Minnie-Vale Charolais

WELCOME TO THE 2021 ANNUAL BULL SALE

Jason & Sue extend a very warm welcome to everyone attending our Annual Bull Sale at Bexley this year, also to clients who are participating in the Sale on AuctionsPlus.

What a wonderful season we are experiencing this year, so different from the hard and difficult times we had previously, the turnaround is extraordinary. What with the agricultural sector so positive and buoyant and the future of the cattle industry in such a good place and appears to be here to stay, the horizons are looking very favourable. The Minnie-Vale herd is now tested JBAS 7 status.

The cattle look wonderful, although our breeding schedule is still trying to correct after the drought, the calves are healthy, robust, which is fantastic to see again.

The bulls we are offering this year were born and raised in the drought, they are definitely a remarkable offering, they have such stamina, constitution and big hearts to boot. We are very happy with them and look forward to your appraisal of the quality product we present to you on Sale Day.

The first sons of Clare Mega Awesome, Rosedale Moregain and Waterford Lionheart are being offered this year. There are also three outcross sires used in our programs, Lot 5 – Elder's Blackjack, Lot 9 – LVH-Fairfield Lethal and Colinta Levi – Lot 18 (a yearling bull).

There are five homozygous bulls – Lots 1, 15, 30, 32 & 44.

Included are four red bulls and, for the first time we are offering two pretty special yearling bulls – Lot 18 and 19. The sale comprises of 33 polled and P/S bulls and 13 dehorned.

COVID-19: This sale will be absolutely normal, but we will adhere to all Government legislations and rulings on this matter. Social distancing will be practiced and hand sanitisers available. The sale is always held in the open air and all guests will be required to sign in on arrival at the registration desk.

AuctionsPlus: Those who are not able to attend the sale will be able to bid online on AuctionsPlus. Those people wishing to do this please become familiar with the steps required to use this system. A page of instructions is in the early part of this catalogue and don't hesitate to contact AuctionsPlus by phone if you required assistance, they are very helpful.

Jas and Sue would like to thank so many clients who have supported our sale over so many years and sales. It's because of this support that we strive to produce the improved product you see here today. Many thanks to our regular helpers, Lyn, Casey, Nigel, Laura (video), Butch, Rod and Lorraine, also the Charolais Office and Lucy Main, our printer Paul McMahon and our Agents for the sale Davidson and Cameron Gunnedah, Narrabri, Moree and Quirindi.

It is strongly recommended that insurance be taken out before transit and maybe the first joining season. It is also advisable to have some stock on hand in the yard to settle the new bull, only because these fellows have all run together in big groups of bulls.

Our stock carry our Breeding Guarantee, so please feel confident with your selection. If you would like an inspection prior to the sale please contact Jason and I will be happy to spend time with you and take you over the bulls, or ring and I can discuss the catalogue with you.

The cattle are able to be inspected from 10am on sale day. Refreshments and lunch will be provided by the Bingara Lions Club.

Regards,

Jas & Sue

A Brief History of the Stud

MINNIE-VALE CHAROLAIS STUD ESTABLISHED 1972

The stud was established through artificial insemination programs using French and British bloodlines, after very slow and deliberate selection and grading up progress. Some of the bulls used originally included 'Absalon', 'Aga Khan', 'Bent Frederick', 'Carabinier', 'Kersknowe Festival', 'Mearns Enterprise', and 'Salmon', predominantly French.

The graded up breeding herd from these bloodlines was then infused by a Mandalong bull, 'Mandalong Layman', the first polled bull ever sold by Rick Pisaturo at his St. Mary's Sale. In 1980, twelve three quarter grade cows by 'Carabanier' were purchased, boosting the volume capacity of our then female herd.

