

# Academic Procedures

## FET PHASE

**IEB**  
**Grades 10-12**

### **FET Phase (Grade 10-12) at Evolve Online**

The Further Education and Training (FET) Phase at Evolve Online prepares students in Grades 10 to 12 for success in the Independent Examinations Board (IEB) National Senior Certificate (NSC), equipping them for matric excellence and future opportunities in education, careers, or entrepreneurship.

#### **Academic Excellence**

Our lesson content is built on IEB-endorsed coursework, meticulously crafted by our dedicated teachers to ensure academic integrity and relevance. Students align their subject choices with their career aspirations in Arts, Commerce, Humanities, or Sciences, laying a strong foundation for tertiary studies or occupational pursuits. Thorough guidance ensures learners meet the minimum admission requirements for their chosen future opportunities.

#### **Subject Offerings**

Students are required to take seven subjects to meet IEB NSC requirements, including two languages (one at Home Language level and another at First Additional Language level). Additional subjects, including optional extras, can be taken for a broader academic experience.

#### **Assessment and Progress Monitoring**

Assessment is continuous and varied, with progress tracked through our Learning Management System, which maps mastery of CAPS curriculum items. This approach provides insights into each student's proficiency, enabling personalized support and a smooth transition into mainstream schooling if needed.

- Grade 10 & 11: Online tests and exams are conducted throughout the year and are monitored through our advanced proctoring systems.
- Grade 12: Students write the IEB NSC exams, including relevant practical assessments, at designated exam centres as part of their final matriculation requirements.
