Worksheet: Building Your Power Partner Network

Instructions:

This worksheet is designed to help you create a valuable contact list of complementary businesses that align with your industry. By building strong relationships with other business owners, you can foster mutually beneficial partnerships, generate referrals, and expand your reach.

Follow these steps to complete your Power Partner Network:

1. Identify Complementary Industries

Think about businesses that serve the same client base but are not direct competitors. For example:

- Real Estate Agent → Mortgage Broker, Interior Designer, Moving Company
- Fitness Coach → Nutritionist, Chiropractor, Sports Apparel Store

List at least 5-10 categories of businesses that could naturally align with your services.

2. Gather Contacts

For each category, identify local business owners or professionals you respect or would like to build a relationship with. You can find potential partners through:

- Networking events
- Local business associations
- Social media groups
- Mutual connections

3. Fill in the Contact Details

Use the table below to record the following information for each potential partner:

- Category of Business
- Contact Name
- Phone Number
- Email Address
- Company Name
- Notes (Include how you met, what you discussed, or potential collaboration ideas)

4. Set Follow-Up Actions

Once your list is started, plan outreach. Schedule coffee meetings, virtual calls, or invitations to events to deepen the relationship. Consistent engagement will help you establish a lasting and trusted partnership network.