An embryo transfer program with the ATB at Mittagong, NSW was initiated. The two foundation pure bred matrons included 'Mandalong Confidence 18th' and 'Kenmere Orsova', a Blythe Herald cow purchased from the Hillside Stud, Mittagong (Harry and Bea Wadds). These two females were inseminated very successfully to 'Crown' and 'Power', resulting in 50% female calves, adding to the herd base.

Over a period of time, both out cross females (very few) and bulls have been purchased from many selected studs over a long period of time to compliment the Minnie-Vale herd producing the cattle you see before you today.

Minnie - Vale cattle have been very successful in all aspects of the beef industry, show cattle, Interbreed wins at many shows, including the Horden Trophy, Sydney Show and Brisbane Champion of Champion, steer competitions. Probably the hardest to crack are prices in the sale ring at multi-vendor sales. Top prices and record-breaking prices have been achieved.

The bulls we have sold off farm, also very successful in their respective cross breeding programs, continuing to improve the hip pocket, which is after all, the bottom line, and the reason we breed Charolais cattle and where 98% of our product goes to today's commercial cattleman.

Our cattle over the years, through very strict breeding and culling, have evolved into consistent, well muscled, soft, easy doing cattle, herd improvers, fertility, milking ability and quality are their trademark along with a quiet disposition.

Points of Interest to Prospective Purchasers

On sale day there will be signs on the pens indicating catalogue numbers.

SALE DAY SAFETY - The bulls are screened for temperament under normal circumstances, sale day can be a little different. Visitors entering the sale pens do so at their own risk. No children are allowed to enter the pens. If you require some help in your selection please ask the agents to assist on sale day.

Quads are used for mustering all cattle. The cattle are all handled gently but firmly. Remembering that all our cattle respect electric fencing. Treat them kindly and they will respond kindly. The stud does not use dogs or horses, so bulls should be introduced gently to their new environment if possible. We recommend your new purchases, where possible, be off loaded into yards where there is other stock, preferably cows or steers. Remember, they have been in mobs, not isolated. We think common sense prevails and everybody does things differently, but these few points may help you in settling your new purchases.

DISCLAIMER: People entering upon this property for any purpose whatsoever including at cattle auctions do so at their own risk. We are not liable to you for any personal injury or death suffered by you and for theft loss or damage to any property caused or contributed to us or by any other person whether caused or contributed to by or by negligence deliberate act or unlawful conduct. "We" or "Us" refer to the owners their employees, contractors and agents and each of them. While ever care has been taken in compiling this catalogue to ensure accuracy or information supplied no responsibility is accepted for any errors which may have occurred.

Sale Information

Inspection: Cattle may be inspected any time prior to the sale by arrangement with the vendor or his agents.

Breeding Soundness Evaluation: All bulls offered in this sale have passed their semen test and are sold fertile. They have been examined by the veterinary consultant for structural and physical soundness.

COVID-19: Please follow directions and safety signs on sale day in regards to COVID-19. We will be working within current guidelines as set by the Australian Government. All guests will be required to sign in on arrival and adhere to current social distancing rules. Please be responsible and respectful of others and their health and safety, and do not attend if you are not well. Online bidding and over the phone bidding is available and private inspections are welcomed and encouraged at any time prior to the sale.

Supplementary Sheet: All bulls will be scanned just prior to the sale by the certified scanning technician, David Reid. The bulls will be scanned for eye muscle area, rump and rib fat, marbling (IMF%) as well as sale weight and scrotal size. Supplementary sheets will be available on sale day.

Guarantee: All stock are guaranteed breeders. Any claim against the breeding ability of an animal purchased should be made in writing and accompanied by a veterinary certificate within six months of the date of sale. Any animal failing to breed may either be replaced or credit given to the value of the purchase price at the following sale. This guarantee does not include interest, expenses, costs or damages this process may incur. The purchaser is responsible.

