## Our IP devices

We've tested and configured all our IP devices to make sure they work perfectly with our Business Cloud Phone service. So to make sure you experience the quality of calls you'd expect, only IP devices from our Cloud Phone portfolio can be used.

## Overview

Our Business Cloud Phone System IP Phones are an ideal choice for businesses of any size

We configure them for you so they're easy to set up and use, and will help to improve your voice communications. You can add more sites or users quickly and easily and benefit from improved functionality.

You may already be using our Cloud Phone service and are now looking to add more devices to your phone system. Or perhaps you're switching to Cloud Phone and simply want the best phones for your business. Either way, we have a range of IP Phones to meet your needs. To highlight what we offer and to help you make a choice, we've summarised the key features and benefits of each phone or phone range.

# Our IP phone portfolio

## Designed to meet your day-to-day needs

### Poly VVX range

The Poly range of IP phones offers something for every business, whatever your needs. Whether you're looking for an entry-level phone that's suitable for general use, a mid-range model that meets the communication demands of office workers and call attendants, or best-in-class desktop productivity and unified communications for busy professionals – there's a model to suit you.

If you want crystal clear communications, enhanced collaboration and improved personal productivity, a Polycom phone is an ideal choice. Plus, you'll get all the help you need to set up your phone, so you can hit the ground running.

### Poly VVX250

Ideal for general office use and anyone handling a low to moderate number of calls.

#### The benefits

- Efficient call handling with a simple and intuitive user interface which makes navigation easy.
- HD ready for crystal-clear conversations.
- Comes with a power supply unit and preconfigured for your Cloud Phone service so you just need to plug it in and you're ready to go.

### Poly VVX450

Mid range business phone ideal for SoHo, office staff and call centre workers.

#### The benefits

- Modern design and colour display screen makes call handling simple.
- HD ready for crystal-clear conversations.
- Comes with a power supply unit and preconfigured for your Cloud Phone service so you just need to plug it in and you're ready to go.

### Poly VVX601

Premium business phone ideal for corporate executives and business managers.

#### The benefits

- Large high-resolution colour screen with touchscreen functionality makes it easy to use.
- Gesture-based, smartphone like operation.
- HD ready for crystal-clear conversations.
- Comes with a power supply unit and preconfigured for your Cloud Phone service so you just need to plug it in and you're ready to go.

### Poly VVX450 or VVX601, complete with an Expansion Module

Turns the Poly VVX450 or VVX601 into an attendant console for receptionists or other admin staff who manage multiple calls on a daily basis.

#### The benefits

- Module has multi-function line keys that can be set up as busy lamp fields, speed dial or call appearance.
- No separate set up as power and signalling is provided by the host VVX.

# Our IP phone portfolio

## Answer calls from any desk

### Yealink W60P

Get more mobility, even when you're in the office with the Yealink W60P. Need to leave your desk? Simply take the handset with you when you move around and you won't miss any calls.

