weight when the calf is weighed for weaning, adjusted to 5 years of age. This EBV is an estimate of the genetic difference in cow weight at 5 years of age and is an indicator of growth at later ages and potential feed maintenance requirements of the females in the breeding herd. Steer breeders wishing to grow animals out to a larger weight may also use the Mature Cow Weight EBV.

Milk EBV (kg) is an estimate of an animal's milking ability. For sires, this EBV indicates the effect of the daughter's milking ability, inherited from the sire, on the 200-day weights of her calves. For dams, it indicates her milking ability.

Scrotal Size EBV (cm) is calculated from the circumference of the scrotum taken between 300 and 700 days of age and adjusted to 400 days of age. This EBV is an estimate of an animal's genetic merit for scrotal size. There is also a small negative correlation with age of puberty in female progeny and therefore selection for increased scrotal size will result in reduced age at calving of female progeny.

Carcase Weight EBV (kg) is based on abattoir carcass records and is an indicator of the genetic differences in carcass weight at the standard age of 650 days.

Eye Muscle Area EBV (sq cm) is calculated from measurements from live animal ultrasound scans and from abattoir carcass data, adjusted to a standard 300 kg carcass. This EBV estimates genetic differences in eye muscle area at the 12/13th rib site of a 300 kg dressed carcass. More positive EBVs indicate better muscling on animals. Sires with relatively higher Eye Muscle Area EBVs are expected to produce better muscled and higher percentage yielding progeny at the same carcass weight than will sires with lower Eye Muscle Area EBVs.

Rib Fat and Rump Fat EBVs (mm) are calculated from measurements of subcutaneous fat depth at the 12/13 rib site and the P8 rump site (from live animal ultrasound scans and from abattoir carcasses) and are adjusted to a standard 300 kg carcass. These EBVs are indicators of the genetic differences in fat distribution on a standard 300 kg carcass. Sires with low, or negative, fat EBVs are expected to produce leaner progeny at any particular carcass weight than will sires with higher EBVs.

Retail Beef Yield EBV (%) indicates genetic differences between animals for retail yield percentage in a standard 300 kg carcass. Sires with larger EBVs are expected to produce progeny with higher yielding carcasses.

Intramuscular Fat EBV (%) is an estimate of the genetic difference in the percentage of intramuscular fat (marbling) at the 12/13th rib site in a 300 kg carcass. Depending on market targets, larger more positive values are generally more favourable.

Selection Indices

Northern Maternal Index [NMI]- Estimates the genetic differences between animals in net profitability per cow joined for a typical commercial self-replacing herd where Charolais bulls are joined with Bos indicus cows in Northern Australia targeting the grass fed Jap Ox market. Selected heifers are retained for breeding and so maternal traits are of importance. Steers target 650 kg live weight (360 kg HSCW and 12 mm P8 fat depth) and heifers 630 kg (340 kg HSCW and 14 mm P8 fat depth), at 26 months of age. In response to industry feedback; positive emphasis has been placed on finishing ability.

Domestic Terminal Index [DTI]- Estimates the genetic differences between animals in net profitability per cow joined for a typical commercial herd where Charolais bulls are joined with a British breed cow base (e.g. Angus) targeting the domestic trade. This index assumes all progeny will be marketed with steers finished in the feedlot for 90 days, and weighing 450 kg (250 kg HSCW and 7 mm P8 fat depth) when marketed at 12 months. Heifers will be in the feedlot for 75 days, and weigh 430 kg (230 kg HSCW and 9 mm P8 fat depth) at 12 months. In response to industry feedback, positive emphasis has been placed on finishing ability.

Accuracy

Accuracy (%) is based on the amount of performance information available on the animal and its close relatives - particularly the number of progeny analysed. Accuracy is also based on the heritability of the trait and the genetic correlations with other recorded traits. Hence accuracy indicates the "confidence level" of the EBV. The higher the accuracy value the lower the likelihood of change in the animal's EBV as more information is analysed for that animal or its relatives. Even though an EBV with a low accuracy may change in the future, it is still the best estimate of an animal's genetic merit for that trait. As more information becomes available, an EBV is just as likely to increase in value, as it is to decrease.

Accuracy values range from 0-99%. The following guide is given for interpreting accuracy:

- **less than 50%: Low accuracy.** EBVs are preliminary and could change substantially as more performance information becomes available.

- **50-74%: Medium accuracy.** Usually based on the animal's own records and pedigree.

- **75-90%: Medium-high accuracy.** Some progeny information included. EBVs may change with addition of more progeny data.

- **more than 90%: High accuracy** estimate of the animal's true breeding value.

As a rule, animals should be compared on EBVs regardless of accuracy. However, where two animals have similar EBVs the one with higher accuracy could be the safer choice, assuming other factors are equal.

For further information please contact the Charolais Society or Charolais BREEDPLAN.

2026 Sale Bulls

Points of Interest to Prospective Purchasers

- On sale day there will be signs on the pens indicating catalogue numbers.
- Quads are used for mustering all cattle. The cattle are all handled gently but firmly.
- All our cattle respect electric fencing.
- The stud does not use dogs or horses, so bulls should be introduced gently to their new environment if possible.
- We recommend your new purchases, where possible, be off loaded into yards where there is other stock, preferably cows or steers. Remember, they have been in mobs, not isolated.
- Treat them kindly and they will respond kindly.
- We think common sense prevails and everybody does things differently, but these few points may help you in settling your new purchases.