Health: Minnie-Vale is an accredited TB and Brucellosis free herd. The Moree Department of Rural Lands, of which Minnie - Vale, Bexley is part of, is recognised as Johnes Disease Free. All sale cattle have been vaccinated with 7 in 1. All sale cattle have been back lined with Dectomax and inoculated against three day sickness. All bulls have been tested free of pestivirus. These bulls carry the Green Warrior ear tag and are covered for lice, flies and buffalo fly (applied June 11th 2021).

Minnie-Vale has achieved JBAS 7 Herd Status.

Delivery: A delivery instruction slip must be completed in writing - stock awaiting delivery. All care will be taken, but absolutely no responsibility accepted for any injury or loss occasioned during, as a consequence of, or in relation to, any holding.

Insurance: Ownership passes at the fall of the hammer. Check with your Agent on sale day for their company insurance. It is strongly recommended that insurance be taken out for transit and maybe the first joining season.

Telephone link-up: It is advised that anyone who requires telephone link-up, contact their preferred agent or Davidson Cameron & Co (Gunnedah or Narrabri) and they will organise accordingly.

AuctionsPlus: Our sale is conducted livestream in real time and will be interfaced on AuctionsPlus with the physical auction that is being conducted. A computer is used to bring the onsite bid price to the internet screen for remote bidders to observe. Bidders can bid on computers at their location and the bid is immediately transferred to the Auction barn and relayed to the Auctioneer. Bidding is only available if registered with AuctionsPlus. You must register online to their website at least 24 hours prior to the sale - www.auctionsplus.com.au

Rebate: 2.5% for outside agents must be in writing 24 hours prior to the sale and settling on their behalf within 7 days of the sale.

Registration and Transfer: It is the vendor's responsibility to pay for all animals to be transferred on request by the purchaser. Please notify your Agent if you wish transfer. The animal will be transferred to the purchaser through the Charolais Society of Australia Ltd, Armidale, NSW.

Refreshments: Morning tea and lunch will be provided by members of the Bingara Lions Club. All proceeds will be donated to this worthy cause.

Accommodation: There is plenty of accommodation at Inverell, Bingara, Moree and Narrabri, all within one and a half hours from Bexley for Northern and Southern visitors from across the borders.

***Can't make the sale?
Log onto AuctionsPlus to bid from
anywhere on your phone, tablet or desktop.***

1

REGISTER ONLINE

Simply click 'Sign Up' to begin your free registration. To register as a buyer for livestock, you will need to provide us with a few more details.

2

COMPLETE BUYER INDUCTION

The buyer induction will help you understand the roles and responsibilities of everyone on the AuctionsPlus system.

3

VIEW CATALOGUE

Photos, videos, pedigrees and other information will be available in the online catalogue.

4

ENTER AUCTION

Log into the auction anytime, anywhere and bid on your mobile, tablet or computer.

5

AUTO BID

Can't stay for the whole sale? Set your maximum bid on the lot that you want to purchase and let the computer bid for you.

6

CONTACT SELLING AGENT

If successful, contact selling agent directly after the sale to arrange payment.

7

DELIVERY

Arrange transport of livestock at your expense.

or www.auctionsplus.com.au*

Estimated Breeding Values (EBVs) Explained

Calving Ease EBVs (%) are based on calving difficulty scores, birth weights and gestation length information. More positive EBVs are favourable and indicate easier calving.

- **CE % Direct** = Direct Calving Ease - The EBV for direct calving ease indicates the influence of the sire on calving ease in purebred females calving at two years of age.

- **CE % Daughters** = Daughters' Calving Ease - The EBV for daughters' calving ease indicates how easily that sire's daughters will calve at two years of age.

Gestation Length EBV (days) is an estimate of the time from conception to the birth of the calf and is based on Artificial Insemination and hand mating records. Lower (negative) Gestation Length EBVs indicate shorter gestation length and therefore easier calving and increased growth after birth.

Birth Weight EBV (kg) is based on the measured birth weight of progeny, adjusted for dam age. The lower the value the lighter the calf at birth and the lower the likelihood of a difficult birth. This is particularly important when selecting sires for use over heifers.

