

# Security Meshes

Our commitment to excellence extends to our rigorous testing procedures. SecureView security doors undergo a range of stringent scientific tests to ensure they outperform the harshest Australian conditions. From Knife Shear Test to Cyclone Screen Test, our products exceed Australian Standards AS5039 when fitted with a triple lock and provide unmatched protection for your home.

|                      | SecureView                                                                                                                                                                                                       | Xceed                                     |
|----------------------|------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|-------------------------------------------|
| Hole Aperture        | 1.575 mm                                                                                                                                                                                                         | 2.200 mm                                  |
| Pet Door Options     | Yes                                                                                                                                                                                                              | Yes                                       |
| Materials            | Constructed with T316 Marine Grade Stainless Steel Mesh and an extruded aluminium frame.                                                                                                                         | Structural grade aluminium alloy 6063-T5. |
| Finish               | Gold accredited Interpon powder coating to Australian Standard 3715-2002.                                                                                                                                        |                                           |
| Australian Standards | Exceeds the Australian Standards 5039-2023 when fitted with triple locks.                                                                                                                                        |                                           |
