

# TEAM PRESENTATION

# OUR STORY

HRT was born in July 2020, forming from the ashes of the BLACK FALCON GT3 team. We hit the ground running, entering the Mercedes-AMG GT3 in both the Nürburgring Endurance Series, then named VLN and the Fanatec GT World Challenge.

Taking off immediately from the first race, with pole position, the team went on to post the fastest race lap on the way to finishing second in its first race. For the second-round of the VLN the team went one step higher and took the first overall victory for the Haupt Racing Team, marking the first days in the team's success story.

HRT performs on a top level of power & quality and is competitive in every race. Already in its first racing season, the team achieved race wins and podium positions in the NLS and GTWC series.

Furthermore, the team was able to impress with a successful participation in the 24h race in Spa as well as at the Nürburgring. By expanding the race program with the 24h race in Dubai in the 2021 season, HRT races worldwide with overall and class victories through 2022 and 2023.

The Haupt Racing Team is entering a new era in its success story: Starting the season 2025, HRT will compete as factory supported team with the Ford Mustang GT3 as a part of a long-term cooperation spanning multiple race series.

# OFFICIAL FORD PERFORMANCE TEAM

# THE FOUNDER

## HUBERT HAUPT

Hubert Haupt is not only the founder of HRT, but also a visionary pioneer – whether as a racing driver with DTM experience and success in major endurance races, or as an entrepreneur and developer of large and innovative real estate projects. Since 2020, he has been writing a new chapter in GT3 racing with HRT.

# THE NÜRBURGRING OUR HOME IS THE GREEN HELL

The Nürburgring-Nordschleife – the infamous “Green Hell” – is regarded as both the most beautiful and the toughest racetrack in the world. No location could be more appropriate for a team with such high quality expectations as HRT.

Just a few meters from the race track is the newly built, large and representative HRT RACE BASE for all our races, tests and events.

# HRT RACE BASE

In 2021, the construction of the new HRT RACE BASE started on a 21,500 square meter commercial property directly at the Nürburgring. Since February 2023 this new company site serves as a new hub for all national and international HRT operations. The prestigious headquarters is also a state-of-the-art event location with cool style, functional technology and innovative equipment.

# HRT RACE BASE

*The ideal base for race car preparation,  
technical support and as a showroom and event venue*

# FORD MUSTANG GT3

**ENGINE**  
5.4L naturally aspirated Coyote V8 engine  
Max engine speed: 8,250 RPM

# BENCHMARK FOR TECHNICAL KNOW-HOW IN MOTORSPORT

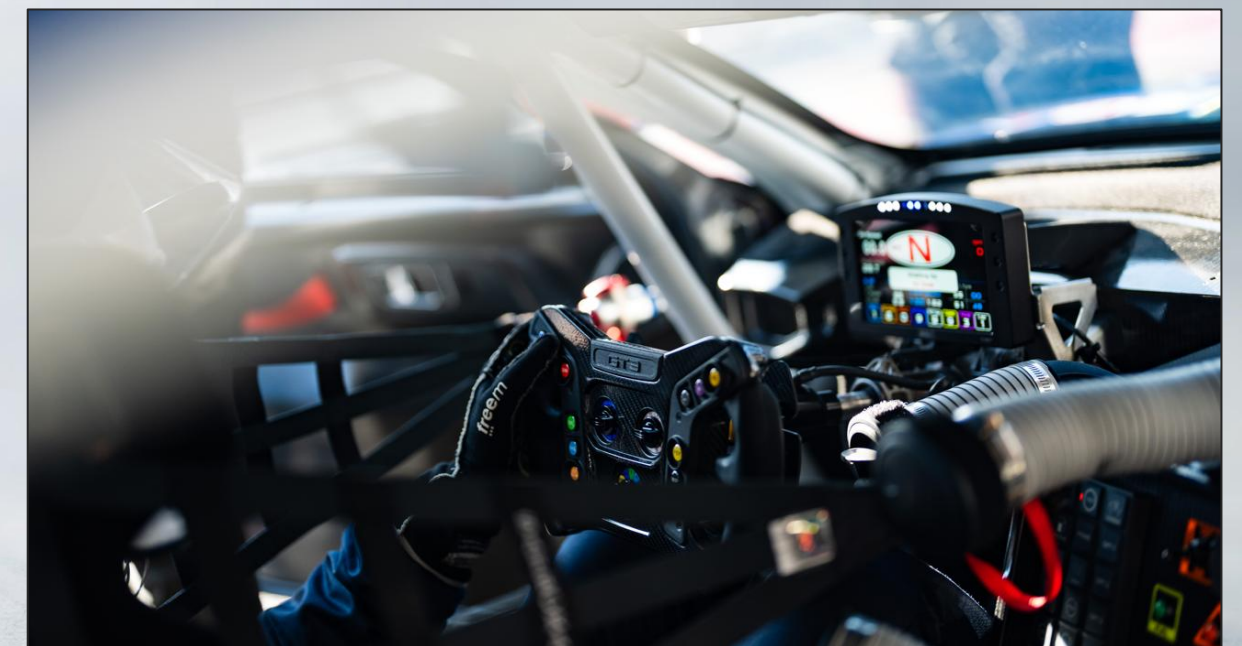

Numerous successes confirm our expertise in the development of driver-specific setups for different conditions