200-Day Growth EBV (kg) is calculated from the weight of progeny taken between 80 and 300 days of age. Values are adjusted to 200 days and for age of dam. This EBV is the best single estimate of an animal's genetic merit for growth to early ages.

400-Day Weight EBV (kg) is calculated from the weight of progeny taken between 301 and 500 days of age, adjusted to 400 days and for age of dam. This EBV is the best single estimate of an animal's genetic merit for yearling weight.

600-Day Weight EBV (kg) is calculated from the weight of progeny taken between 501 and 900 days of age, adjusted to 600 days and for age of dam. This EBV is the best single estimate of an animal's genetic merit for growth beyond yearling age.

Mature Cow Weight EBV (kg) is based on the cow weight when the calf is weighed for weaning, adjusted to 5 years of age. This EBV is an estimate of the genetic difference in cow weight at 5 years of age and is an indicator of growth at later ages and potential feed maintenance requirements of the females in the breeding herd. Steer breeders wishing to grow animals out to a larger weight may also use the Mature Cow Weight EBV.

Milk EBV (kg) is an estimate of an animal's milking ability. For sires, this EBV indicates the effect of the daughter's milking ability, inherited from the sire, on the 200-day weights of her calves. For dams, it indicates her milking ability.

Scrotal Size EBV (cm) is calculated from the circumference of the scrotum taken between 300 and 700 days of age and adjusted to 400 days of age. This EBV is an estimate of an animal's genetic merit for scrotal size. There is also a small negative correlation with age of puberty in female progeny and therefore selection for increased scrotal size will result in reduced age at calving of female progeny.

Carcase Weight EBV (kg) is based on abattoir carcass records and is an indicator of the genetic differences in carcass weight at the standard age of 650 days.

Eye Muscle Area EBV (sq cm) is calculated from measurements from live animal ultrasound scans and from abattoir carcass data, adjusted to a standard 300 kg carcass. This EBV estimates genetic differences in eye muscle area at the 12/13th rib site of a 300 kg dressed carcass. More positive EBVs indicate better muscling on animals. Sires with relatively higher Eye Muscle Area EBVs are expected to produce better muscled and higher percentage yielding progeny at the same carcass weight than will sires with lower Eye Muscle Area EBVs.

Rib Fat and Rump Fat EBVs (mm) are calculated from measurements of subcutaneous fat depth at the 12/13 rib site and the P8 rump site (from live animal ultrasound scans and from abattoir carcasses) and are adjusted to a standard 300 kg carcass. These EBVs are indicators of the genetic differences in fat distribution on a standard 300 kg carcass. Sires with low, or negative, fat EBVs are expected to produce leaner progeny at any particular carcass weight than will sires with higher EBVs.

Retail Beef Yield EBV (%) indicates genetic differences between animals for retail yield percentage in a standard 300 kg carcass. Sires with larger EBVs are expected to produce progeny with higher yielding carcasses.

Intramuscular Fat EBV (%) is an estimate of the genetic difference in the percentage of intramuscular fat (marbling) at the 12/13th rib site in a 300kg carcass. Depending on market targets, larger more positive values are generally more favourable.

Selection Indices

Domestic Index (\$) - Estimates the genetic differences between animals in net profitability per cow joined for an example commercial herd with a British cow base (eg Angus) targeting grass-finished production for the domestic trade. This Index assumes pasture grown & finished steers weighing 430 kg (240 kg HSCW and 6 mm P8 fat depth) at 12 months. Daughters are retained or sold for breeding therefore maternal traits are of importance. In response to industry feedback, positive emphasis has been placed on finishing ability.

Export Index (\$) - Estimates the genetic differences between animals in net profitability per cow joined for an example commercial herd with a British cow base (eg Angus) targeting the production of steers for export markets. This Index assumes pasture grown & finished steers weighing 700 kg (380 kg HSCW and 9 mm P8 fat depth) at 29 months. Daughters are retained or sold for breeding therefore maternal traits are of importance. In response to industry feedback, positive emphasis has been placed on finishing ability.

