

Data-Driven Optimization For Asset

The next standard in building performance

Buildings are one of the largest energy consumption
Responsible for nearly 40% of global energy

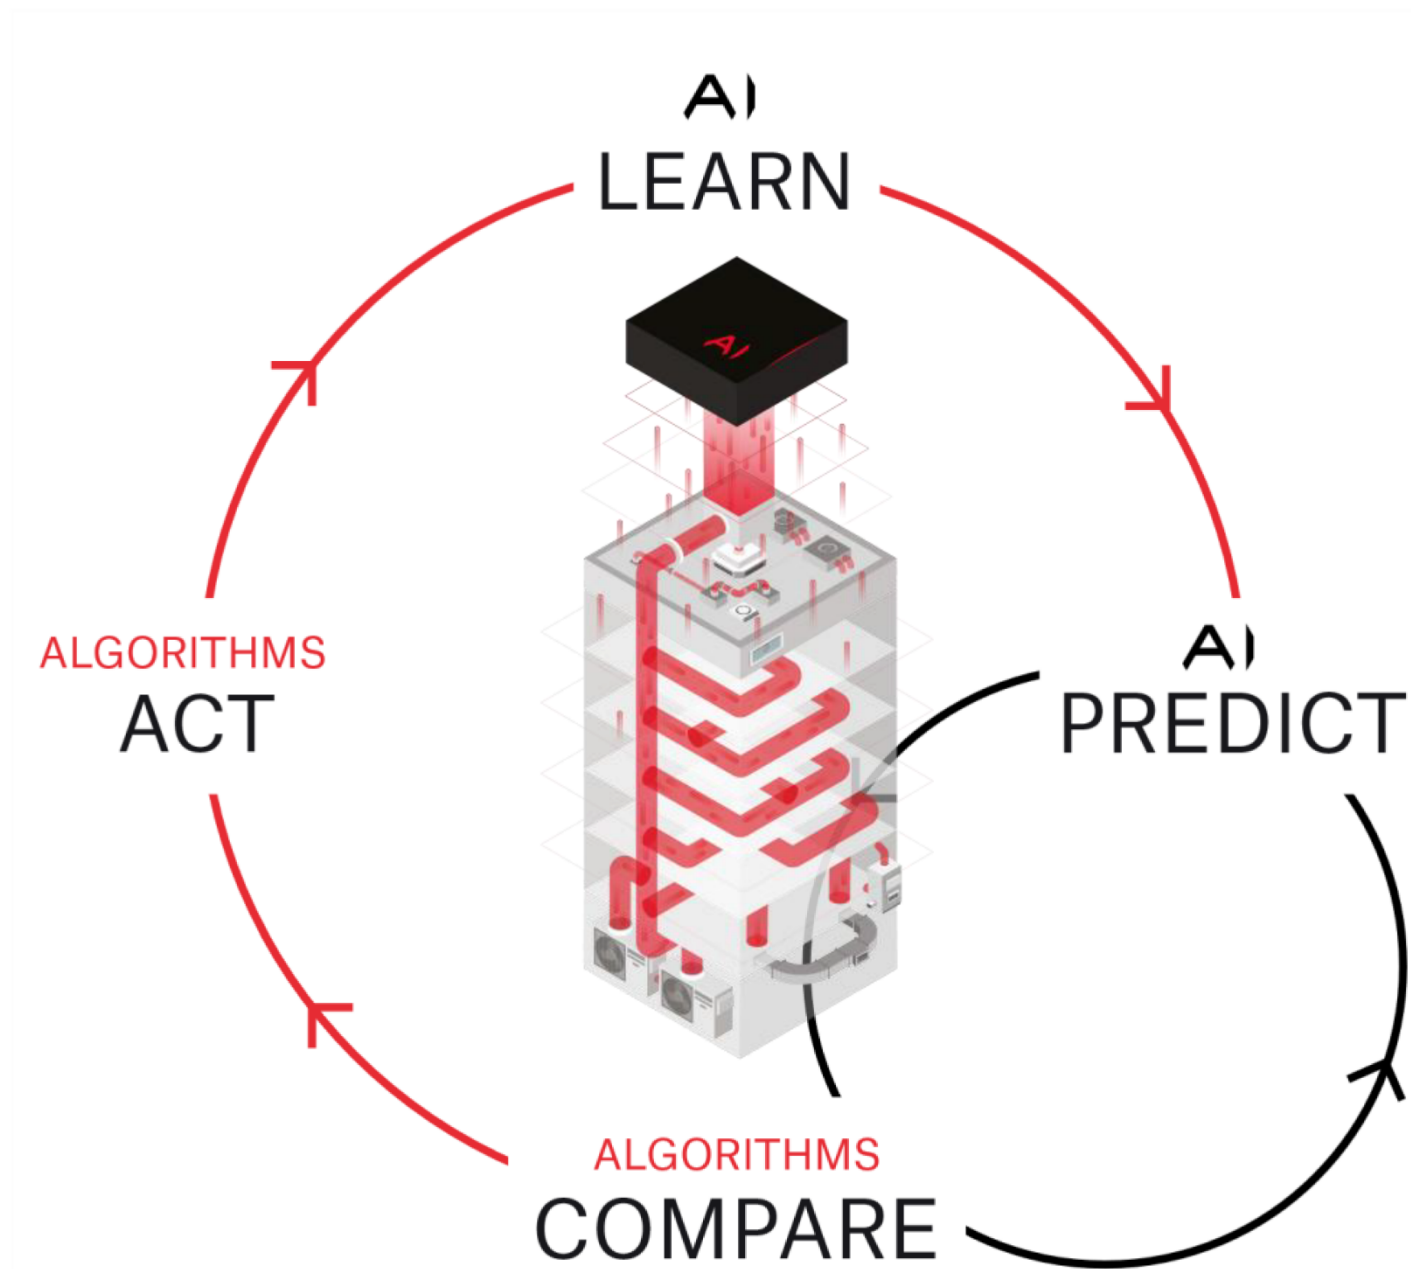

The problem — and the **solution**

- The systems currently in use are reactive, manual, and dependent on people who are already stretched to maximum capacity.
- **BrainBox AI has the solution to target and execute against this challenge.**

