QUBELOK

QUBELOK is a light fabrication system. It is perfect for creating lightweight projects such as bookshelves, frames, storage and display units, stands, planter boxes, greenhouses and even animal pens. If you can think of it, you can build anything.

Timber

Shelves or table tops of 17mm timber or particle board fit neatly on the low set lip support.

Glass

When fitting glass or perspex, turn the lipped tubing over to set the lip height to 6mm.