HRT's mechanics and engineers prove their skills in the most demanding international racing series

With the most advanced technical equipment we ensure best practice processes with regards to vehicle set-up & safety

# HIGHEST STANDARD IN ALL AREAS

Our aspiration to be the best goes beyond the racetrack. With HRT, we are also setting new benchmarks for the GT3 segment in all matters concerning our race outings - with a professional presence on all levels and a consistently attractive appearance, right down to the smallest detail.

# HRT'S PROMOTION OF YOUNG TALENT

HRT has always been strongly committed to promoting young talent. A new milestone is the company's own kart team (in cooperation with SIM-ON), which will race under the "Haupt Racing Team" license from the 2025 season.

It will compete in the German Kart Championship (DKM) and the IAME Euro Series. In addition, selected races of the ADAC regional series (SAKC, WAKC, OAKC) and the German Karting Series will be contested.

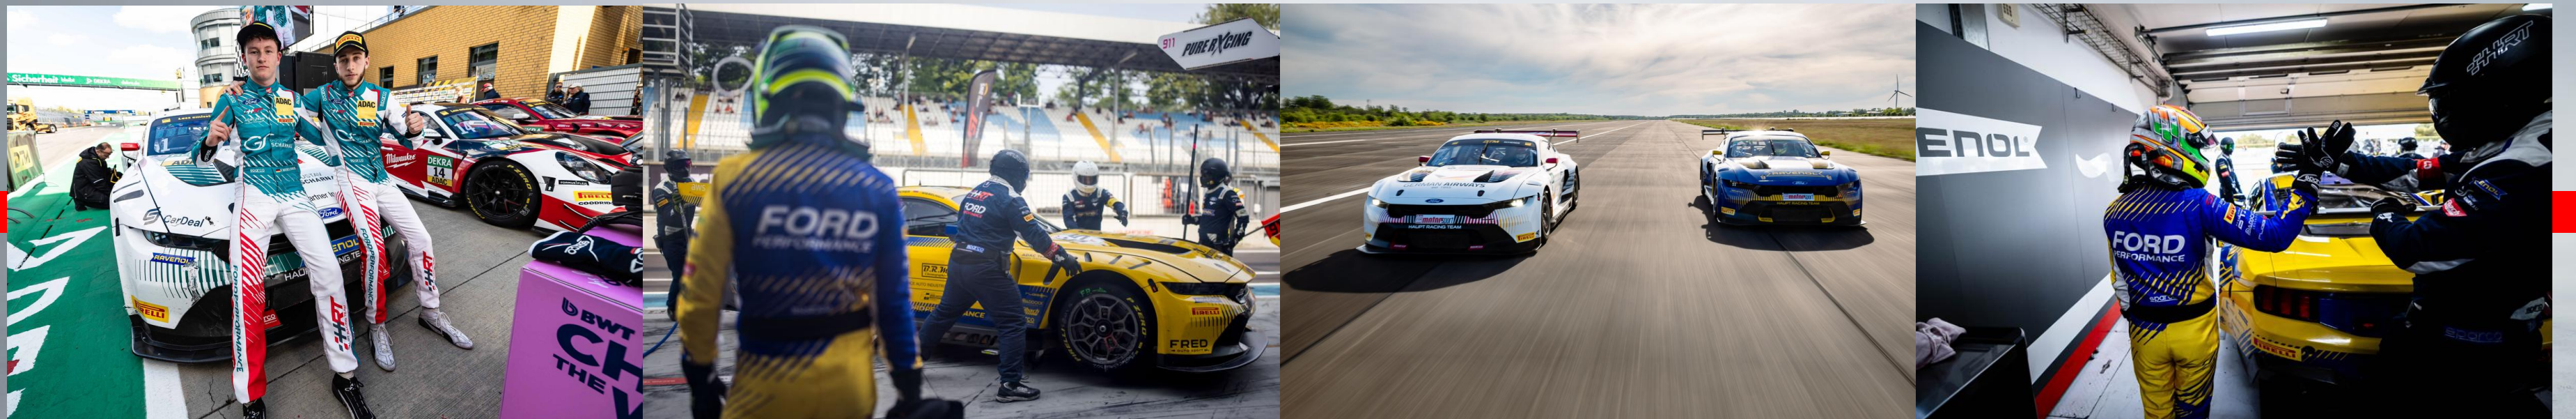

With this new offer, HRT is creating the unique opportunity to promote drivers holistically – from the first steps in karting to the top in GT3 - all under the motto "Road to DTM".