BrainBox AI helps control your building HVAC system

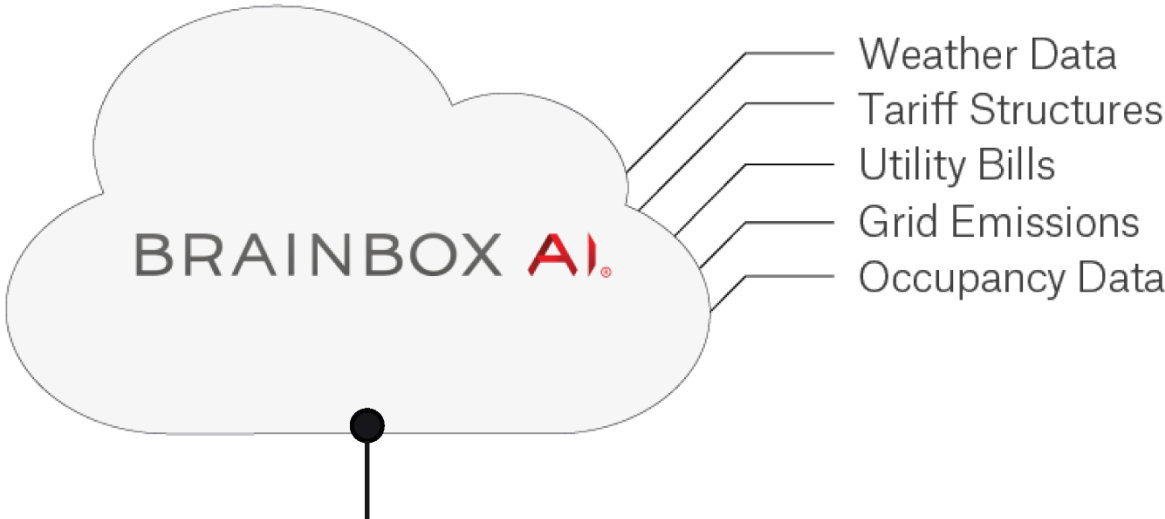

Continuously self-optimizing 24/7/365

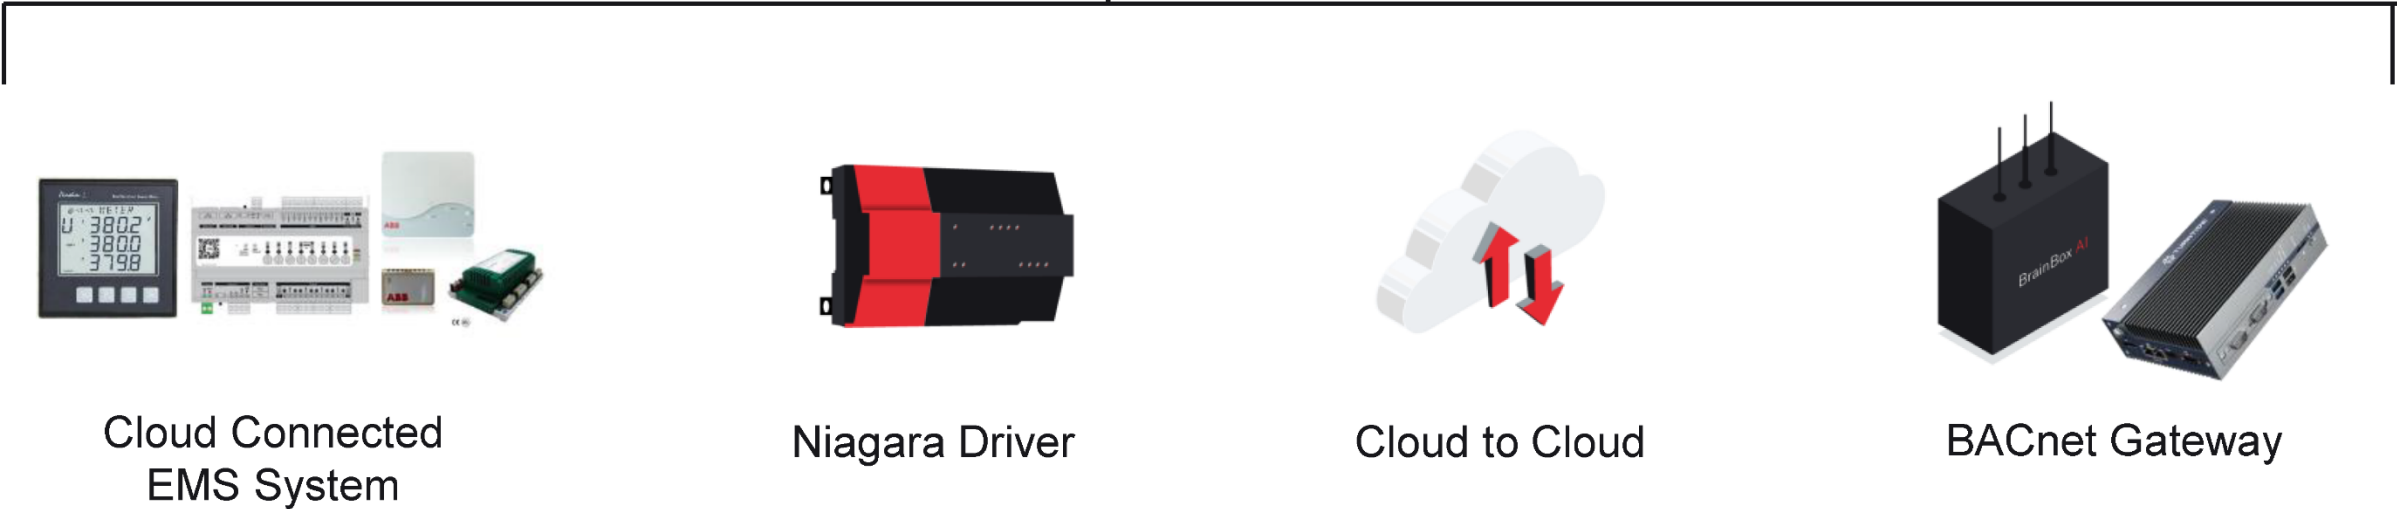

- Unlike recommendation-based platforms that rely on teams to act, BrainBox AI closes the loop by writing setpoints directly to your controls, autonomously.
- Actionable insight without the complexity of data and reporting.
- BrainBox AI acts: our algorithms learn your buildings, forecast 24 hours ahead, and autonomously adjust your controls — no hardware changes required.

