*Hospitality pilot proposal for resource efficiency,
smarter operations and guest convenience*

The Hospitality Challenge

Hotels need convenient guest service with
lower operational and environmental impact

Guests expect convenient 24/7
access to refreshments

Hotels need low-effort, reliable
self-service solutions

Resource efficiency and waste
reduction are increasingly important

Stock availability, cashless convenience
and service quality must be consistent

Hospitality teams need measurable
sustainability and operational KPIs

Our Solution

DABO Green Vending Intelligence

A modular smart hospitality refreshment ecosystem

01 Smart coffee, snacks & beverages

High-quality selections and intelligent machines for every guest need.

03 Digital & cashless payments

Multiple secure payment options for a seamless and cash-free experience.

05 Waste collection & circular resource management

Smart waste collection and recycling to minimize environmental impact.

02 Refill water stations

Filtered, great-tasting water on demand, reducing single-use plastic.

04 Telemetry & remote monitoring

Real-time data and alerts to ensure uptime, stock availability and optimal performance.

06 Low-impact service operations

Efficient logistics and on-site support with a focus on sustainability and guest satisfaction.

DABO combines **convenience**, **sustainability** and **data-driven** operations in one scalable hospitality solution.

DABO Commerciale S.r.l. Società Benefit | Italy

Hospitality pilot proposal for resource efficiency, smarter operations and guest convenience

Sustainability & Resource Efficiency

Designed to reduce impact while improving service performance

- 1** 100% electric service fleet

- 2** Fewer unnecessary service trips through telemetry

The goal is not only to provide refreshments, but to make the service more measurable, efficient and responsible.

- 3** Refill water solutions to reduce single-use packaging

- 4** Dedicated waste separation and collection

- 5** Sustainable product choices and circular thinking

- 6** Measurable ESG and impact tracking

Technology & Smarter Operations

Connected devices, telemetry and data-driven service management

01 Connected machines and telemetry

Smart devices continuously send data for real-time monitoring and control.

02 Real-time stock and performance visibility

Live inventory and machine performance at a glance to prevent stockouts.

03 Predictive maintenance and smarter service planning

AI-driven insights predict issues early and optimize service schedules.

04 Digital and cashless payment experience

Seamless, secure payments for guests with multiple cashless options.

05 Higher product availability and faster issue resolution

Proactive restocking and remote support minimize downtime.

06 Operational data for better decisions

Centralized data and reports turn insights into smarter operational decisions.

DABO helps hospitality operators **reduce friction** while **improving reliability and convenience**.
