

PHOTO SERVICE

With over 300 matches we cannot have them all captured by a single photographer. But we ensure there are enough photos to give a good impression of the 2026 World Cup in Rotterdam!

To create that impression, our photographer looks around and takes pictures all days. To provide structure, we have defined a number of categories that together represent the event. When you look at the photos later, you will look back on a fantastic World Cup.

You will find an online photo album on our website. You can download the photos for free!

One of our categories is 'team photos'. We offer you and your team a unique opportunity to have a team photo taken in a World Cup setting. Our 'team photo booth' is open every day at various times.

On the final day, we take photos of the newly crowned world champions, the runners-up, and the bronze medal winners, all, of course, in a unique World Cup setting.

More information about the photo album will follow soon.
