Interventions & Learning Coaches

IEB
Cambridge

Our Learning Coaches

Our coaches are fourth-year education students employed to work with groups of students and teach them the skills they need to be successful online students.

Crews and Syndicates

Students participate in Crews for collaborative work, facilitated by learning coaches who focus on Social Emotional Learning and Transferable Skills. In the FET Phase, emphasis is placed on study skills, time management, and developing coping mechanisms for a balanced mindset. Each Crew is divided into syndicates for peer learning, where small groups work towards collective academic goals without a Learning Coach. Fourth-year education students serve as coaches to equip students with necessary skills for success in online learning.

Intervention Program

Our Intervention Program is tailored to assist students facing challenges in their academic performance as well as their social and emotional wellbeing. This initiative includes a variety of strategies, such as personalized assessments to identify student needs, customized instruction and support, interventions within their syndicates, and supplementary interventions. The primary aim of these programs is to enhance students' academic performance and promote their overall success in school.