Northern Terminal Index (\$) - Estimates the genetic differences between animals in net profitability per cow joined for an example commercial herd in Northern Australia (ie Brahman cows) targeting the production of grass finished steers for the Jap Ox market. Steers are sold direct to slaughter at 630 kg (345 kg HSCW and 5 mm P8 fat depth) at 28 months. All progeny are slaughtered. In response to industry feedback positive emphasis has been placed on finishing ability.

Accuracy

Accuracy (%) is based on the amount of performance information available on the animal and its close relatives - particularly the number of progeny analysed. Accuracy is also based on the heritability of the trait and the genetic correlations with other recorded traits. Hence accuracy indicates the "confidence level" of the EBV. The higher the accuracy value the lower the likelihood of change in the animal's EBV as more information is analysed for that animal or its relatives. Even though an EBV with a low accuracy may change in the future, it is still the best estimate of an animal's genetic merit for that trait. As more information becomes available, an EBV is just as likely to increase in value, as it is to decrease.

Accuracy values range from 0-99%. The following guide is given for interpreting accuracy:

- less than 50%: Low accuracy. EBVs are preliminary and could change substantially as more performance information becomes available.
- 50-74%: Medium accuracy. Usually based on the animal's own records and pedigree.
- 75-90%: Medium-high accuracy. Some progeny information included. EBVs may change with addition of more progeny data.
- more than 90%: High accuracy estimate of the animal's true breeding value.

As a rule, animals should be compared on EBVs regardless of accuracy. However, where two animals have similar EBVs the one with higher accuracy could be the safer choice, assuming other factors are equal.

For further information please contact the Charolais Society or Charolais BREEDPLAN.

Peacemaker was purchased from the Winchester Stud in 2010. A poll bull with excellent leg structure, good boning, sleek hair type and outstanding disposition. Peacemaker continues to be an outstanding breeding sire producing excellent sons and standout replacement females. This bull's progeny have really excelled in cross breeding programs. This will be Peacemaker's last offering of sons.

Lord was purchased from the Palgrove stud in 2017. He is a moderately framed polled bull who oozes softness and thickness, and is proving to breed very well. He passes on his kind disposition, strong reproductive traits and structure to his progeny who are early maturing and well suited to a wide variety of cattle operations. Some terrific sons on offer in this year's sale.

Mega Awesome caught our attention when offered for sale by the Clare Charolais Stud QLD in 2018. He is a well put together bull with excellent polled sire head. He is quietly natured and has really solid EBV data to back him up. A very softly fleshed bull with great supple skin and solid reproductive traits. This will be the first offering of his sons and they are exceptionally good bulls.

2021 Sale Bulls

LOT 1

MINNIE-VALE QUANTAS (P)

TATTOO: SGS Q14E

DOB: 14/06/2019

NLIS TAG: NG411195 NLIS XB01906

COLOUR: White

HOMOZYGOUS POLLED

COMMENTS:

To kick this year's sale off we have chosen Quantas. A homozygous polled Jaguar son. He is clean fronted and oozes that soft fleshing ability, which is stamped in the Minnie-Vale herd. A stylish young sire who will suit any breeding program he joins, with an outstanding disposition definitely three ticks for this bloke, and we all know Lot 1 can often go under the radar.

MINNIE-VALE QUOTA (P)

TATTOO: SGS Q54E

DOB: 01/08/2019

NLIS TAG: NG411195 NLIS XBR01927

COLOUR: White

COMMENTS:

Quota is one of the last Peacemaker sons to be offered. What a fabulous job his sire has done over the years, his sons overtime have excelled in cross breeding programs everywhere. Quota exhibits awesome depth of flank, standing on excellent bone terrific growth and a lovely sleek coat. This is such an opportunity to get in on this predictable genetic line.

