WHO WE ARE

Hot Driveways Qld is a privately owned, family-run business specialising in asphalt laying and maintenance, proudly serving Brisbane, South East Queensland, and the Gold Coast since 2002. Delivering high-quality services across residential, commercial, and government sectors, HDQ has grown from its family roots into a trusted contractor capable of handling projects of all scales - from private driveways to major infrastructure works.

As a family-run business, HDQ brings a level of personal commitment and accountability that larger contractors simply can't match. Backed by ISO 9001, 45001 and 14001 certifications, TMR accreditation, and a modern, well-maintained fleet operated by experienced personnel, HDQ ensures all workers are appropriately trained and certified for relevant plant, machinery, and site conditions. Our clients receive the responsiveness of a small business with the systems, safety standards, and capability of an established contractor - every project, every time.

OUR SERVICES

HDQ services all aspects of asphalt construction, maintenance, and repair, delivering tailored solutions across residential, commercial, industrial, council, and transport infrastructure projects. Our capabilities include road maintenance and rehabilitation, asphalt paving and overlays, trench reinstatements, profiling and milling, line marking, joint seal taping, footpath and carpark construction, and live traffic works. With the capability to deliver both temporary and permanent pavement solutions, HDQ is experienced in operating within tight-access environments, confined work areas, and high-traffic environments while maintaining a strong focus on safety, quality, and efficient project delivery. Our key service offerings include:

- Road Maintenance & Repairs
- Residential Asphalt Services
- Base Preparation & Trench Reinstatement
- Professional Paving & Overlay
- Surface Repairs & Maintenance
- Council Maintenance & Asset Management
- Line Marking
- Road Milling & Profiling
- Highway Asphalt Paving
- Footpath Construction
- Carpark Construction & Repairs
- Commercial & Industrial Surfaces
- Trench Reinstatements
- Joint Seal Taping

SYSTEMS & QUALITY

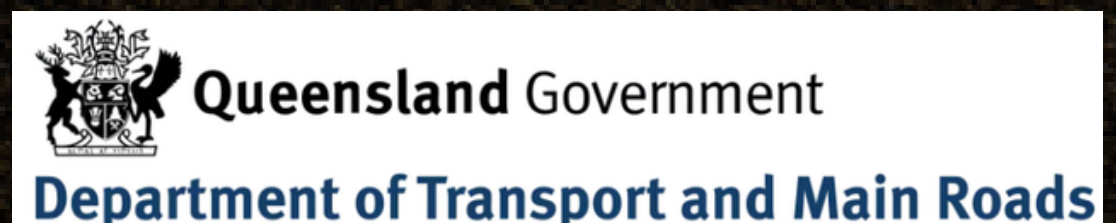

Hot Driveways Qld operates under an Integrated Management System certified to ISO standards, whilst also meeting MRTS requirements, proudly recognised by the following:

-  ISO 9001 Quality Management System Certification
-  ISO 45001 OHS Management System Certification
-  ISO 14001 Environment Management System Certification

We are proud members of the Australian Flexible Pavement Association (AfPA) and the Infrastructure Sustainability Council (ISC), organisations committed to continuously improving standards, sustainability, and best practices across Australia's road and infrastructure sectors for the benefit of road users and the broader community.

HDQ holds TMR Asphalt Prequalification A2, demonstrating our capability to deliver compliant asphalt works across state and local road infrastructure projects to Department of Transport and Main Roads standards. Our team has the capability, systems and experience to safely undertake works across some of the state's most vital road and transport infrastructure networks, delivering quality outcomes with a strong focus on safety, compliance and efficiency.

KEY PROJECTS

HDQ is proud to have delivered asphalt and road construction services across a wide range of projects throughout Brisbane, South Brisbane and the Gold Coast, including works involving multi-crew coordination, temporary and permanent asphalt works, live traffic environments, and complex staging and traffic switch arrangements.

Our delivery model is designed to minimise project risk through direct management involvement, experienced asphalt supervisors, proactive communication, practical planning, strong QA processes, and flexible resourcing capability.

Gold Coast Light Rail Project

City of Gold Coast / GCI Solutions' Projects

Kingston Park Raceway Project

Greenbridge Project, Kangaroo Point

Countless Private Driveways & Access Roads
