

PRACTICE UPDATE: FORM FEE CHANGED

Dear Brooklyn Bridge Pediatrics families,

At Brooklyn Bridge Pediatrics, we are proud to be a small, patient and family centered independent private practice. The flexibility and independence of private practice allow us to provide timely access to truly personalized, high quality, evidence-based pediatric care.

In order for us to provide such a high level of service, our doctors and staff spend several hours a day providing administrative support for tasks not directly tied to patient care (e.g. patient forms). The time and the technology we use to provide these forms are NOT covered by insurance. Due to diminishing reimbursements and rising costs, these additional services have become unsustainable with our current patient form fee schedule.

Our fee schedule has not changed in over twenty years, but we find that we must increase our form and medical record fee to \$25/form which will take effect 11/1/25. This fee is still well below what many NYC practices charge.

The practice will continue to provide our standard school form and the CH-205 (the NYS DOH form required for most daycares, schools, and camps) at no cost at the time of the checkup. All other forms will be charged the form fee.

The practice will continue to review the fee schedule on a regular basis.

Please let your physician know if there is a financial hardship that prevents your family from paying this fee.

Thank you so much for being a part of our practice and for your understanding.

Sincerely,

Drs. O'Connor, Dalton, and Kantrowitz