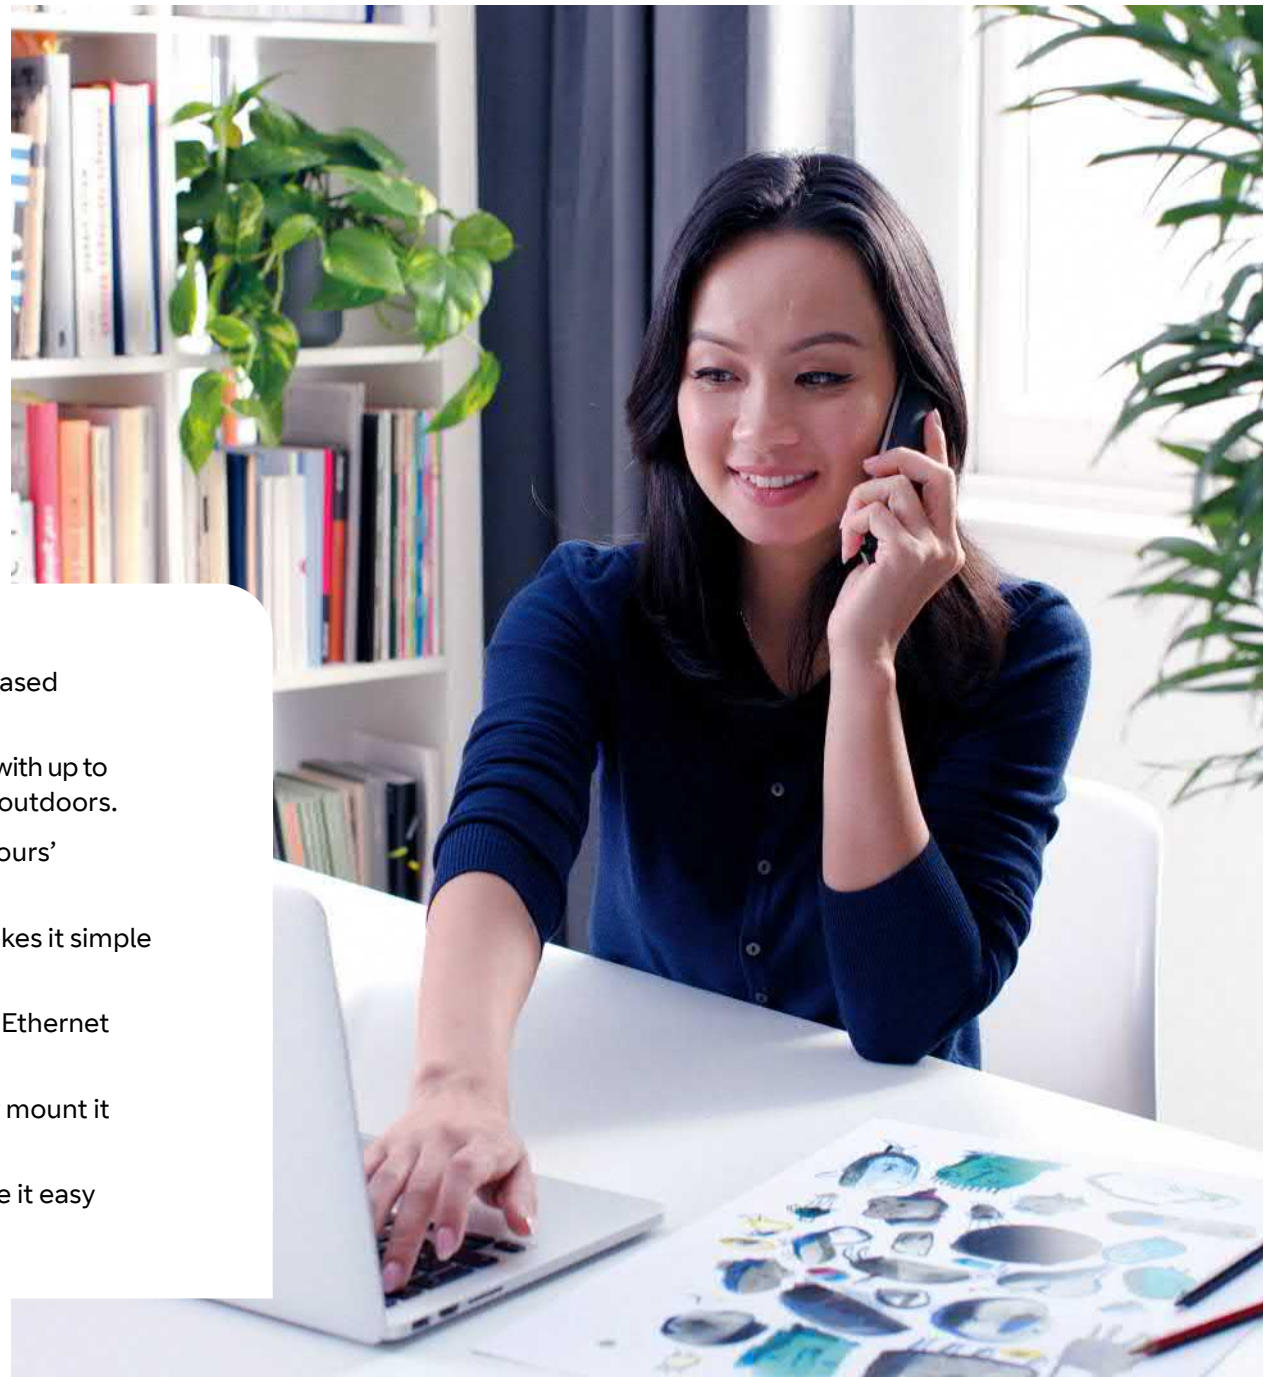

This flexible phone system uses industry-standard Digital Enhanced Cordless Telecommunications (DECT). Keeping your calls secure and sounding crystal clear.

Designed for small and medium businesses, it works with up to four handsets. Need more? You can buy extra base stations, but each one will need its own Cloud Phone user licence.

### The benefits

- Wireless and HD-ready for SIP-based communications.
- Roam freely without missing a call with up to 30m coverage indoors and 100m outdoors.
- Get 11 hours' talk time and 120 hours' standby time.
- A 1.8-inch colour LCD display makes it simple to use.
- Hear every word with Power over Ethernet (PoE) Class 1.
- Choose to keep it on your desk or mount it to the wall.
- Over-the-air (OTA) updates make it easy to upgrade.

