

ProjectOS

The Challenge: Preparing for Opening Day While Navigating the Construction Phase

Building and operating a carwash can be challenging for new owners and investors. During the construction phase, owners are inundated with countless tasks and activities and must make decisions without expertise or experience in the industry. This can lead to missed steps and project delays. Without ProjectOS carwash owners and investors:

- **Are unaware of industry standards**
- **Miss crucial deadlines**
- **Have no one to help with important questions**

Advantages of ProjectOS

- **Clearly Defined Best Practices**
Management is provided with industry expertise to move them forward.
- **Stay On Track and On Time**
Project management technology helps track choices, decisions, and tasks during the time leading up to the carwash opening.
- **Carwash Industry Expert Knowledge**
Regular consultations with the CarwashOS team will help with issues that arise during the construction process and opening day.

What ProjectOS Delivers

ProjectOS is a project management-based program designed to streamline the operational activities and decision points that carwash owners must complete throughout the construction phase of their project. It provides the process and technology for crucial decision making.

The Results

The carwash team is prepared with all the tools and content needed to succeed on opening day.

Outputs

- **Consulting calls** with experienced carwash industry professionals to discuss decision points and receive advice.
- **Recommendations** based on your preferences and industry best practices.
- **Detailed project management plan** with subtasks.
- **Employee hiring guidelines**, example job descriptions, labor planning, and budgeting.
- **Carwash supplies and tools shopping list** to prepare for launch with confidence.
- **Ownership task lists** during the construction phase.
