Welcome

With over 30 years' experience and service to the Central Coast, Lake Macquarie & Newcastle, Economy Waste Group provides efficient and cost-effective skip bin hire on both a short- and long-term basis to a varied range of industries and applications. Additionally, we supply high-quality recycled product materials to support sustainable practices. Our extensive range of trucks and bin capabilities cater to all industry requirements and individual project specifications. We run our own licensed Recycling Facility in West Gosford, where customers can also conveniently tip their waste. We pride ourselves on specialising in high-quality, process-driven Waste Solutions across the Central Coast, Lake Macquarie & Newcastle areas.

"As industry leaders in waste management solutions in the Central Coast area, we at Economy Waste Group are committed to driving innovation and sustainability in everything we do. Our dedication to recycling and reducing landfill waste not only sets us apart but also ensures we're contributing to a cleaner, greener future for our community."

— Samuel Calleija, Director, Economy Waste Group

Our Objective

At Economy Waste Group, our commitment to the environment is at the core of everything we do. Proudly serving the Central Coast, Lake Macquarie, and Newcastle regions, we provide sustainable, efficient, and economical skip hire and waste management services. Our EPA-licensed recycling facility plays a pivotal role in supporting the economy's shift towards achieving the goal of zero landfill.

As a company, our ultimate objective is to achieve a recycling rate of 95%, reflecting our unwavering commitment to sustainability and resource recovery.

Recycling Facility and Sustainability Commitment

Our EPA-licensed waste management facility operates in full compliance with the standards set by the Environment Protection Authority. A key strength of our operation is our outstanding recycling success rate, which we are continuously striving to exceed. Currently, we recycle approximately 85% of the waste collected through our skip hire services and direct facility drop-offs.

We are actively expanding the range of recyclable products we process, working toward our goal of achieving a 95% recycling rate. This aligns with the nationwide objective of zero landfill and ensures that as much waste as possible is diverted from landfill and repurposed for future use.

Our state-of-the-art recycling facility is equipped with advanced sorting and processing technologies, enabling us to maximise resource recovery while minimising environmental impact. We are confident that our continuous investment in cutting-edge technologies, machinery, and equipment will play a crucial role in helping us achieve our goals.

- **Processing Capacity:** Handling 30,000 tonnes of waste annually with a recovery rate of 85%
- **Recycled Materials:** We successfully divert waste streams into valuable resources such as metal, concrete, timber, and plaster board, repurposing them for reuse across various industries. Our recycled product offerings, including DGB20 Road Base and 40/20 Aggregate, further support sustainability and circular economy practices.
- **Environmental Impact:** Achieving an annual reduction in landfill waste, conserving natural resources, and lowering carbon emissions through the recycling and repurposing of 85% of processed waste, including materials like metal, concrete, timber, and plaster board.

Our commitment to minimising waste sent to landfills extends beyond our external services and is also implemented in our internal operations. We prioritise creating a safe workplace for our team, ensuring that our processes not only protect the environment but also our people.

Our dedication to quality is evident in our adherence to strict compliance standards, which guide us in meeting the highest levels of environmental performance. By continually investing in advanced machinery and technology, we enhance our recycling capabilities and ensure that more materials are repurposed and diverted from landfills. Furthermore, we empower our team with skills and knowledge to lead in sustainable waste management, while our customer service approach ensures that clients receive tailored solutions aligned with their environmental goals.

Customer Focus

We offer a complete and comprehensive solution for the management and recycling of waste. Our services are designed to seamlessly integrate with our clients' waste management systems, ensuring full compliance with their sustainability criteria. To further support our clients, we can provide a Waste Minimisation Report on request, demonstrating our commitment to helping businesses reduce their environmental impact. Our clients are our most valuable asset, we continually strive to improve the waste removal process and to provide exceptional service.

Client Testimonial

"Economy Waste Group has serviced Lendlease on various projects on the Central Coast over several years, with the latest being the \$215M Gosford Hospital Redevelopment. Their willingness to assist, their continued professionalism, friendly/quality/timely response of service, including high quality of supplied bins/general 'kit', including third-party engineering & commitment to Environmental Compliance & Innovations is second to none on the Central Coast & rivals' contractors I have personally used in Sydney on Major CBD Projects. Including my previous site, the \$1.2B Darling Harbour Live Project. Economy Waste is a true construction partner & integral to the continued successful delivery of The Gosford Hospital Redevelopment."

— Dane Lalic, Senior Site Manager, Gosford Hospital Redevelopment, Lendlease

Accreditations

ISO Accredited: Demonstrating our commitment to international standards of quality, environmental management, and occupational health and safety.

Green Star Accredited: Showcasing our dedication to sustainable building practices and environmentally responsible operations.

Member of the Waste Contractors & Recyclers Association of NSW: Demonstrating our alignment with industry best practices and our commitment to sustainable waste management solutions.

National Heavy Vehicle Regulator (NHVR) Accredited: Ensuring compliance with national heavy vehicle regulations and promoting safe, efficient, and sustainable transport practices.

Final Note

At Economy Waste Group, we are not just committed to meeting environmental standards—we are dedicated to exceeding them. Our success in recycling and waste management plays a crucial role in preserving the beauty and health of the communities we serve. We strive to ensure that our region remains a vibrant and sustainable place to live, work, and grow.