Quartermaster was one of the heaviest bull calves weaned at the height of the drought. We are so pleased with this draft of bulls and the way they have progressed after being born, raised and weaned in the hardest times we have ever seen. Quartermaster exhibits terrific length of body and muscle shape while retaining plenty of softness. His dam, who we showed successfully many years ago, is still breeding well at the age of 14 with another outstanding bull calf at foot. Primrose has never missed! Quartermaster is a top-end industry bull.

MINNIE-VALE QUEBEC

TATTOO: SGS Q29E

DOB: 02/07/2019

NLIS TAG: NG411195 NLIS XBR01923

COLOUR: White

COMMENTS:

Quebec is one of the last of the Peacemaker line. What a cracker! A commercial cattleman's dream. An industry driven bull who reflects the type we strive to produce. From behind Quebec shows fantastic width, muscle shape and depth of flank. He has outstanding skin and coat type, all this is packed into a moderately framed package. Three ticks for this fellow, one of our favourites.

Quilpy offers another opportunity with a slight variation in genetics to the Minnie-Vale herd. His dam was one of the pick young females to be purchased from the Allednaw dispersal sale; she is proving to be a very good breeder, which is definitely reflected in her son. Quilpy has a really strong butt profile and great body length. A well balanced young sire with strong reproductive traits and a placed nature to boot. He should stand a strong inspection on sale day. He deserves some ticks.

Quatro is another Moregain son who oozes quality from front to back. A stylish good mover, who always draws your eye in the paddock. Quatro has a super soft supple hide, standing on good bone with a nicely laid in shoulder. Quatro has a lot to offer a commercial cow herd, with lower birthweight, excellent growth, performance and being homozygous polled as an added bonus to this fine package.

TATTOO: SGS R1E

DOB: 27/01/2020

NLIS TAG: NG411195 NLIS XBR01910

COLOUR: White

COMMENTS:

We have decided to offer two special yearling bulls in the sale – Lots 18 & 19. Rhinestone is an AI bull calf by Colinta Levi, Grand Champion and Interbreed bull at the Ekka a couple of years ago. A quality young bull on offer here with a variation in genetics. Terrific performance and growth in this young fella and overall sire's presence. A thick bull with terrific body shape and free moving who will suit all cattle programs. Rhinestone has great eye appeal and should create good interest on sale day.

MINNIE-VALE QUIXOTE (P)

TATTOO: SGS Q130E

DOB: 30/09/2019

NLIS TAG: NG411195 NLIS XBR01916

COLOUR: White

COMMENTS:

Quixote is another one of those bulls who stands out in the crowd. These Awesome sons are like peas in pods, good sirey polled headed bulls with terrific sleek hair type, their coats are probably as good as you will see on a Charolais bull. Great capacity and strength in this fellow, he has so much to offer, a bull who ticks all the boxes. He also has a good steady growth rate for 200, 400 & 600-day traits and a strong scrotal.

HOMOZYGOUS POLLED

COMMENTS:

Quantong is another star lot in this year's draft, very similar in style to the previous lot. He has carcass attributes to burn with that lovely supple hide. A good masculine polled head; he covers all the bases and stood out as a young calf in the paddocks. He should stand a good inspection on sale day. Quantong is also homozygous polled as a bonus to complete the package.

Purchaser / \$:**LOT 46****MINNIE-VALE QUARTET (P)****TATTOO:** SGS Q18E**DOB:** 19/06/2019**NLIS TAG:** NG411195 NLIS XBR01915**COLOUR:** White**COMMENTS:**

To finish this year's sale we have selected Quartet. He is a stout, thickly set bull with a powerful hindquarter and great square hip from behind. He is out of a first calving heifer and comes with a lighter birthweight. A very tidy young bull with an exceptionally kind nature who will cover all the bases for your cowherd, with yield and profitability.