# Our IP phone portfolio

## Hear everyone loud and clear

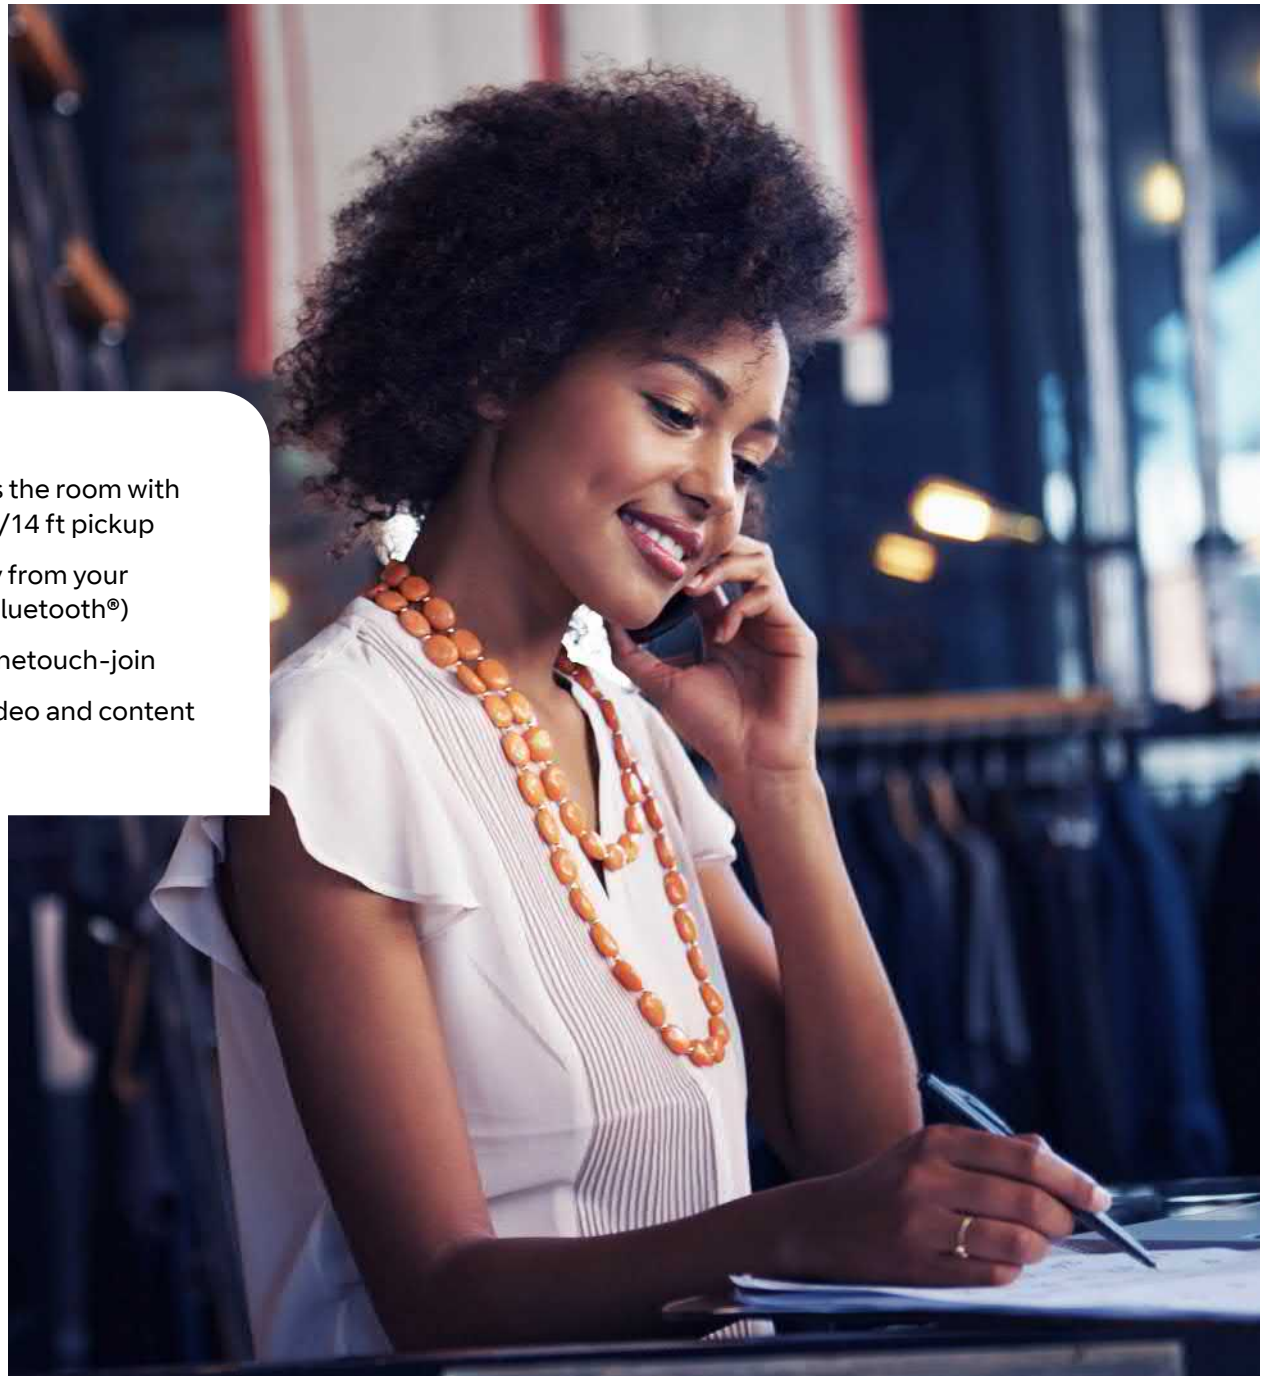

### Poly Trio 8500 Conference Phone

The Poly Trio 8500 is an advanced conference phone that's designed to deliver superior performance. With advanced features and remarkable voice quality, it transforms ordinary conference calls into interactive conversations that sound as natural as if you're talking face-to-face. It's designed for small to medium-sized rooms.

