

# PR EAST FZ-LLC

---

DESIGNED TO MEET THE MOST  
DEMANDING NEEDS OF ALL  
MARKET PARTICIPANTS IN A  
SECTOR OF THE ECONOMY

We have unique knowledge, vast experience and a huge supplier base in this area, including our own production.

Our company is designed to meet the most demanding needs of all market participants in this sector of the economy.

Here you will find the necessary equipment for all types of drilling rigs, mud pumps and blowout preventers.

We are also pleased to offer our customers advanced materials in the field of construction, one of which is unique refractory coatings for the processing of load-bearing metal structures, building structures, ventilation and smoke exhaust systems, as well as storage tanks for petroleum products or liquefied gas.

# About company

*Our company conducts trading and procurement activities in the field of supply of drilling, oilfield, pumping and blowout prevention equipment.*

First of all, we closely follow new technologies and products, and most importantly, new companies appearing in this sector of the economy.

With the help of our company, as well as with the help of our partners, we conduct experimental industrial testing of new product samples.

With positive results, we strongly promote new equipment and materials, which in turn provides jobs for start-up companies.

This approach to work provides unique opportunities for all market participants.

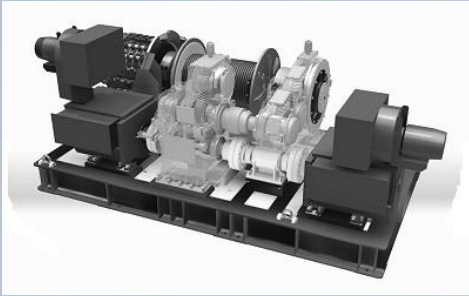

## Our mission

*We see as our main mission  
not the maximum  
extraction of profit, but  
creative work with all  
participants in market  
relations.*

*All only the best for a  
reasonable price!*

# Solutions

Drilling  
equipment

Blowout  
equipment

Units and spare  
parts for drilling  
pumps

Mud Pumps

Refractory  
coatings

# Drilling equipment

Employees of our company have been working in this direction for more than 20 years.

During our activity, we have established business contacts with many leading factories producing spare parts for drilling equipment, as well as rendered maximum assistance and provided orders to beginner manufacturers.

Our company is actively involved in providing equipment manufacturers with raw materials for production, which ultimately allows us to offer our customers the most favorable prices and delivery terms when concluding a contract.

We also set up our own production of blowout prevention equipment and spare parts for it. The equipment supplied by our company works and has proven itself all over the world.

*Our strongest point  
is the production  
and sale of drilling  
equipment and  
spare parts for it.*

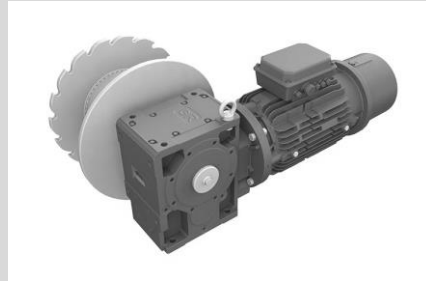

# Drilling equipment

- Drawworks and spare parts
- Drawworks lifting shafts and spare parts

- Top drives and spare parts
- Swivels and spare parts
- rotary tables

- Auxiliary winches
- Traveling systems (crown blocks, hook blocks)

- Gearboxes, transmissions and spare parts
- Cylinders hydraulic and pneumatic
- Dead end anchors

*We are pleased to offer you a short list of drilling rig units from leading world manufacturers.*

# Mud pumps

In collaboration with one of the manufacturers of spare parts for mud pumps, we provide it with high-alloy cast iron for the production of bimetallic bushings and polyurethane for the production of pump pistons, which enables us to offer a lower price than competitors and not only for this type of product.

Liners bimetal, ceramic; Piston rubber, polyurethane; Valve assembly (seat, valve, spring); Safety valve; Box hydraulic; Crosshead; Piston rod; Slider rod; Crank-slider shaft; Transmission shaft; Guide plate; Bearings.

*Our company offers a wide range of mud pump spare parts, such as Emsco, Gardner Denver, National, Oil well, Continental, Ideco, China 3NB, F-mud pumps.*

# Blowout equipment

We can not only offer equipment from leading world manufacturers for delivery, but also products of our own production, including analogues, which, in turn, can seriously reduce the price of products!

Ram BOP of any size and diameter; Annular BOP of any size and diameter; BOP control stations; Killing and throttling manifolds, including those in covered block boxes with a cooling system; Over-prevention and adapter coils; Crosses; Manifold valves; high pressure valves; Butterfly valves; Gate valves; Knife gate valves; Packing Elements; Rams and seals of the ram preventer; Pressure pipes; Pressure pipes with swivel flange; Sets of spare parts and tools for equipment installation.

Our company is designed to meet the most demanding needs of all market participants in this sector of the economy.

*Components and spare parts for blowout prevention equipment are one of our strongest points.*

# Refractory coatings

IT IS APPLIED AS A PAINT, ACTS AS A THERMAL BARRIER!

PR-East FZ LLC offers you - **liquid ceramic thermal insulation material Bronya**, superior in its thermophysical properties to well-known analogues. High-quality raw materials of the leaders of the chemical industry and a leading sales volume allow us to offer our customers an unprecedented price and an exclusive line of modifications of ultra-thin Bronya thermal insulators. And this is at the most stable and corresponding to the declared characteristics indicators.

The challenges that our products can solve are endless. These are not only thermal insulation and fire-resistant coatings, but also waterproofing, sound insulation, anti-corrosion coatings, and antioxidants.

*We are particularly proud to announce that our company is the only dealer of top lasting thermal insulation coatings Bronya in the UAE.*

# Refractory coatings

It is used to eliminate condensation on cold water pipes and reduce heat loss in heating systems. The Bronya heat insulator is operated at temperatures from  $-60^{\circ}\text{C}$  to  $+260^{\circ}\text{C}$ . The service life of the material is from 15 years. Today, VARIOUS TYPES of OUR MATERIAL are WIDELY used at facilities and enterprises of various fields of activity:

- Bronya facade NF is an ultra-thin heat insulator that can be applied in layers up to 1 mm thick at a time, and has increased vapor permeability.
- Bronya Classic NF is the best liquid thermal insulation you've ever worked with. It is a film-forming modification that allows you to isolate objects with surface temperatures up to  $+200^{\circ}\text{C}$  on a permanent basis.
- Bronya fire protection NF- one-component structure Bronya fire protection NF is intended for increase in a limit of fire resistance of steel constructions, and constructions of industrial and civil appointment, from 45 min to 120 min. Increases the fire protection class (R) of the covered structure, from R45, R90 and R120 (certified).

Various versions, modifications and combinations of products can significantly save on building materials while significantly improving the technological performance of the object!

*Bronya liquid ceramic heat insulator is highly effective in thermal insulation of building facades, roofs, interior walls, window slopes, concrete floors, hot and cold water supply pipelines, steam pipes, air ducts for air conditioning systems, cooling systems, various tanks, tanks, trailers, refrigerators, etc.*
