# Don't just clean your tile and grout, clean your tile and SEAL your grout ONCE AND FOR ALL.

Our ColorSeal process gives your grout the protection needed from ever becoming stained again using normal cleaning practices.

Legs Hard Surface Restoration offers professional stone and tile maintenance and restoration services.

From tile and grout cleaning to restoring, polishing and maintaining marble, granite, terrazzo and other natural surfaces, Legs Hard Surface Restoration & Cleaning is experienced in the stone and tile industry.

Legs Hard Surface Restoration & Cleaning utilizes state-of-the-art cleaning equipment and restoration processes to obtain superior results.

We are licensed and insured in New Hampshire. Our technicians take pride in delivering a finished floor, second-to-none.

## Our ColorSeal process will keep your grout looking like new for years to come.

Our process first deep cleans your tile and grout, extracting the dirt from deep within the pores of the tile and grout, then, once thoroughly cleaned we apply the ColorSeal, matching your grout color or changing it to a new color all together.

### More than just a sealer...

Our ColorSeal treatment is much more than just a 'pretty cover-up.' It contains a constant acting mildicide – an antimicrobial agent that will help eliminate the growth of mold, mildew and fungus.

### After Care

After the ColorSeal is completed you can walk on your floors and use them as normal.

Over the next 4-6 hours, spills need to be cleaned up as soon as possible. After the 4-6 hour curing time use normal cleaning practices. Once your grout has been ColorSealed it will not stain and will remain clean with a normal cleaning regimen.

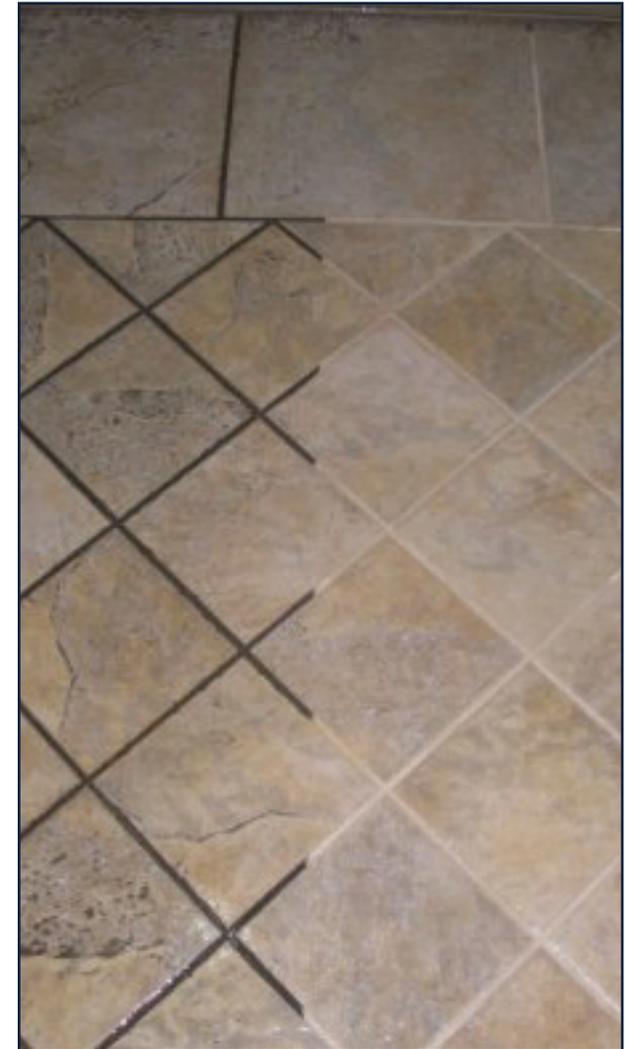

### Repair

If you have broken tiles or missing grout, we can replace and repair these areas leaving you with a floor that looks as good as new.

## Want to..

- save hundreds on costly cleanings?
- make your tile and grout dirt and stain resistant?
- give your old floor a new appearance?
