

# WORLD CUP HOCKEY ROTTERDAM '26

## SAFE & SECURE

We all know an accident can happen in an instant - either on or off the pitch, but also in open space, where ever you are. When you're visiting an area you don't know, it's good to have the right information 'just in case of'.

In Rotterdam we have an app for that! It's known as "the most disastrous app" - because it's helpful for all disasters.

The Rijnmond Secure App is a service of the combined security services in the greater Rotterdam area. The app informs you about actual incidents and other safety issues that may affect you, and it informs you what to do. Even so the app connects you directly to emergency services when you want to report an incident or when you need immediate assistance. In the menu you can pick your preferred language.

**⚠ Important note:**

**In case of an incident at HC Rotterdam or HV Victoria, contact the service desk immediately! Our service staff will co-ordinate help and contact the needed service(s). If you're a professional care taker, please make yourself known.**

You can download the "Rijnmond Veilig" app in your preferred app-store.
