INTERMEDIATE PHASE

IEB
Grades 4-6

Welcome to the Intermediate Phase at Evolve Online, an exciting time for learners in Grades 4 to 6 as they embark on a journey of critical thinking and self-discovery. This phase lays a strong foundation in key subjects such as English, First Additional Language, Mathematics, and IDEAS, with engaging lessons that develop critical thinking, problem-solving, and collaboration skills. Digital literacy is seamlessly integrated into the CAPS-aligned curriculum, equipping students to navigate the online world responsibly and confidently.

A standout feature of this phase is our Mastery Tasks, completed at the end of each topic. These tasks go beyond assessing understanding; they empower students to develop strategies, take responsibility for their learning, and build independence. With the support of dedicated Learning Coaches, we cultivate curiosity, a love for learning, and meaningful connections with each student. Our flexible and personalized approach ensures lessons are tailored to their interests and academic levels, setting them up for continued growth and success.