Extensive enterprise-grade connectivity & control options

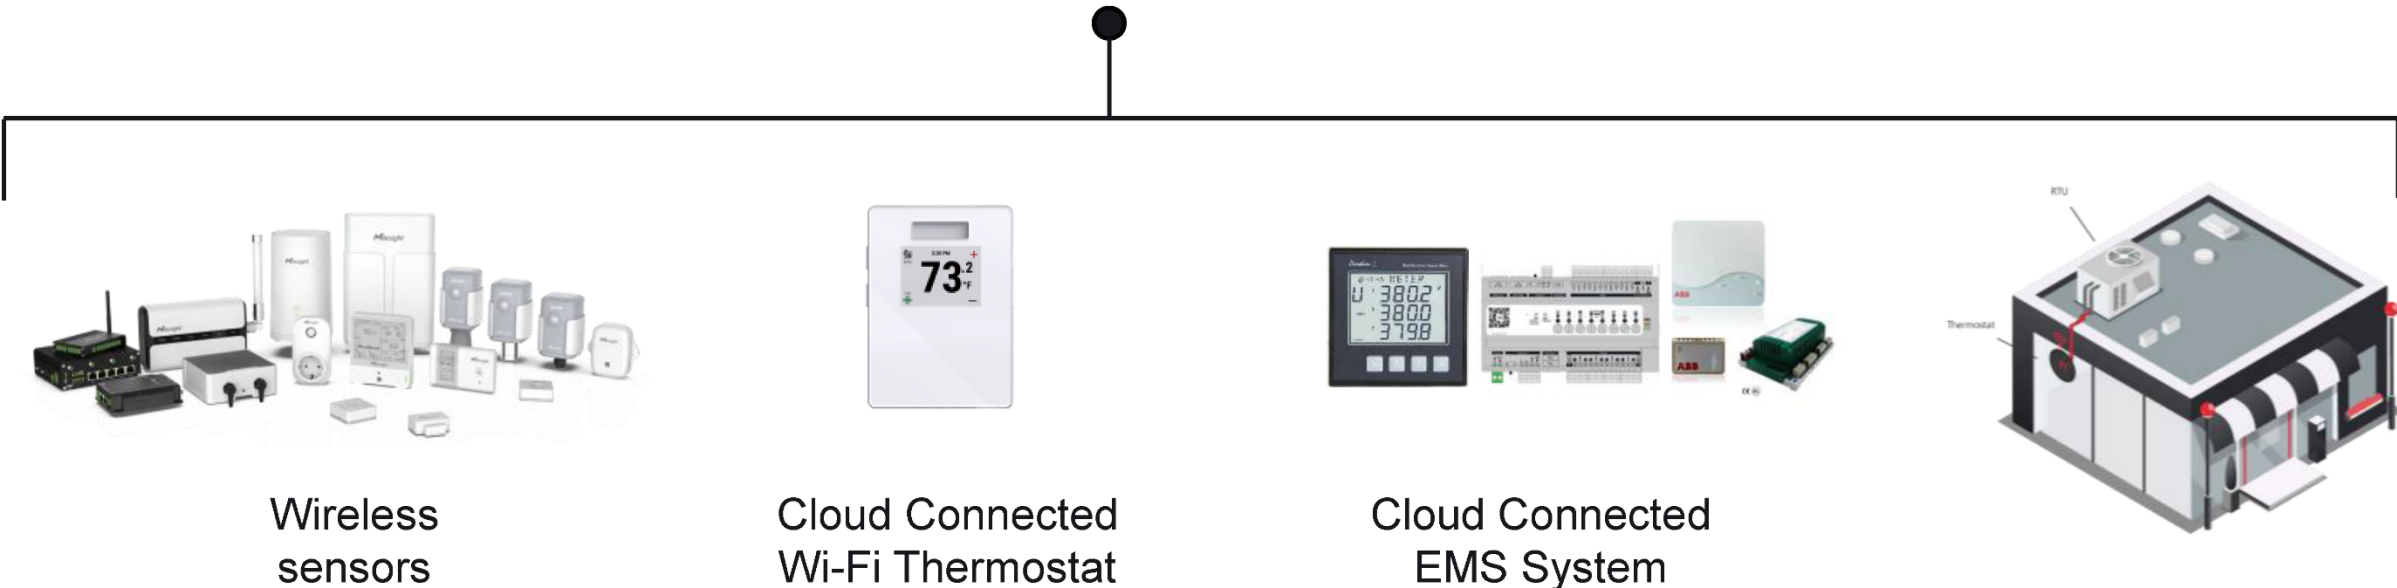

Cloud-native platform

Connectivity

Sensors

Proven performance across every asset, system, & equipment type

Seamlessly integrates to unlock unparalleled efficiency & performance

Building Types Optimized

Retail

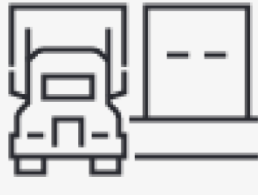

Distribution Center

Mall

Office

Transport

Airport

Control Systems Integrated

HVAC Equipment Modulated

- Rooftop Units
- Heat Pumps
- Fan Coil Units
- Air Handlers
- Chillers
- Boilers
- Cooling Towers

