

The Aussie UnderCover® difference:

- [Climate Care Certified by SPASA Australia](#)
- The first and still the most economical hidden pool cover system in Australia
- Three (3) kit installation styles in ELEVEN (11) adjustable sizes to suit your requirements and pool surround making it the only virtually invisible "hidden pool cover system" that you can walk on!
- Fully sealed aluminium and stainless steel gearbox with a smooth and reliable winding/rolling operation for 1 person
- Self-supporting winding handle which makes cover adjustments easy, if required
- Or, Powered semi-remote control with 24V low watt transformer
- No hot metal surfaces around your pool - no burnt feet in summer!
- With the lid closed NO CONDUCTIVE surface around your pool (exposed conductive surfaces within 1.25m of the water must be connected to an equipotential bonding connector AS_NZS_AS_NZS_3000-2018)
- Australian manufactured and Australian family owned.

Our powered system is 24V low watt, therefore an electrician is not required for installation other than providing an appropriate power point where the pool equipment is located.

Installation Overview - <https://youtu.be/Odlkc7-oTLQ>

Options

Additional Cross Braces	\$18.00	To line up screw lines on Under Deck installations
Lid Frame Joining Brackets	\$30.00	* Extended joiners can increase length by 120mm or **240mm

If you are lining up the outside edges of the pit and lid frame to the outside of cover width, ensure your quoted kit size is appropriate using the charge below.

Kit Name	Approx Waterline		Lid Min	Lid Max
	Pool Min	Pool Max		
Petite	1.50	1.80	2.30	2.50*
Narrow	1.85	2.30	2.73	3.05*
Small	2.40	2.90	3.10	3.58*
Medium	3.00	3.60	3.70	4.20*
Large	3.70	4.10	4.40	4.8*
LargePlus	4.20	4.20	4.40	4.90
Super (2 lids)	4.30	4.80	4.95	5.50**
SuperPlus (2 lids)	4.80	5.40	5.46	6.10**
SuperMax (2 lids)	5.50	6.00	6.20	7.30**
Custom (2 lids)	6.10	6.60	6.20	7.30**

* Extended joiners can increase length by 120mm or **240mm

Our system does not come in a pre-made 'box'. The structure required to house the system is created onsite. Either a concrete pit, block structure or deck structure. This allows you to conceal it completely, and support the weight of tile, timber or other products on the lid. All specifications supplied. (Refer to our Technical Information and Installation Methods for guidance).

Pool Covers & Rollers (seam joins 1.27m & 2m-Sol+Guard)

Our Raw Bubble Material is [Smart WaterMark Approved](#), is [Climate Care Certified](#) and is made in Faulkner, Victoria at Australia's leading Bubble Supplier – Sealed Air Australia. We manufacture all of our pool blankets onsite on the Central Coast, NSW. Each Solar Blanket is produced by a member of the family, so the consistency and the quality of our solar blankets never waivers.

Daisy Pool Cover (1.27m Seams)

The pool cover will require trimming onsite unless you opt for the pre-cut - Fibreglass pools (not all shells). Pre-cut for rectangular concrete pools Sydney & Perth only. Covers for all other concrete pools must be trimmed onsite.

NOTE: we do not recommend a pre-cut for fibreglass pools with a step out (ie Harvest Contemporary, Narellan Symphony, Leisure Elegance, Compass Vogue etc) as Daisy will not guarantee that the step area will be seamed correctly along the pool edge line to enable the step to fold flat.

The **Daisy Ultradome®** Pool Cover has been Climate Care Certified. The Climate Care Certification Program is an initiative of the Swimming Pool & Spa Association of Australia Ltd (SPASA). It is the industry's efficiency and sustainability certification program. climate-care-certified-register/ultradome-pool-cover/

If you are using a non Daisy pool cover you may require a cover attachment kit to suit our system @ \$30.50.

Aussie Pool Covers (2.0m Seams)

The **GeoBubble®** Technology has been certified by Smart Approved Watermark. <https://www.smartwatermark.org/>. Certified water efficient products and services at work and in the garden.
