## YEEP! Locker Installations - Nationwide

### Objective

YEEP! is one of the top three locker providers in the UK, with a rapidly expanding network of lockers deployed nationwide. The company aims to install 8,000 lockers over the next three years and needed to expand its installation partner network to ensure it could meet these ambitious targets.

### Solution

DDPE has extensive experience in the locker installation industry, having worked with a number of clients. YEEP required a partner who could mobilise quickly to meet the demands of a new client eager for rapid installation.

With storage facilities ready, we took delivery of over 150 lockers within two weeks. We built and programmed the units, organised logistics, and deployed an installation team to complete installations nationwide—delivering a fast, seamless solution that met YEEP's tight deadlines.
