EXECUTIVE SUMMARY - BUSINESS

DABO HTS 4.0 srl is an Innovative Start Up with high technological value born from the idea of applying a new type of ultraviolet radiation coupled with a magnetic field. This innovative technology, which we call DABO HTS 7.3, enables the sanitisation of objects with two main advantages over the use of ultraviolet radiation now commercially available:

- a. A 99.9% reduction of the microbial load tested at the University of Padua against viruses, bacteria and fungi, which thanks to the use of the magnetic field is ensured even on very small surfaces and finely chiseled objects
- b. Sanitising is achieved with considerable energy savings, estimated at a minimum of 33% compared to conventional UV light sanitisers on the market.

Patent approved.

The DABO HTS 7.3 technology has been verified at Molecular Microbiology University of Padua to be 99.99% effective and more than 30% energy saving compared to Uvc and is the subject of an approved patent in the name of DABO HTS 4.0 srl. The Dabo touch safely models are the subject of a patent approved in the name of Stefano Bottesin. The encrypted two-way data communication interface is the subject of a patent approved in the name of Stefano Bottesin and Sergio Marchese.

1 - SECTOR

The vending sector is suffering from the continuous increases in raw material prices, rising personnel costs, logistics and transport costs of raw materials and also those delivered on machinery.

2 - TECHNOLOGY

Thanks to its advantages, the DABO HTS 7.3 technology lends itself to the sanitisation of the parts most polluted by viruses and bacteria, such as:

- the push-button panels of vending machines but also of automatic checkouts
- the product pick-up compartment, such as the food (and non-food) drawer, coffee cup or glass and/or beverage drawer
- the coin withdrawal compartment for change,
- and all finely chiseled surfaces that are difficult to sanitize

The realisation of this catalogue is to offer restaurant and vending machine operators an innovative lever, such as sanitising the push-button panels and the parts most frequently touched by several people.

The plus to be presented to customers is the security that their employees will not fall ill with respiratory diseases caused by the occasional infection of the most touched parts. In this specific case:

- push-button panels
- product withdrawal compartment
- change withdrawal

DABO HTS 4.0

DABO HTS 4.0 srl
sede legale: Via Barche 53, Mirano (VE)
REA VE 455118 - Cap. Soc. € 10.000,00 i.v.

N. iscrizione Reg. Imp. di --- Cod.Fisc. E P.IVA 05394380280

"Sanitise where you touch, because your health is precious!"

3 - CERTIFICATIONS AND PATENTS

The main patent is the new "radiation" (E-Bot) calibrated on viruses and bacteria and applied to products to eliminate them (air - surfaces - objects).

The technology, tested and certified at the University of Padua Molecular Microbiology, called DABO HTS 7.3, is highly innovative and makes it possible to sanitise objects with considerable energy savings, estimated at a minimum of 33% with respect to the use of ultraviolet radiation now on the market. The new "radiation" (E-Bot) makes it possible to treat and sanitise very small surfaces, details and cavities of objects not directly exposed to ultraviolet light. The technology is the subject of a patent filed in the name of DABO HTS 4.0 srl

DABO HTS 4.0 srl also aims to develop, produce and market innovative products and services based on smart technology to be coupled to sanitisation devices to ensure effective and timely control.

4 - CUSTOMER LOYALTY - BUSINESS

The added value of touch safes and sanitisation systems applied to where they are most touched reassures customers when using the machines and ensures that these customers are not contaminated by viruses and bacteria AND therefore will fall ill less this will allow you to get confirm a continuity of contracting with companies by offering the highest quality service.

RENT

Examine your customers' needs, choose the machines that need sanitising and ask us for a quote.

We will prepare a proposal for rental or sale of the devices within a short time.

4.0

All devices can be remotely controlled for sales and usage, as well as their reconfiguration. This involves installing a 4.0 card that will allow remote control of the devices. The annual subscription costs €. 150.00 for up to one thousand devices.

PPV

Technical support 24/24 7 days a week. The telephone service is always active. In the case of 4.0 devices, we will intervene to remedy any problems by reconfiguring the device in accordance with and after authorisation from the operator.

HTS SL 4.0

Top model, versatile, vandal-proof stainless steel frame, version 4.0, can be fitted to machinery.

Installation time: all versions = 20'.

Can be fitted with wow effect, minimum size 200mmx100mm, maximum size 900mm (height) x 800mm (width)

HTS SL 4.0

Schermo Degermizzante e Sanitizzante

DABO HTS 4.0 è sempre attenta alle esigenze del cliente, DABO S.r.l. più leader affermato nella distribuzione automatica. In linea con la filosofia aziendale che mette al centro il benessere fisico e alla sempre più crescente esigenza di alimentarsi e consumare cibi sani in ogni momento al fine di tutelare e garantire i consumatori ha ideato e brevettato HTS. 4.0, un sistema di degenermizzazione e disinfezione innovativo.

Gli schermi degenermizzanti e sanitizzanti con raggi UV-C sono brevettati e testati per l'eliminazione del Sars-Cov-2 e virus, muffe, microrganismi e pezzi di cartiglio sui pulsanti touch.

DABO HTS 4.0 ha ottenuto i seguenti certificati: EM04681, EM04682, EM03983-A, EM03983-B, EM03983-C, EM03983-D.

#ShareYourBreak

DABO HTS 4.0 è un dispositivo di disinfezione automatico ad alta tecnologia, rendendo disponibili servizi: BANCOMAT - VENDITA - DISTRIBUTORI DI CARBURANTE.

Il DABO HTS 4.0 è composto da:

- Sistema degenermizzante e sanitizzante raggi UV-C;
- Sistema riconosciuto per attivare e interriconoscere (nel caso di bancomat o pulsante in legno non usato) per PULSANTE, MONITOR TOUCH, SCHERMI MULTIFUNZIONE, QUAU, BANCOMAT etc. etc.

Il funzionamento di DABO HTS 4.0 è molto semplice.

Il prodotto prevede 3 luci e led che funzionano come un "semáforo".

Appena l'utente ha terminato la propria operazione il sistema si attiva e avvia le procedure di degenermazione di appena 6" nell'area preposta.

Quando il sistema è attivo, l'utente viene avvertito da un led rosso acceso.

Al completamento della degenermazione DABO HTS 4.0 accende il led verde e sarà possibile procedere in tutta sicurezza con una nuova operazione.

Application to machines such as ATMs, automatic cash dispensers for petrol stations, vending machines in public places.
