British Vehicles and Guns Charts

Artillery was usually manned by a crew of four or five, some even less or more. A crew fights hand to hand with one dice per miniature. Morale depends on the number of miniatures as well. A crew of five will become shaken at three casualties and will break with one miniature left. They move the same as the infantry pushing it

When shooting at vehicles roll a single D6 to hit. On a roll of 4, 5, or 6 the target is hit. Now roll the BelloLudi Commander dice to see the amount of damage the vehicle has taken. With a roll of **B** being a bullseye, destroying the vehicle. A roll of 0 will do no damage and a roll of 1, 2, or 3 will give that much damage respectively.

If a gun has a rating of 2CD or 3CD, roll that many Commander Dice and add the number together. The total is the amount of damage the vehicle has taken. Should the number of damage exceed the armour number, the vehicle is deemed destroyed.