We are a Trane Technologies company, enterprise grade,
backed with one of the largest building technologies companies

	Action	Outcome
Building Assessment	• Comprehensive evaluation of your building portfolio • Producing a detailed estimation report • Quantifying your current energy baseline and identifying optimization potential	Baseline established
ROI Analysis	We present a data driving ROI specific to your portfolio	Business case validation
Endorsement	Our commitment is to deploy where we can deliver measurable, defensive results	Deployment begins

Our
impact

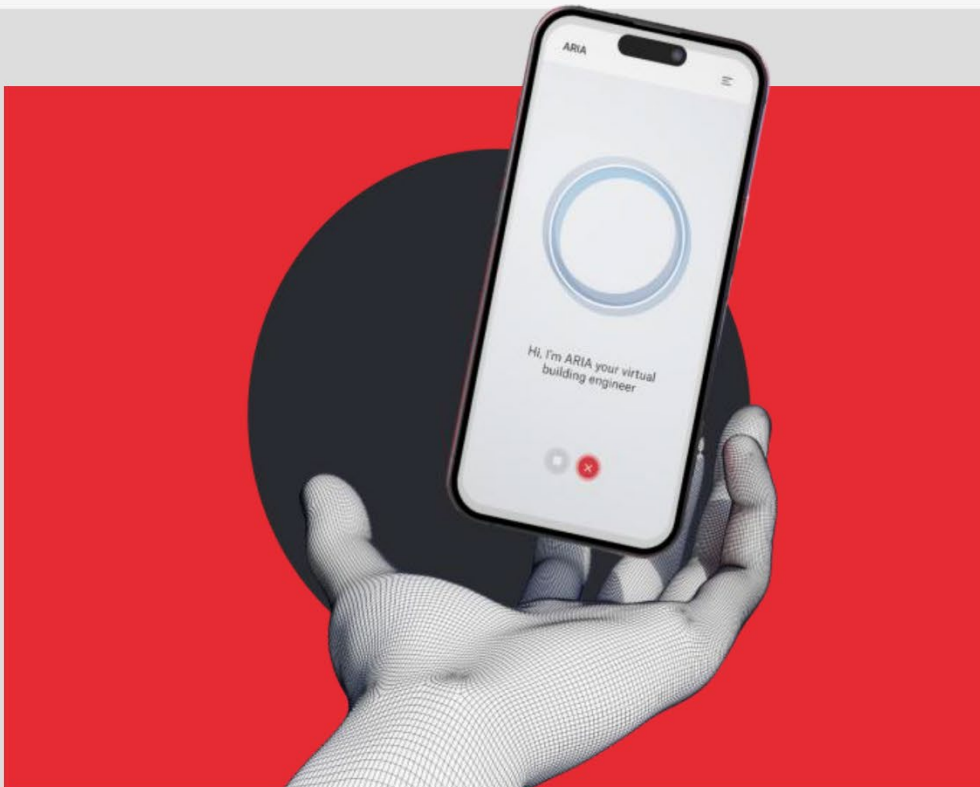

20,000+
buildings optimized

46M+
kWh saved

3,500+
cities impacted

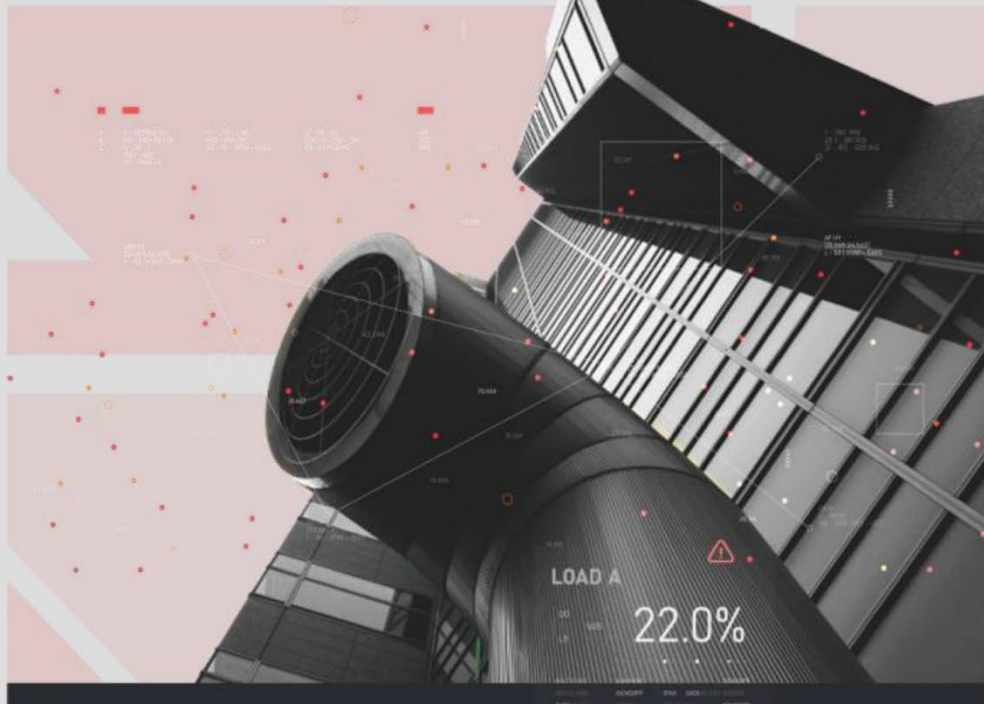

325M+
total sq. ft. managed

Our suite of solutions

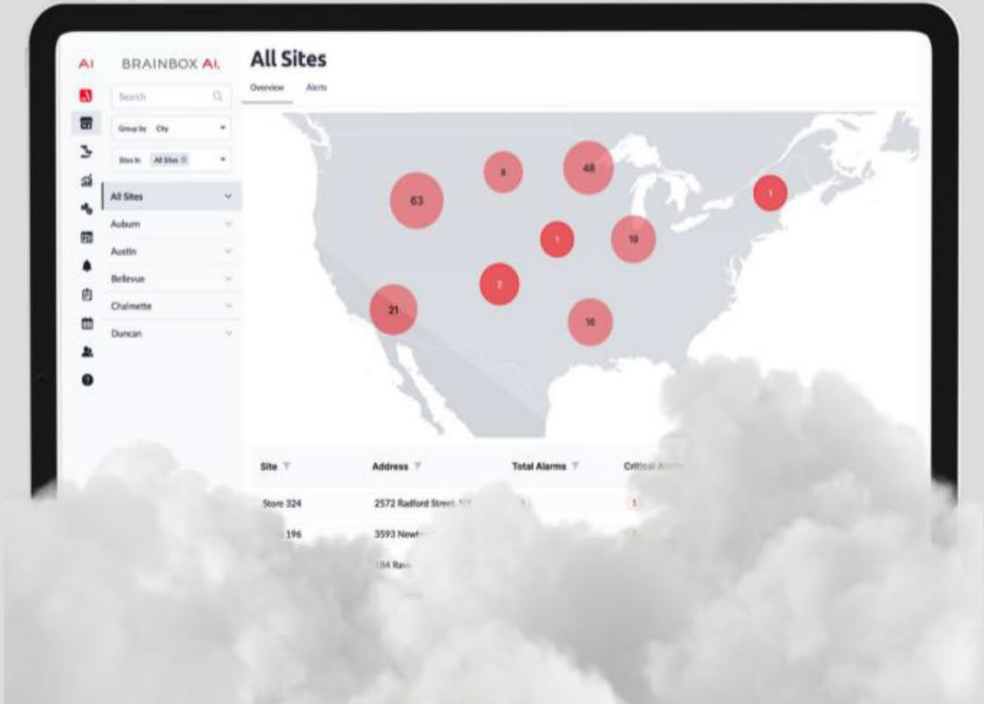

ARIA

An AI building engineer that serves as the essential companion to facility managers.

AI Control

The AI technology that autonomously reduces your HVAC system's energy consumption.

Cloud BMS

A world-class BMS that provides control over your entire building portfolio from the cloud.

Global leader in autonomous **AI** buildings
