

EquipmentOS

The Challenge: Keeping Your Carwash Equipment Running

Experienced carwash owners and managers know that keeping equipment up and running is a huge challenge. However, a lack of equipment and maintenance knowledge can leave owners in the dark about what they should be doing to keep their equipment running. Not implementing a comprehensive equipment maintenance program can lead to:

- **Time consuming and expensive repairs**
- **Carwash downtime**
- **Loss of customers**

Advantages of EquipmentOS

- **Advice to Protect Your Assets**

The CarwashOS team will assist you in choosing a carwash maintenance program that works best for your budget, such as Wash Systems, which automates your maintenance tasks, reducing equipment failure and expensive costs.

- **Keep Machinery Up and Running**

Preventative and periodic maintenance routines, based on your specific equipment packages and a way to track the repair and work order process for equipment that needs repair, will keep machinery operating smoothly.

- **Maintain Satisfied Customers**

Equipment that is reliable and provides a deep clean in a timely manner will ensure customers have a positive experience.

What EquipmentOS Delivers

EquipmentOS helps carwash owners and managers develop a complete maintenance program designed specifically for their equipment packages.

The Results

The carwash operations team has the tracking and programs needed to keep the carwash equipment in good shape for an extended period.

Outputs

- **A complete master equipment list**
- **A maintenance list** for tracking needed repairs, work orders, and parts orders
- **A comprehensive preventative maintenance schedule and checklists** electronically or on paper
- **Basic equipment maintenance training**