Sale Day Safety

- The bulls are screened for temperament under normal circumstances, sale day can be a little different.
- **Visitors entering the sale pens do so at their own risk. No children are allowed to enter the pens.**
- If you require some help in your selection please ask the agents to assist on sale day.

Please stay for a short time after the sale. There will be refreshments and nibbles available and we would love to speak to all who attended the sale today.

LOT 1

MINNIE-VALE VALEDICTION V2E (P/S)

TATTOO: SGS 24V2E

DOB: 04/05/2024

COLOUR: White

BPAF. Sire Verified.

COMMENTS: To start this year's sale we have gone with a Raphael son. Valediction has loads of stretch, natural thickness and stands on very good bone. His dam SGS G16E is rising fifteen years old and still breeding well. An overall super bull with a bombproof temperament.

MINNIE-VALE VIGILANCE V47E (P/S)

TATTOO: SGS 24V47E

DOB: 28/06/2024

COLOUR: White

BPAF. Sire Verified.

COMMENTS: Vigilance will be the first of the Q-Brick sons to be offered this year. His dam SGS S97E is a good solid producer who always weans her calves towards the top. Vigilance is in the top 20% of the breed for 400 and 600 day weight, he also ranks in the top third of the breed for eye muscle area. A well-tempered bull with a strong sirey head and solid reproductive traits.

MINNIE-VALE VANTAGE V29E (P)

TATTOO: SGS 24V29E
DOB: 15/05/2024
COLOUR: White

HOMOZYGOUS POLLED
BPAF. Sire Verified.

COMMENTS: Vantage, we think, is one of the standout bulls in this year's offering. A sirey headed bull who stands on a mountain of meat. He is well above average in all growth categories, top 20% for EMA and top 15% of the breed for rib and rump fats. This bloke has the largest scrotal in the sale, exceptionally set and square. This fellow's shape and natural thickness should stand him a good inspection.

MINNIE-VALE VAMOSE V23E (P)

TATTOO: SGS 24V23E

DOB: 14/05/2024

COLOUR: White

**HOMOZYGOUS POLLED
BPAF. Sire Verified.**

COMMENTS: Vamose is a creamy coloured bull with a strong sire's polled head. He is moderately framed and stands on nice bone, square hipped, thick and well suited to the vealer market. Vamose is slightly above breed average with his growth EBVs, top 25% for milk and top 15% for EMA. A terrific Raise the Bar son wrapped in a Homozygous polled package.

MINNIE-VALE VIGILANT V19E (P) (R/F)

TATTOO: SGS 24V19E

DOB: 13/05/2024

COLOUR: Red factor

**HOMOZYGOUS POLLED
BPAC. Sire Verified.**

COMMENTS: Vigilant's sire and dam are both Red Factor. He is a sirey headed polled bull standing on a moderate frame, combined with good carcass shape and thickness. A soft haired bull who lays down fat with ease. Steady growth across all categories, strong reproductive traits and his Rib and Rump fats rank in the top 4% of the breed. Excellent commercial bull in a Homozygous polled package.

MINNIE-VALE VIRTUE V104E (P)

TATTOO: SGS 24V104E
DOB: 06/09/2024
COLOUR: White
BPAC.

COMMENTS: Virtue is another well put together Supertramp son. Great body length combined with a good square hip and grunt when you get in behind him. This fellow sits around breed average with his growth traits and the top 20% for milk. His dam is a softly made cow in a moderate frame who oozes milk.

SIRE: RANGAN SUPERTRAMP S145 (RAN S145E) (P)

MINNIE-VALE VISTA V86E (P)

TATTOO: SGS 24V86E
DOB: 03/08/2024
COLOUR: White

BPAF.

COMMENTS: Vista is an upstanding Raise the Bar son with tremendous body length combined with excellent hindquarter shape. His dam Usherette is still with us and breeding well. Vista ranks in the top 6% of the breed for milk, top 15% for IMF and top 25% for EMA. A well rounded bull who ticks a lot of boxes.

MINNIE-VALE VULCAN V132E (P)

TATTOO: SGS 24V132E
DOB: 07/10/2024
COLOUR: White

BPAC.

COMMENTS: Another really handy Raise the Bar son here in Vulcan. He displays that early maturity pattern that is sort after in the crossbreeding vealer operations. Plenty of thickness in this fellow and good jump muscle across the hip. This fellow ranks in the top 7% for low birth weight, top 6% for milk, top 20% for rib and rump fats and top 25% for IMF.

MINNIE-VALE VANDYKE V128E (P/S)

TATTOO: SGS 24V128E
DOB: 06/10/2024
COLOUR: White

BPAF.

COMMENTS: Vandyke is a tidy son of the red factor sire Raphael. A young bull we really like further into the catalogue. A smoothly made bull with a clean front end and terrific length of body combined with a tidy tailhead and tight sheath. He ranks in the top 20% for 400 day weight and top 25% for 600 day, and top 20% for milk. An overall stylish package who gets two ticks.

MINNIE-VALE VIRGO V100E (P)

TATTOO: SGS 24V100E
DOB: 03/09/2024
COLOUR: White

**HOMOZYGOUS POLLED
 BPAF.**

COMMENTS: Virgo is another fine example of the Superstition sons who have body length and style. This bloke is another sirey headed polled bull with magnificent silky hair type. A square butted bull who travels along nicely. We paid \$16,000 for his dam at Palgrove some years ago. The Clara cow lines are well recognized in the breed. Virgo ranks in the top 10% of the breed for 200 day weight and top 5% for retail beef yield.