#### The benefits

- Poly's legendary voice quality fills the room with HD Voice 14 kHz audio and 4.2 m/14 ft pickup
- Enjoy versatile audio connectivity from your preferred mobile devices (USB, Bluetooth®)
- Start a meeting in seconds with onetouch-join
- Make decisions faster with rich video and content sharing options

# Our IP phone portfolio

## An affordable option packed with features

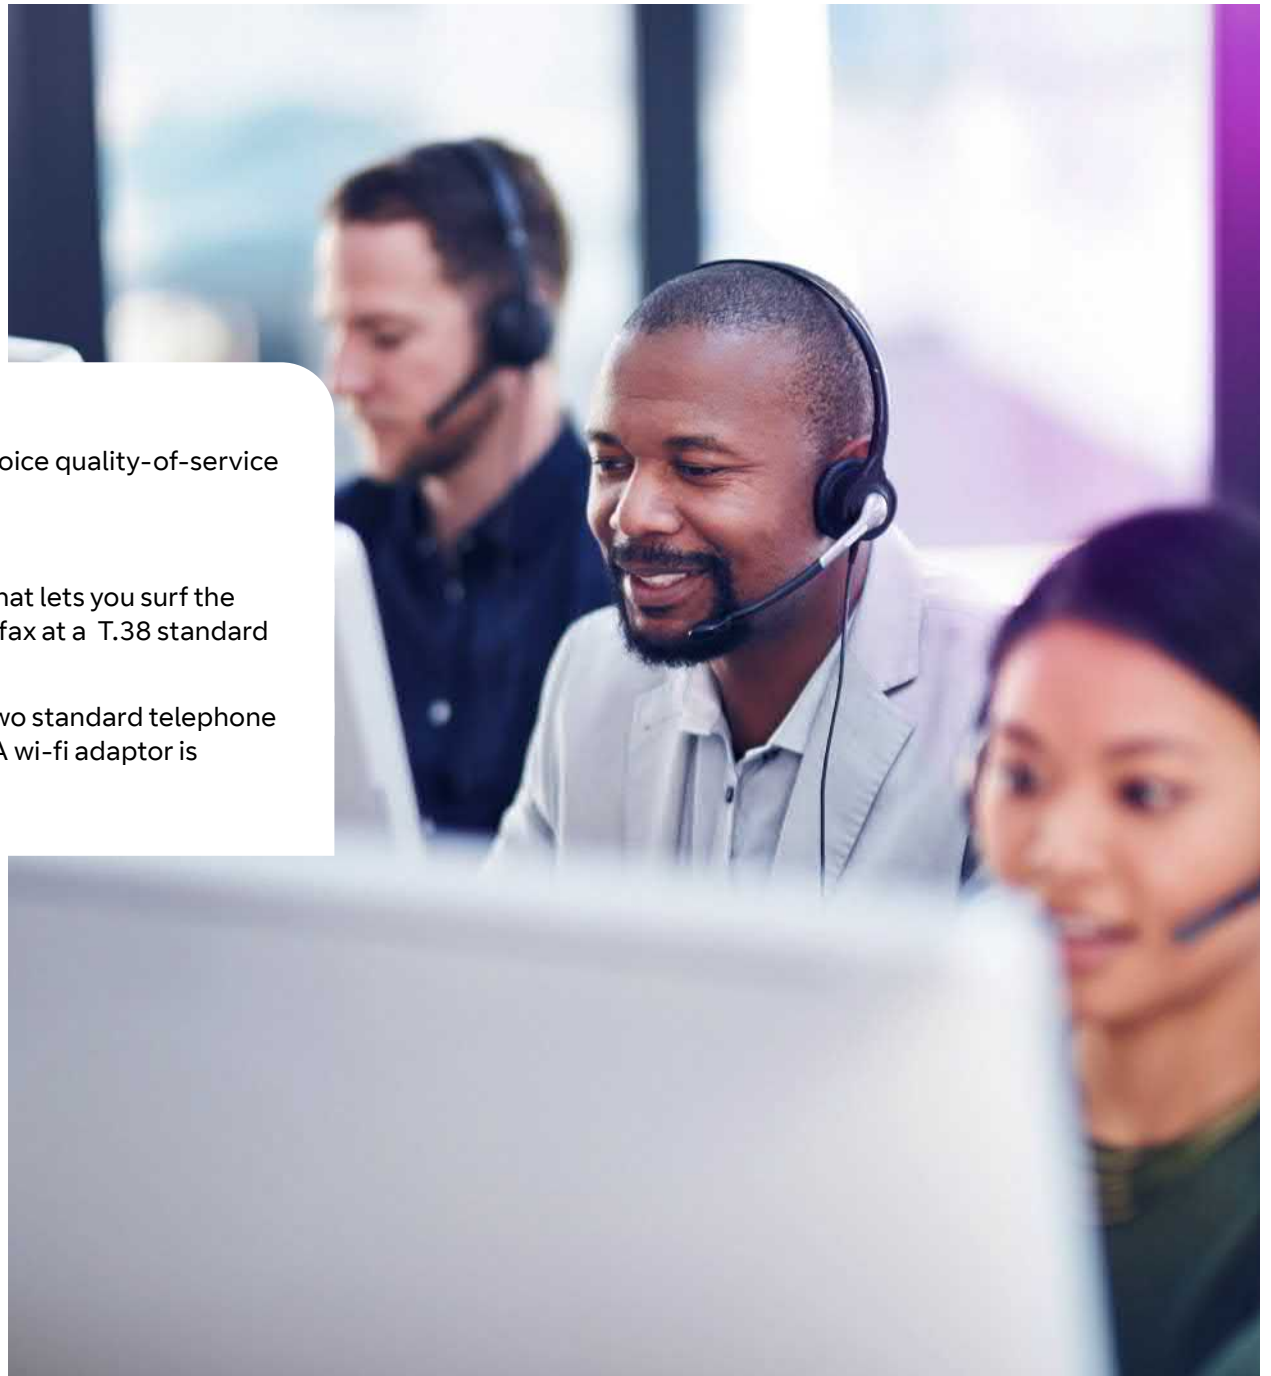

### Poly OBi302 Analogue Terminal Adaptor (ATA)

Are you new to IP technology? The Poly OBi302 lets you connect analogue devices to our Cloud Phone service. So you can get more out of your existing phones, conference speakerphone and fax machines. While still embracing the digital world.

#### The benefits

- Hear every word with advanced voice quality-of-service (QoS) capabilities.
- Stay secure with encrypted calls.
- Get more done with this system that lets you surf the web, be on the phone and send a fax at a T.38 standard all at the same time.
- Connect any way you want with two standard telephone ports, plus WAN and LAN ports. A wi-fi adaptor is also available.

# Appendix

## Features designed to keep your business talking

Business Cloud Phone System gives you access to a comprehensive set of features to make it easier to manage your calls. And remember you also get these added-value extras.

### Call logs

You can get a simple, or more detailed, view of call activity across your whole estate from our Cloud Phone portal.

### Mobile app

You can take your business, including your entire phone system, anywhere with our Cloud Phone service.

The mobile app (Android and iOS) works on tablets and smartphones and allows you to make and receive calls using the main business number (via 4G/5G\* or wi-fi).

### Meetings

Our 'Meetings' feature helps you reduce the time and cost spent on travel. When you're in a different location to your customers and colleagues, you can host conference calls, share your desktop, and make video calls.

### Fax

There's no need for a separate fax machine. Our Business Cloud Phone system can receive faxes as well as handle voice calls.
